#### I. Letter to Shareholders

#### Dear shareholders:

The summary of the business results of 2022 and the outlook for 2023 is as follows:

#### 1. Business results

The specific achievements of 2022 are summarized as follows:

- (1) Successful development of low-orbit satellite communication components, driving significant revenue growth in this category.
- (2) Participation in the government's space industry development plan and cultivation of the required talent.
- (3) Successful expansion of IoT opportunities, enabling stable mass production orders for products in various application fields such as drones and WiFi 6.

The following is a summary of the operating data for 2022:

(1) Business plans and implementation results

The consolidated revenue of the company in 2022 was NT\$1,837,665 thousand, an increase of 4.51% compared to NT\$1,758,389 thousand in 2021. The consolidated net profit after tax was NT\$324,570 thousand, an increase of 14.86% compared to NT\$282,590 thousand in 2021.

#### (2) Budget implementation

The Company choose not to disclose 2022 financial forecasts operating results for the most recent fiscal year are as follows:

Unit: NT\$ thousands

		nt. 1 (1 φ thousand
Item	2022	%
Net sales	1,837,665	100
Cost of Sales	1,086,769	59
Gross profit	750,896	41
Operating Expense	458,427	25
Operating Income	292,469	16
Pre-tax Income	416,097	23
Net Income	324,570	18

#### (3) Profitability analysis (Consolidated financial statements)

	Analysis item	2022	2021
Financial	Debt to asset ratio (%)	30.84	32.59
structure	Long-term capital to property, plant and equipment (%)	271.90	270.01
	Current ratio (%)	222.54	202.2
Debt-paying ability	Quick ratio (%)	196.59	173.24
	Times interest earned	8985.27	15282.58
	Return on assets (%)	9.41	8.46
	Return on shareholders' equity (%)	13.62	12.05
Drofitability	Operating profit for paid-in capital ratio (%).	47.05	35.61
Profitability	Net income before tax accounted for paid-in capital ratio (%)	66.94	55.25
	Profit margin (%)	17.66	16.07
	Earnings per share (NT\$)	4.36	3.81

Comparing the 2022 and 2021, the company's financial structure and debt repayment ability indicators still maintained the long-term stable financial status of the past.

#### (4) Research and development status (consolidated financial statement)

The main focus of the company's research and development investment in 2022 was to continue the design and development of 5G and IoT, satellite communication products in response to the demand for efficiency and quality in the next generation of communication. At the same time, new generation product applications were developed in line with market demand. The related research and development expenditures are summarized in the following table:

Items	Year	2022	2021
R&D expenses		150,911	146,060
Net sales		1,837,665	1,758,389
(%)		8.21	8.31

#### 2. The 2023 Business Plan

- (1) Operating principles and major production and marketing strategies
  - i. Actively developing low-orbit satellite communication components, driving revenue growth acceleration:

Low-orbit satellites have been a focus in the wireless communication industry

since last year, especially in the development of IoT, autonomous driving, and other diverse applications. The low latency characteristics of low-orbit satellite applications are essential to meet development needs. Last year, major international companies made significant progress, and it is expected that more diverse development opportunities can be grasped in the new fiscal year. Advanced countries and startups are actively involved in various applications, and various microwave/millimeter-wave components require customized development, which is the core competitiveness of our company. By grasping the needs from all parties and developing customized products that meet customer needs, we expect to significantly improve operating performance as the industry develops.

ii. Expand the production capacity of low orbit satellite's product to reserve the stock for the outbreak of business opportunities:

As the proportion of low-orbit satellite products continues to increase, and these products' frequencies extend to millimeter-wave applications, it is expected that these products will gradually enter mass production, and demand will grow significantly as the number of satellite launches increases. Capacity reserve should be the key focus this year. To meet this development demand, in addition to the ongoing purchase of production equipment, the expansion plan for the third factory has been carried out. With the expansion of these capacities, a more significant product line reserve will better satisfy and attract long-term cooperation from customers and reserve the capacity scale needed for the upcoming business opportunities in low-orbit satellites over the next few years.

iii. Integrate resources to expand 5G opportunities and develop niche application markets:

As countries' pandemic response policies no longer interfere with the normal operation of industries, the market has felt the recovery of 5G deployment back to its normal track. Consequently, demand from customers has significantly increased, especially for the E-band (80GHz) in the millimeter-wave frequency range. Capturing the opportunities of this niche product is also included as a key focus of the new fiscal year's operations. Internally, in addition to developing relevant products according to customer needs, optimizing processes and reducing costs contribute to enhancing competitiveness, which is essential for seizing such business opportunities.

#### (2) Expected Sales Volume and Basis

Based on objective observations, sales volume is determined by market demand and development trends, customer operating conditions, and the company's current order situation. The vision of smart living with wireless communication and the applications of 5G combined with satellite communication in the IoT era are promising, and the industry's outlook can still be highly optimistic. Especially as the overall industry is experiencing high growth, Shengda Tech, a provider of key wireless communication components, can maintain and strengthen its competitive advantage in the communications market. Therefore, it is expected that the overall sales volume can continue to grow.

# 3. Impact of External Competitive Environment, Regulatory Environment, and Overall Operating Environment

In general, although there are some differences in the external competitive environment, regulatory environment, and overall operating environment each year, companies with stable

profitability have a competitive advantage in the face of rising international raw material prices. The company has such a foundation, so the company's operating prospects remain positive.

#### 4. Future Development Strategy

Following the 2022 Ukraine-Russia conflict, where low-orbit satellite communication played a crucial role, the satellite communication exhibition returned to Washington D.C., USA on March 14th this year. As low-orbit satellite communication will drive the widespread application of wireless communication in autonomous driving and IoT, it is also a key industry supported by the government. Shengda Tech set up a booth at the exhibition to showcase certified satellite communication components, attracting the attention of many satellite industry players and facilitating broader application demand exchanges, which are expected to benefit future business expansion. Both low-orbit satellite communication applications and millimeter-wave frequency bands commonly used in 5G are internationally competitive products of Shengda Tech, and deepening these niche markets is believed to bring unlimited business opportunities in the era of big data moving toward wireless transmission. Since its establishment, the company has adhered to the principle of "steady, focused, and pursuing excellence," and has been recognized by customer satisfaction. In the future, Shengda Tech will continue this spirit, working with customers, suppliers, and other partners to fulfill its mission of becoming the "most reliable component supplier in the wireless communication industry," creating value for shareholders, providing a stage for employees to realize their potential, fulfilling corporate social responsibility, and continuing to strive for corporate value.

Last but not least, on behalf of the company, we would like to thank all our shareholders for your support, and hope that we will continue to receive your encouragement and guidance throughout the coming year.

We wish you all prosperity and every success in the future.

Sincerely,

Chairman : Su-Ming Chen

CEO : Tung-Yi Wu

Accounting Supervisor: Shu-ying Lee

## II. Company Profile

1. Date of Incorporation : UMT was established on September 7, 1999.

## 2. Company Milestones

1999	Sep.	Established Universal Microwave Technology, Inc. in Xinzhu Road, Xizhi City, Taipei County.
	Oct.	Completed the development of "Ku-Band VSAT OMTs & Filters".
2000	Jan	Completed the development of "25/28GHz LMDS OMTs/Diplexers" and "28 & 38GHz Waveguide Diplexers".
2001	Oct	Established a microwave antenna measurement laboratory.
2002	May	Received a grant from the Ministry of Economic Affairs to encourage emerging small and medium-sized enterprises to develop new technologies in 2002.
2003	Nov	Passed ISO9001: 2000 certification.
2004	Jun	Received a grant from the Ministry of Economic Affairs to encourage emerging small and medium-sized enterprises to develop new technologies in 2004.
2005	Aug	On August 16, 2005, it was approved by the Securities and Futures Bureau for public issuance of shares, stock code 3491.
	Sep	Won the Ministry of Economic Affairs SBIR Excellent Industry Contribution Award in 2006.
	Sep	Purchased land in the Liudu Industrial Zone to plan for a new factory.
2006	Nov	On November 1, 2006, the stock was listed on the Securities Counter Transaction Center, stock code: 3491.
	Dec	Selected as a "Deloitte Asia Pacific High-Tech, High-Growth Top 500" company by the Deloitte Global Organization.
2007	Feb	In 2007, received a grant from the Ministry of Economic Affairs for the SBIR project "Embedded Independent Coupling Unit Coupler".
	Jan	On January 3, 2008, the stock was listed on the Securities Counter Transaction Center, stock code: 3491.
	Feb	Passed ISO14000 certification.
2008	Feb	Selected as a strategic supplier for key customer Ceragon.
	July	Selected as a qualified supplier for the new annual project of Nokia-Siemens.
	Oct	On October 13, 2008, the new factory in the Lidu Science and Technology Park was completed and moved in as the company's headquarters.
2009	July	Selected as one of Forbes Asia's Top 200 Most Potential Small and Medium-sized Enterprises.
	May	Passed ISO9001: 2008 (CNS12681) certification.
2010	Nov	Raised the issuance of the first domestic secured convertible corporate bonds, with a total amount of NT\$ 300 million.
2011	Jun	Through its subsidiary located in a third country, the Company acquired a 95%

		equity stake in Exceltek Electronics (Kunshan) Co., Ltd. (renamed Radiation
		Technology Inc. in February 2015).
2012	Jun	Received a verification certificate for the Occupational Safety and Health Management System, in compliance with TOSHMS: 2007 and OHSAS18001: 2007 system standards and requirements.
	Nov	Acquired the 2013 communications equipment passive component procurement contract of the European international communications giant Elishin.
2013	Apr	Received a grant of 5 million New Taiwan dollars from the Ministry of Economic Affairs CITD for the "Millimeter Wave Communication Orthogonal Mode Transducer Development Project" in 2013, with a subsidy amount of 1 million New Taiwan dollars.
2014	Feb	Won the 2013 Deloitte Asia Pacific High Technology, High Growth Fast500 evaluation, the past three years of revenue growth results are impressive and strong.
	Dec	Passed the NEC system certification and obtained mass production orders, both parties will continue to expand future cooperation projects.
	Aug	Purchased a land and building in the Industrial Construction Section of Qidu District, Keelung City (the former Shangpengtang Factory), with a land area of 2,555 square meters (772.8 tsubo), planned to be a precision machinery processing factory.
2015	Oct	Awarded the "Development Project for 40/80GHz Millimeter Wave Branch Network Subsystem" funded by the Industrial Development Bureau of the Ministry of Economic Affairs with a total amount of NT\$ 21 million and a subsidy amount of NT\$ 6.3 million. The development is significant for the future 5G market opportunities.
	Dec	On December 2, 2015, the subsidiary, RADIATION TECHNOLOGY,INC. had its shares listed on the Over-the-Counter Market of the Taipei Exchange with the stock code 6514. (The operating entity under its jurisdiction is Radiation Technology Inc.)
2016	Sep	Selected as the "Outstanding Employer Unit of the Year 2015" under the R&D alternative service system, ranking 11th in the private industry group. This is the second time we have received this honor.
2017	Jun	Invested a million dollars to build Taiwan's first civilian millimeter-wave antenna measurement laboratory, with a measurement frequency reaching up to 94GHz. This will provide customers with a one-stop R&D, design, testing, and manufacturing service.
	Oct	Acquired 51% of the equity in GENTON TECH CORPORATION and 30% of the equity in Terasilicon, respectively. This expands our operational scale and makes the wireless communication territory more complete, with greater synergistic

		effects expected from the expansion of front-end business and integration of logistical resources.
	Jan	Obtained the "Health Promotion Badge" certification for a healthy workplace from the National Health Command of the Ministry of Health and Welfare.
2018	Nov	Awarded by the Industrial Development Bureau of the Ministry of Economic Affairs for the "Development Project for Adjustable Microwave Duplexers Applied to Mobile Communication Backhaul Networks" with a total amount of NT\$35 million and a subsidy amount of NT\$12 million.
	Dec	Passed the assessment of the Ministry of Labor's TTQS Talent Development Quality Management System (Corporate Edition).
	Dec	To cultivate excellent students and give back to Keelung local universities, we donated to the National Ocean University's Scholarship Fund in 2018 and received a thank you certificate from the Ministry of Education.
	Jun	Completed the integration of hardware and software for the Sub-6GHz antenna anechoic chamber, providing all necessary active and passive performance testing and R&D for antennas in the Sub-6GHz band.
	Aug	The subsidiary (stock code: 6514, RTI) acquired the equity of Joymax Electronics Co., Ltd. accounting for 99.99% of the issued share ratio.
2019	Oct	Honored by the Industrial Development Bureau of the Ministry of Economic Affairs as the 5th Potential Medium Enterprise, affirming our technical expertise, deep cultivation in the communications field, focus on our main business, and international competitiveness.
	Dec	Won the subsidy from the Ministry of Economic Affairs A+ corporate innovation R&D refining plan for the "Development Project of High-performance Front-end Modules for 5G Millimeter Wave Small Base Stations" with a total cost of 170 million NT dollars and a subsidy amount of 74 million NT dollars. The development is crucial for the future development of 100% domestically produced 5G millimeter wave IAB radio frequency modules and the construction of a complete 5G terminal supply chain in Taiwan.
2020	Jan	Added a millimeter wave network analyzer, with the highest frequency coverage up to 169GHz. Continually increasing the measurement capacity of D-Band/W-Band, investing more resources in millimeter wave band R&D, leading the industry.
2020	Aug	Joined the Ministry of Science and Technology's 2020 "5G RF Industry Technology Alliance" as a member, contributing our many years of industrial experience to enhance domestic 5G RF industry technology and international competitiveness.

	Sep	The company is committed to the development of aerospace and precision industries. Passed the AS9100:2020 Aerospace Quality Management System certification, which will further empower us to expand opportunities in satellite communications.
	Mar	The Company resolved to acquire a 99.99% equity stake in Joymax Electronics Co., Ltd. through its subsidiary (stock code: 6514 RTI).
2021	Jun	Honored with the second rank in the Civilian Industry Group of 2021 of the Ministry of the Interior's Excellent Research and Development Alternative Service Employer Unit.
	Nov	Passed the "Low-Orbit Satellite Ground Communication Equipment Development Assistance Program" by the Ministry of Economic Affairs and Industry, affirming the outstanding independent research and development capabilities of Universal Microwave Technology, Inc. in the field of low-orbit satellites.
	Feb	Awarded the Certificate of Appreciation by the "National Communication Commission" for our assistance in the preparation of 5G mid-band spectrum, improving domestic satellite communication interference issues, improving stability and high yield, thus enhancing our country's frequency utilization efficiency and promoting spectrum coexistence and 5G development.
2022	Aug	Established Taiwan's first terahertz antenna near-field measurement laboratory. By using terahertz technology and stimulating new thinking, we are laying out 6G product development in advance, encouraging the research and development team to continuously maintain technological leadership, and adding a new wave of momentum to the future growth of our company in the wireless communication industry.
	Dec	The company was invited to attend the "Taiwan Space 2022 Low-Orbit Satellite Industry Elite Forum and Industry Exchange Event" hosted by the Ministry of Economic Affairs and Industry. At the event, we showcased the results of the B5G plan, developed and produced the country's first high-efficiency low-orbit satellite Ka-band multiplexer, and successfully entered the international low-orbit satellite gateway ground station supply chain, contributing to the development of Taiwan's space industry and talent cultivation.

#### 2.1.3.2 Diversity and Independence of the Board of Directors:

- ① Diversity of the Board of Directors:
  - A.The composition of the company's board of directors should consider diversity and formulate appropriate diversity policies based on its own operations, operational model, and development needs. This includes but is not limited to the following two aspects:
    - a. Basic conditions and values: gender, age, nationality, and culture, etc.
    - b. Professional knowledge and skills: professional background (such as law, accounting, industry, finance, marketing, or technology), professional skills, and industry experience, etc.
  - B.Members of the board of directors should generally possess the necessary knowledge, skills, and qualities to perform their duties. To achieve the ideal goal of corporate governance, the overall abilities that the board of directors should possess include:
    - a. Operational Judgment.
    - b. Accounting and financial analysis abilities.

- c. Management Abilities
- d. Crisis Management Abilities
- e. Industry Knowledge
- f. Int'l Market Perspective
- g. Leadership Abilities
- h. Policy-making abilities

(2) Core Objectives for Board Diversity

Shu-Ling Lin	F	✓	✓	✓	✓	✓	✓	✓	✓

Out of the current seven seats on the board of directors, 37.5% are occupied by employee representatives, 50% are independent directors, and 25% are female directors. The three independent directors are serving their third term.

The company is aiming to strengthen corporate governance by adding one more director and is planning to increase this number in the ninth board of directors to achieve this goal.

③ Independence of the Board of Directors: There are currently 7 members on the board of directors of the company, including 3 independent directors and 3 employee representatives (accounting for 37.5% of the total number of directors). None of the directors of this term violate the provisions of Items 3 and 4 of Article 26 of the Securities Trading Law. The chairman of the board of directors and the general manager are spouses. To enhance the independence of the board's operation, the company is actively training senior managers internally to establish a proxy mechanism.

Note 3: Director Kao, Chun-Liang holds 467,000 shares in the name of others, which are held by his investment company.

<sup>2.3</sup> If the company's chairman and general manager or positions of equivalent duties (highest manager) are the same person, in spouse relationship or within first degree of kinship,

please explain relevant information of the reasons, rationality, necessity and countermeasures:

Chairman and general manager of the Company are in spouse relationship. This is to enhance operation performances and management efficiency, increase diversified knowledge background. However, to strengthen the independent operation of the board, the Company has actively trained senior managers and built agent system inside the company. Moreover, the chairman closely makes sufficient communication with all directors in usual times on the recent status of company operation and future directions. In the future, the Company also proposed to past independent director seats to enhance the competency of the board in all aspects and strengthen supervision efficiency. Currently, the Company had the following practical measures:

- 1. The current 3 independent directors had rich practical experiences in finance, accounting and production industry and can give the Company suggestions in multiple aspects and play the supervision role.
- 2. Directors were being arranged to participate in professional directors' courses in external institutes for them to familiarize new laws and regulations and enhance the operation performances of the board.
- 3. The independent directors and the functional committees had sufficient joint discussion, proposed suggestions for references to the board and had sufficient communication with the accountants to implement corporate governance.
- 4. There are more than half of the directors in the board who did not take on other positions as employees or managers.

#### 3. Remuneration of Directors, President, and Vice President

- 1. Please state the policy, system, standard and structure for paying remuneration to independent directors and the relationship of the factors, such as the duties, risks and devotion time burdened, and the payment amount:
  - The remuneration of the independent directors of the company, in addition to considering the results of the director performance evaluation, is also based on the standards set by the company's "Director Remuneration Structure and System". The Remuneration Committee reviews each director's level of involvement and contribution to the company's operations, linking the fairness of performance risk with the remuneration received, and after considering the company's operational performance and the usual levels in the industry, makes recommendations to the board of directors for resolution.
- 2. In addition to the information disclosed on the table above, directors of the company received remuneration for providing services (such as serving as consultants rather than employees) to all the companies in the financial statement in recent years: None.

#### 3.5 Employee Compensation of Executive Officers

2023/4/23 Unit: NT\$ Thousand; %

	Title	Name	Employee Bonus - in Stock	Employee Bonus - in Cash	Total	Ratio of Total Amount to Net Income (%)
	Group CEO	Su-Ming Chen				
	President	Tung-Yi Wu				
	Vice	Chun-Liang				
	President	Kao				
Executive Officers	Vice President	Chen Chung				
iti\		Kuang				
/e (	Vice	Chen Yu	0	14,250	14,250	5.26
Ωfi	President	Cheng				
icers	Vice President	Pey Heh				
	Associate Vice	Ho wen				
	President	sung				
	Associate Vice President	Lien Lang				
	Manager	Shu-ying Lee				

Note 1: The proposed employee bonus amount for 2022, which was approved by the board of directors on March 29, 2023, before the shareholder meeting for profit distribution proposal, is used for estimation as the actual distribution amount cannot be forecasted, thus the ratio of the actual distribution amount in 2022 is used.

- 3.6 Individually compare and describe the total compensation amount paid to each Director, President, and Vice President, as a percentage of net income by the Company and by all other companies listed in the consolidated financial statements during the past two fiscal years, and analyze and describe remuneration policies, standards, and packages, the procedure for determining remuneration, and its linkage to operating performance and future risk exposure.
  - 3.6.1 The ratio of total remuneration paid by the Company and by all companies included in the consolidated financial statements for the two most recent fiscal years to directors, presidents and vice presidents of the Company, to the net income. :

		20	22			21		
Title	The co	mpany	Companies in the consolidated financial statements		The company		Companies in the consolidated financial statements	
	Cash	%	Cash	%	Cash	%	Cash	%
Directors	10,399	3.84	15,779	5.83	16,794	6.04	21,482	7.60
Presidents and vice Presidents	56,651	20.90	70,225	25.91	40,545	17.13	49,082	17.37

3.6.2 The policies, standards, and portfolios for the payment of remuneration, the procedures for determining remuneration, and the correlation with business performance and future risk exposure.

### (1) Director's Remuneration

- ① The remuneration of the directors of the company is determined according to the company's bylaws. If the company makes a profit in a fiscal year (profit here refers to pre-tax income minus employee bonuses and director remuneration), at least 8% should be set aside for employee bonuses and no more than 3% for director remuneration. However, if the company has accumulated losses (including adjustments to undistributed earnings), reserves should be set aside in advance to offset the losses.
- ② The remuneration of the directors is authorized by the board of directors according to their level of participation in and contributions to the company's operations, and is set with reference to the usual standards in the industry.
- The fixed remuneration amount for independent directors is proposed by the remuneration committee, approved by the board of directors, and adjusted accordingly.

### (2) Managers' Remuneration

- ① The remuneration of the managers of the company is regularly paid according to the company's salary scale, with the main components being year-end bonuses and performance bonuses, and stock-related bonuses including employee stock options, treasury stock transfers, and restricted stocks.
- ② The remuneration of the managers is proposed by the chairman of the board, taking into account the performance evaluations and recommendations of managers at all levels, as well as the economic environment, industry standards, and the need for talent retention. The distribution details for each manager are submitted to the remuneration committee for approval.

The policy, system, standards, and structure of directors' and managers' performance evaluations and salary compensation are regularly reviewed by the remuneration committee, hence there are no major uncertain risks in the future.

## 4. Implementation of Corporate Governance

4.1 Board of Directors 'Meeting Status

A total of 5 meetings of the board of directors were held in 2022, Director attendance status is shown as follows:

Title	Name	Attenda nce in Person	By Proxy	Attendance Rate (%)	Remarks
Chairman	ChenSin Investment Company Representative:	5	0	100	2022.06.15
Director	Su-Ming Chen Tung-Yi Wu	5	0	100	2022.06.15
Director	PinSin Investment Company Representative: Chun-Liang Kao	5	0	100	2022.06.15
Director	Ji-Rui He	5	0	100	2022.06.15
Independent director	Xing-Yi Chen	5	0	100	2022.06.15

4.1.2 For Information about the Implementation of Directors' Recusal in Proposals with Conflicts of Interests, the Name of the Directors, the Content of the Proposal, Reasons for Recusal, and the Results of Voting Shall be Indicated:

Please refer to 1 Material resolutions of a shareholders' meeting or a Board of Directors' meeting during the most recent fiscal year or during the current fiscal year up to the date of publication of the annual report.

4.1.3 Listed company Implementation of self-evaluations by the Company's Board of Directors:

Evaluation cycle	Evaluation period	Scope of evaluation	Evaluation method	Evaluation items
Evaluate the performance by the board at least once a year	2022	1. The whole board 2. Individual directors 3. Functional committees	1.Conducted by self-evaluation inside the board 2.Self-evaluation by the directors 3.Self-evaluation by the Functional committees	Evaluation items by the board:  1. Participation level to company operations  2. Enhancement on the decision quality of the board  3. The composition and structure of the board  4. Election of directors and continuous advanced studies  5. Internal control  Evaluation items by the Individual directors:  1. Grasp of company goals

and tasks
2. Awareness on directors'
duties
3. Participation level to
company operation
4. Management of internal relationship and communications
5.Directors' professional and continuous advanced studies
6.Internal control
Evaluation items by the
Functional committees:
1. Participation level to
company operations
2. Functional committees'
duties
3. Enhancement on the
decision quality of the
functional committees
4. The composition and
election of the functional
committees
5.Internal control

Implementation of self-evaluations:

All board members pay high attention and operate according to relevant laws and regulations, performing their duties effectively. The overall evaluation results are satisfactory.

The company commissioned an external organization, Zhong Shuo Enterprise Management Consulting Co., to conduct an external evaluation of the operation and performance of the board of directors and functional committees for the year 2022. This organization and the executing experts have no business dealings with the company and maintain an impartial and objective attitude, with no factors affecting their independence. The evaluation method combines data analysis and video participation in company board meetings and functional committee meetings. The external evaluation report was issued on December 8, 2022, and suggestions and planned measures were presented to the board of directors on March 29, 2023. The overall evaluation, recommendations, and the company's planned improvements are as follows:

External evaluation results of the performance of the board of directors:

After compiling the self-evaluations of each director and conducting video interviews with the chairman of the board and the chairman of the audit committee, the company believes that your board of directors has established relevant policies and processes for the operation of the board in accordance with related laws and domestic corporate governance indicators. The board is composed of directors with relevant professional capabilities, and work is distributed according to different specializations and experiences. The board and various functional committees can operate effectively, and the evaluation result is excellent.

Recommendations for external evaluation optimization:

- ① This year, the company has added a new female independent director, increasing the number of independent director seats to four and making up 50% of the total director seats. However, the terms of the other three independent directors have all exceeded three terms. It is suggested that during the next election, a new independent director could be sought to replace one of the existing independent directors. This could strengthen the independence of the independent directors and functional committees, and establish a nomination committee to strengthen the mechanism for electing directors, demonstrating the company's governance benchmarks.
- ② The company is in the telecommunications network industry, and it has paid great attention to information security and risk management issues. To better grasp future challenges and opportunities, it is recommended that the company could establish related functional committees in accordance with the company's development strategy and corporate governance goals, such as a risk management committee or an information security committee, to help the board supervise the company, protect investor rights, and facilitate the company's sustainable operation.
- ③ It is suggested that ythe company could refer to the provisions of Article 3-1 of the Corporate Governance Practice Code for listed companies, establish a corporate governance officer, and assign specific responsibilities and clearly define their powers to assist directors in performing their duties and complying with laws, thereby enhancing the operational efficiency of the board of directors.

The company's planned improvement actions are as follows:

- ① To strengthen the supervisory function of independent directors, the company's list of independent director candidates will be carefully considered based on a reasonable combination of expertise and the objective conditions for independent exercise of their duties, and nominated and appointed based on their professional qualifications and experience.
- ② The company plans to set up related functional committees as needed in the future, in line with business development and corporate governance, to maximize the effectiveness of the board of directors.
- ③ In response to regulations, the company will complete the establishment of a corporate governance officer by the end of June in 2023 upon approval by the board of directors.
- 4.1.4 Goals to Strengthen the Functions of the Board Meeting during the Current and Immediately Preceding Fiscal Years, and Measures Taken toward Achievement:
- ① For functions of the board:
  - a. The company's directors regularly attend corporate governance-related training and seminars, continuously enriching their professional knowledge and improving their functional applications.
  - b. The company has established a performance evaluation mechanism for the board of directors and assesses the operation of the board of directors in the previous year in the first quarter of each year, serving as a basis for the remuneration committee to review the remuneration of directors.
  - c. On March 24, 2022, the board of directors approved the revision of the performance evaluation mechanism for the board of directors, stipulating that at least once every three years, an external professional independent institution or team of external experts and scholars shall carry out an evaluation to strengthen corporate governance and improve the

function of the company's board of directors.

## ② For information transparency:

The financial statements of the company and its subsidiaries are regularly audited and certified by Deloitte & Touche. All required information disclosures are completed accurately and promptly, and a designated person is responsible for collecting and disclosing company information, establishing a spokesperson system to ensure that all significant information is disclosed in a timely and appropriate manner. In addition, financial and business-related information is announced on the company's website for reference by shareholders and stakeholders.

- 4.2 Participation of the Audit Committee in the Operation of the Board of Directors:
  - 4.2.1 The main issues reviewed by the Audit Committee include:
    - (1)Establishing or amending internal control systems.
    - (2) Assessment of the effectiveness of internal control systems.
    - (3)Establishing or amending procedures for major financial activities, such as acquiring or disposing assets, engaging in derivative transactions, lending money to others, or endorsing or guaranteeing for others.
    - (4)Reviewing matters involving the interests of the directors themselves.
    - (5) Reviewing significant asset or derivative transactions.
    - (6) Reviewing significant loans, endorsements, or guarantees.
    - (7) Reviewing the issuance, offering, or private placement of equity-like securities.
    - (8) Reviewing the appointment, dismissal, or remuneration of certified accountants.
    - (9)Reviewing the appointment or dismissal of financial, accounting, or internal audit supervisors.
  - (10) Reviewing annual and quarterly financial reports.
  - (11) Reviewing other significant matters stipulated by the company or the regulatory authority.
  - 4.2.2 A total of 5 meetings of the Audit Committee were held in 2022, independent director attendance status is shown as follows:

Title	Name	Attenda nce in Person	Entruste d to attend	Attendance Rate (%)	Remarks
Independent Director	Xing-Yi Chen	5	0	100	2022.06.15
Independent Director	Guan-Ping Chen	5	0	100	2022.06.15

4. Approval of the provision of loans to the subsidiary, GENTON TECH CORPORATION (abbreviated as GENTON TECH).	None			
Audit Committee Resolution Result: After consulting all attending directors an				
receiving no objections from them, the resolution was passed.				
The Company's handling of the resolution of the audit committee: N	None.			

- (2) For the situation where an independent director avoids a motion related to his/her own interests, please specify the independent director's names, the contents of the motion, the reasons for the avoidance of interests and the voting results: Please refer to 1 Material resolutions of a shareholders' meeting or a Board of Directors' meeting.
- (3) Communication between independent directors and internal audit supervisor and CPAs (which should include audit materials, methods, and results pertaining to corporate finances and/or operations, etc.
  - ①After submitting the audit report and follow-ups to the Chairman, internal audit executives shall send it via e-mail to the independent directors for review every month, and communicate and respond to the inquiries of independent directors at least once per quarter. Audit executives attend both the Audit Committee and Board of Directors, and present business reports. Each independent director keeps abreast of the Company's internal audit status in a timely manner. The Audit Committee maintains good communications with internal audit executives.

Summary of communications between independent directors and internal audit executives in 2022:

Date	Communication Focus	Recommendations and Results
2022/3/24 Board	1.Internal Audit Report	1. After discussion and communication,
of Directors	2.Approval of 2021	the independent directors have no

②Independent directors and accountants hold meetings on a regular basis per year, and report to the independent directors on the important audit findings and internal control deficiencies during the completion of the annual audit. Before the internal control audit process is carried out, explain to the independent directors the key audit matters for the year and the expected audit methods and plans, and communicate and interact with independent directors on the review or audit situation of the financial report, or issues related to finance, taxation, or internal control. The Company's Audit Committee communicates well with CPAs (certified public accountants)

4.5 Implementation of sustainable development promotion and difference from the Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies and reasons thereof:

reasons thereor:				1
	Implementation Status			Deviations from "the Corporate
Evaluation Item	Yes	No	Abstract Explanation	Social Responsibility Best-Practice Principles for TWSE/TPEx Listed Companies" and Reasons
1. Has the company constructed a governance structure to promote sustainable development and established a dedicated (part-time) unit for the promotion of sustainable development, which is managed by senior management by authorization of the Board of Directors and is supervised by the Board of Directors?	<b>√</b>		The company's sustainability development unit is the management department. It responds irregularly to activities of socially disadvantaged or charitable organizations. The ongoing projects include employing people with disabilities, providing employment opportunities to the unemployed in accordance with policies, cooperating with schools in industry-university cooperation, and continuously promoting sustainable development. The implementation is reported to the chairman by senior executives.	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.
2. Does the company assess ESG risks associated with its operations based on the principle of materiality, and establish related risk management policies or strategies?	<b>✓</b>		The company has established "Risk Control Operation Regulations", which take into account safety and efficiency for various business operations, including marketing market, production operation, human resource planning, new product line development progress, and financial accounting control, to establish a more economical business operation model.	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.
3. Environmental issues 3.1 Does the company establish proper environmental management systems based on the characteristics of their industries?	<b>✓</b>		In terms of promoting environmental management system, the company has passed ISO14001 environmental management system certification (certificate validity period: 2023/05/05~2026/05/04) and continues to promote quality and environmental	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed

			management system.	Companies.
3.2	Does the company endeavor to utilize all resources more efficiently and use renewable materials which have low impact on the environment?	~	The company actively improves the utilization efficiency of various resources, achieves waste reduction goals, and classifies resources for recycling and reuse. It also analyzes energy usage every month, continuously seeks energy-saving measures, reduces costs, reduces waste, and considers the impact of materials on the environment in product design, and pays attention to and prohibits the use of restricted substances (RoHS) and substances of high concern (SVHC).	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.
3.3	Does the company evaluate potential risks and opportunities brought by climate change, and take response measures to climate-related issues?	<b>&gt;</b>	The company assesses the risks and opportunities of environmental related issues every year and arranges countermeasures and measures as appropriate. Energy control tables are set up everywhere in the company to remind colleagues to turn off power and air conditioning according to the form prompts when they get off work. The power consumption of the air conditioning chiller accounts for about 50% of the total power consumption, so the company strictly controls the start and stop time of the chiller and the temperature of the chilled water, making the indoor general working environment temperature maintain 26 degrees~28 degrees in summer, and extend the downtime of the air conditioning chiller or shut it down when the climate temperature drops to reduce power usage. Lighting is also gradually replaced with LED lights, starting from the most frequently used areas, to achieve the maximum energy-saving effect.	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.
3.4	Does the company compile statistics of greenhouse gas emissions, water use, and total weight of waste in the past two years,	<b>Ý</b>	In addition to actively focusing on various energy-saving and carbon reduction and greenhouse gas reduction issues, the company and its subsidiaries also calculate carbon dioxide emissions, water usage, and total waste weight through electricity	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx

as well as establish			T
company strategies for energy conservation, carbon reduction, water use reduction, and other waste management?		usage, and replace energy-saving lamps, set air conditioning host temperature and related equipment detection in the office and factory area, to improve energy efficiency, reduce waste generation and reduce scrap rate.  For statistics in recent years, please refer to Universal Microwave Technology, Inc.2020 Corporate Responsibility Report 8. Environmental Protection Planning and Management.	Listed Companies.
4. Social issues 4.1 Does the company formulate appropriate management policies and procedures according to relevant regulations and the International Bill of Human Rights?	✓	The company and its subsidiaries comply with relevant labor laws and support and follow internationally recognized human rights standards - "International Human Rights Code". We treat and respect our current employees and cooperative manufacturers with dignity, and eliminate any acts of human rights violations.	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.
4.2 Does the company have reasonable employee benefit measures (including salaries, leave, and other benefits), and do business performance or results reflect on employee salaries?	✓	In order to fairly and specifically evaluate the performance of employees, motivate morale, and promote work efficiency, we have established "Employee Performance Assessment Operating Standards" and "Employee Reward and Punishment Measures". Timely performance records are kept to objectively understand their work performance, ability, conduct, and suitability as a reference for various assessments, promotions, and training.	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.
4.3 Does the company provide a healthy and safe working environment and organize training on health and safety for its employees on a regular basis?	✓	The company places great importance on providing a safe and healthy working environment for employees. In terms of physical health, we hold regular health check-ups for employees every year and hire occupational doctors and nurses to provide on-site services, including work environment assessments and health consultations for employees. We have established a health care room for instant online consultation and promote self-health management knowledge and methods through sports club activities, health	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.

		lectures, and sharing of health education information. In terms of work safety, we enhance employees' awareness of danger and cultivate their emergency response ability through continuous education and safety advocacy to reduce the occurrence of accidents caused by unsafe behaviors.	
4.4 Does the company provide its employees with career development and training sessions?	✓	Each year, the company sets an annual education and training plan for each position to develop the professional skills and management abilities that employees need now and in the future. For implementation details, please refer to the 2020 Corporate Responsibility Report 6.3 Training and Development of Universal Microwave Technology, Inc.	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.
4.5 Does the company comply with the related laws and regulations and international standards regarding the customer health and safety, customer privacy, marking communication, and labeling of its products and services and establish policies to protect the rights and interests of customers or clients and procedures for grievances?		The company and its subsidiaries are manufacturers of microwave passive components, RF components, and antennas in the microwave wireless communication industry. Our products are supplied to midstream microwave wireless communication system manufacturers, and the wireless communication systems are then supplied to the downstream telecommunications operators engaged in network infrastructure. Our products are not final consumer products, and we do not have direct contact with consumers. Providing a stable product quality and enhancing technical abilities, while treating the environment friendly, have always been the greatest reassurances and protection we offer our customers. The detailed rules are specified in the ISO management system "Customer Complaint Handling Procedure". In addition, customer satisfaction surveys are carried out based on the "Customer Satisfaction Operation Procedure" to effectively grasp customer satisfaction with products, quality, and delivery time.	Consistent with Sustainable Development Best Practice Principles for TWSE/TPEx Listed Companies.

- 6. If the Company has established the Sustainable Development principles based on "the Sustainable Development Best-Practice Principles for TWSE/TPEx Listed Companies", please describe any discrepancy between the Principles and their implementation: There have been no differences.
- 7. Other important information that helps understand the implementation of sustainable development:
  - (1) The company attaches great importance to environmental protection. After RoHS officially took effect on July 1, 2006, products sold to the European Union must not contain six toxic substances: lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls, and polybrominated diphenyl ethers. All our products comply with these standards, reducing the use of harmful substances to protect the Earth.
  - (2) The company have established a Workers Safety and Health Committee, which holds regular meetings to plan the implementation and follow-up of occupational disaster prevention plans and self-inspection plans, and review the relevant operating standards and improvements for workers' safety and health, promoting the management of safety and health matters.
  - (3) Social Welfare:
  - 1. The company donated NT\$100,000 to the Kaohsiung County Mingshan Charity Association for disadvantaged groups.
  - 2. The company provided a scholarship of NT\$ 1.156 million and donated equipment to the National Taiwan Ocean University.
  - 3. The company provided a scholarship of NT\$ 252,000 TWD to the National Kaohsiung University of Science and Technology.

4.6 Implementation of Ethical Corporate Management and Measures Adopted and Deviations from the "Corporate Social Responsibility Best-Practice Principles for TWSE/TPEx Listed Companies" and Reasons

	T W SE/ TFEX Listed Companies and Reasons					
				ı	Implementation Status	Deviations from

#### 6. Dividend Policy and Implementation Status

### 6.1 Dividend Policy and Implementation Status

The dividend policy set out in the company's articles of incorporation: Article 21-1

If the company's annual consolidated financial statements show a net profit after tax for the current period, any accumulated losses (including adjustments to undistributed profits) should first be offset, and then 10% of the net profit should be set aside as a legal reserve according to the law. But when the accumulated legal reserve reaches the total paid-in capital of the company, this is not limited. Then, special surplus reserves should be set aside or reversed according to the law or regulations of the competent authority. The remaining surplus, together with the undistributed surplus at the beginning of the period (including adjustments to undistributed profits), should be proposed by the board of directors as a surplus distribution proposal. By a resolution of more than half of the directors attending, with the attendance of more than two-thirds of the directors, all or part of the dividends and bonuses to be distributed can be distributed in cash and reported to the shareholders' meeting. The part of the dividends to be distributed in the form of stock dividends must be resolved by the shareholders' meeting.

The company's dividend policy is to distribute not less than 10% of the distributable profits to the shareholders as dividends and bonuses each year in accordance with the current and future development plans, considering the investment environment, capital needs, domestic and foreign competition, and the interests of shareholders. However, if the accumulated distributable profits are less than 10% of the paid-in capital, dividends may not be distributed. When distributing dividends and bonuses to shareholders, it can be done in cash or stock, and the cash dividends should not be less than 10% of the total dividends.

#### 6.2 Proposed Distribution of Dividend

Unit: NT\$

Beginning retained earnings	14,555,129
Adjustments on re-measurement on define benefit plans recognized in retained earnings	1,080,609
Adjustments on equity method investments	1,226,064
Cumulative unrealized loss on investments in equity instruments designated as at fair value through other comprehensive income (FVTOCI) transferred directly to retained earnings due to disposal	(1,302,000)
Add: Net profit after tax of 2022	271,000,003
Adjusted undistributed earnings	286,559,805
Less: Legal reserve (10%)	(27,200,468)
Less: Special reserve	(30,214,313)
Distributable earnings	229,145,024

Distributable items: :	
Cash dividend (NT\$ 3.6 per share) (Remark 1)	223,771,184
Unappropriated retained earnings	5,373,840
Remarks:	

Note: The actual dividend payout ratio may be adjusted by the Chairman according to the company's outstanding shares of the shareholders' register on the date for capital increase and distribution of dividends.

- 7. Impact of Stock Dividends Issuance by the resolution of the shareholders on the Company's business performance and earnings per share: Not applicable.
- 8. Employee Bonus and Directors' Remuneration:
  - 8.1 Information Relating to Employee Bonus and Directors' and Supervisors' Remuneration in the Articles of Incorporation:

Article 21

If the company has a profit (the so-called profit refers to the profit before tax, minus the remuneration for employees and directors), it should allocate at least eight percent for employee compensation and up to three percent for director compensation. However, if the company still has accumulated losses (including adjustments to the undistributed earnings amount), a reserve should be made in advance to cover the losses.

The above-mentioned employee compensation can be given in the form of shares or cash, and the recipients can include employees of subsidiaries that meet the conditions set by the board of directors. The director's compensation mentioned above can only be in cash.

The above two items should be decided by the board of directors and reported to the shareholders' meeting.

Before the establishment of the company's audit committee, the remuneration of the supervisor was combined with the director's remuneration, distributed at up to three percent of the annual profits, and this provision applied.

- 8.2 Accounting treatment for the basis of estimating the amount of the employees' compensation, directors' and supervisors' remuneration for this fiscal period, the basis of calculating the number of shares to be distributed as employees' compensation and for any discrepancy between the actual amounts distributed and the estimated figures.
  - 8.2.1 The estimated basis for calculating compensation to employees and directors in the current period:

The undistributed earnings after considering the monthly statutory earnings reserve and other factors are estimated at a fixed rate within the range defined by the articles of incorporation.

8.2.2 Basis for calculating the number of shares distributed:

It is calculated based on the closing price the day before the resolution of the shareholders' meeting of the following year, taking into account the impact of ex-rights and ex-dividend, and the employee bonus of less than one share is paid in cash.

- 8.2.3 If there is a discrepancy between the actual distributed amount and the estimated figure, it shall be accounted as profit and loss for the next year.
- 8.3 Distribution of compensation to the Board of Directors:
  - 8.3.1 At the Board of Directors meeting on March 29, 2023, the company decided on the distribution of employee and director compensation in 2022 as follows:

Item	Amount(NT\$)	
Employee Bonus	Cash	29,343,161
Directors' Remuneration	Cash	6,998,643

There is no discrepancy between the proposed compensation to employees and directors and the estimated annual compensation expenses.

- 8.3.2 The proportion of shares distributed as compensation to employees to the total amount of net profit plus compensation to employees in the current period: There are no shares distributed as compensation to employees in the most recent fiscal year, thus it is not applicable.
- 8.4 The actual distribution of compensation to employees and directors in the previous year

Unit:NT\$

Distribution Item	The estimated amount	The actual distribution	
Employee Bonus	23,505,537	23,505,537	
Directors' Remuneration	5,695,506	5,695,506	
The discrepancy between the actual distribution and the recognized compensation expenses to employees and directors of the resent year.			

- 9. Buyback of Treasury Stock: None.
- 10. The status of corporate bonds issuance: None.
- 11. The status of preferred shares issuance: None.
- 12. The status of overseas depositary receipts issuance: None.
- 13. The status of employee stock warrants issuance
  - 13.1 The annual report shall disclose unexpired employee subscription warrants issued by the company in existence as of the date of publication of the annual report, and shall explain the effect of such warrants upon shareholders' equity

2023/04/23

Type of employee share subscription warrants	2021 1st employee share subscription warrants
Effective registration date	2021.03.24 Units: 3,000

Issue (handling) date	2021.04.23				
Number of units issued	3,000				
Number of units issued available	0				
Ratio of the number of issued subscribable shares to the total number of issued shares	4.83%(Note)				
Duration	4 years and 2 months

Note: The first employee stock option certificate in 2021 took effect on March 24, 2021, and as of the date of the annual report printing, it has not yet been actually given to employees.

- 14. The status of employee restricted stock warrants issuance
  - 14.1 The status of employee restricted stock warrants issuance: None.
  - 14.2 Names and acquisition status of managerial officers who have acquired new restricted employee shares and of employees who rank among the top ten in the number of new restricted employee shares acquired, cumulative to the date of publication of the prospectus: None.
- 15. The status of new shares issuance in connection with mergers or acquisitions or with acquisitions of shares of other companies: None.
- 16. The status of implementation of the capital allocation plans: None.

# V. Operational Highlights

#### 1. Business Activities

#### 1.1. Scopes of the business

The company's primary focus revolves around the production of microwave, millimeter wave, and radio frequency front-end passive components and antennas for wireless communication. These products are primarily utilized in 4G/LTE/Small Cell networks, the fifth-generation mobile communication network (5G), and low, medium, and high orbit satellite communication equipment. To further enhance its capabilities, the group is committed to developing new technologies, processes, and materials alongside its existing expertise in microwave/millimeter-wave front-end passive component and antenna research and development, as well as manufacturing.

The table below illustrates the share of business from the main product categories:

Year	2022
Main Selling Item	(%)
Microwave & mmWave Product	50%
RF (Radio Frequency) Product	39%
Telecommunications Infrastructure Engineering Service	11%

#### 1.2. Industry Overview

#### 1.2.1. Industry status and development

During the 4G era, the mobile Internet unfolded, primarily driven by significant improvements in network speed and latency. The ongoing growth of mobile communications has fostered the diversified development of the industry. However, as the demand for 4G enters a phase of growth, the foundation for 5G has also been activated to meet the anticipated development of the Internet of Things, which requires robust information transmission capabilities.

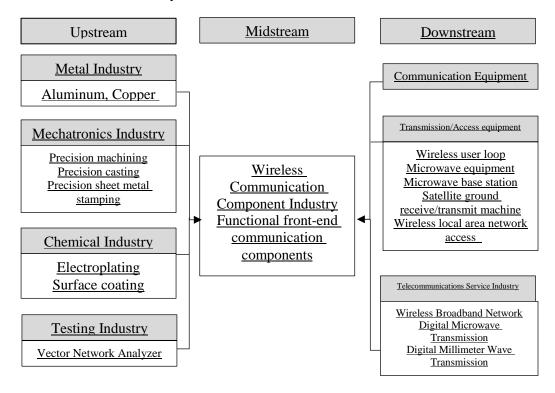

5G technology represents a comprehensive innovation over its predecessor, 4G, offering substantial improvements in terms of speed, connection capacity, and latency. In addition to basic communication functions, 5G boasts a mature industrial chain, a vast user base, and flexible and efficient application service models. Its true potential shines through in the realm of Internet of Things applications within commercial and industrial sectors, effectively addressing the mobile communication network requirements of the industrial internet.

Beyond the promising future of 5G, satellite communication plays an increasingly important role in wireless communication. While ground mobile communication systems provide convenient services for users, their deployment becomes challenging in mountainous, desert, and marine areas. In such cases, satellites act as a supplement to extend the reach of ground systems.

The integration of satellite communication systems with 5G creates a globally seamless coverage network, spanning sea, land, and air, thereby fulfilling the ubiquitous user connectivity needs. This integration represents a pivotal direction for future communication development. By harnessing the strengths of satellites and 5G, more comprehensive and high-quality services can be provided to users. As we look ahead, satellite systems will merge with ground systems, amalgamating mobile communication and wireless communication to realize the vision of an interconnected world.

Mobile communication is poised for continued growth. Developing countries and emerging markets are still in the process of setting up 4G/LTE networks to deliver high-capacity broadband data transmission services, catering to the diverse demands of smart handheld devices. Simultaneously, the need for information transmission is increasing, and the construction of 5G networks is rapidly advancing. As a result, the demand microwave/millimeter wave components is becoming increasingly prominent. Furthermore, with the cost of satellite communications rapidly declining and its global coverage advantage, it is driving the development of the wireless communications industry. Applications are expanding to meet diverse wireless communication needs, especially with the utilization of low-Earth orbit satellites, which provide omnipresent transmission services and comprehensive support for future developments such as autonomous driving and widespread IoT applications. This integration is expected to bring significant disruptions to the industry, presenting unlimited business opportunities for wireless communication providers. Microwave/millimeter wave components play an indispensable role in satellite ground receiving station modules.

1.2.2. Industry relevance of upstream, midstream and downstream companies Microwave communication relevance of upstream, midstream and downstream reaches of the industry is as follows:

The group operates as a manufacturer of midstream functional frontend communication components, wired and wireless signal components, antennas within the microwave/millimeter communication industry. Our signal transmission component products are supplied to downstream wireless communication system manufacturers, who provide wireless communication system equipment telecommunication operators or end users. Satellite communication products, on the other hand, are provided to satellite ground transceivers, satellite communication payloads, and wireless local area network access points. Additionally, antennas and transmission components have a broader range of applications, serving as signal transmission interface functions for downstream information, consumer electronics products, medical equipment, and various wired and wireless products such as automobiles, mobile phones, base stations, and amplifiers. The group's downstream users also include manufacturers of medical equipment.

#### 1.2.3. Various development trends of product

With the commercialization of 5G in 2020, millimeter wave technology has become an integral part of the 5G system's technical specifications. Consequently, the application of millimeter wave technology has expanded beyond back-end communication between base stations to encompass front-end transmission between base stations and end users. The demand for millimeter wave components is expected to surge in 5G applications, leveraging the high bandwidth characteristics of millimeter waves to achieve significant increases in transmission efficiency. Furthermore, the infrastructure for 5G will continue to expand. Looking ahead, the low-orbit satellite sector is poised for significant growth, with 2022 being considered the industry's first year of low-orbit satellite communications. As low-orbit satellite technology matures and costs decrease, the global low-orbit satellite industry is projected to experience rapid growth. Existing products will see continuous demand growth as satellite launch volumes increase for each operator, while newly certified products will enter mass production, providing additional revenue streams. In particular, millimeter wave antenna end components used in satellite payloads have been adopted by multiple customers. The company is also engaged in various ongoing certification projects with different customers, all of which serve as opportunities for supporting high revenue growth. Leveraging its extensive experience and efficient R&D capabilities, the company has successfully met the high-precision specifications of millimeter waves and collaborated with numerous customers to develop 5G commercial and satellite broadband communication devices, among other application products. These efforts contribute to the realization of a communication ecosystem where satellites and 5G technologies complement each other, enabling a swift realization of a connected world.

#### 1.2.4. Industry competition

Companies around the globe that mainly produce microwave/millimeter-wave front-end communication components are predominantly based in Europe and America, while in Japan, these products are

typically developed and manufactured by subsidiaries of system companies.

The main competitors in the microwave/millimeter-wave front-end communication component market are primarily old companies in Europe and America with a history of over 30 years. Their technical abilities are well-established and undisputed. In addition to having a cost-competitive advantage, our company also boasts a mature technology industry, high-quality human resources, a strong R&D team, robust research and development capabilities, and efficient mass production. Our years of operational results have earned us a key role in this communication market.

### 1.3. Technology and R&D Overview

## 1.3.1. R&D expenses

In Thousands of NT\$

Item/Year	2022	2023Q1
R&D expenses	150,911	32,514
Percentage of consolidated net operating revenue(%)	8%	8%

## 1.3.2. Technology or product development accomplishments

The newly developed technologies and products in the past year are as follows:

Year	R&D Items	Application
2022	Ka-Band multi-plexer	Satellite ground station communication system
2022	5G mmWave small cell front-end module	5G small cell communication system
2022	Novel long-haul microwave communication high power components	5G Backhaul communication system

#### 1.4. Long and short-term business development plans

Short-term business development plan:

1.4.1. Actively develop LEO satellite communication components, driving accelerated revenue growth:

LEO satellites have been highly regarded in the development of wireless communication since last year, especially in the development of Internet of Things, autonomous driving and other diverse applications. The low-latency feature of LEO satellite applications is particularly necessary for development. Especially in the past year, good progress has been made with major companies internationally. Continuing these achievements, it is hoped that in the new fiscal year more diverse business opportunities can be grasped. Advanced countries do not want to be absent in this regard, and start-ups are also actively launching various applications. Various types of microwave/millimeter wave components need to be custom developed, which is exactly where our core competence lies. By properly understanding the needs from all aspects, and developing custom products that meet customer needs, it is expected that the

operational performance can be significantly improved with the development of the industry.

1.4.2. Expand the production capacity scale of LEO satellite products to reserve opportunities for booming business:

With the continuous increase in the proportion of LEO satellite products, and because such products also extend the frequency to millimeter waves, it is expected that these products will gradually enter mass production and the demand will greatly increase with the increase in the number of satellite launches. The storage of production capacity should be a key point this year. In response to this development requirement, in addition to the ongoing purchase of production machines, the expansion plan of the third plant has been initiated. With these capacity expansions, the storage of a larger product line will better satisfy and attract customers for long-term cooperation, and reserve the capacity scale needed for the booming business of LEO satellites in the coming years.

1.4.3. Integrate resources to expand 5G opportunities and master niche markets: As the response policies to the pandemic no longer interfere with the normal operation of the industry, the market has already felt the 5G deployment returning to the normal track, and therefore the demand from the customer end has significantly increased, especially in the millimeter wave frequency band's E band (80GHz). Grasping this niche product opportunity is also included as an operational focus for the new fiscal year. Internally, in addition to developing related products according to customer needs, process optimization and cost reduction are both conducive to competitiveness enhancement and are necessary for grasping such opportunities.

Long-term business development plan:

(1)Utilize core strengths, multi-faceted integration and expansion.

Microwave/millimeter wave components are just a part of the communication system. However, in the communication industry, there are many industries with niche needs in the upstream, midstream, and downstream, which provide opportunities. For the upward-trending wireless communication and satellite communication industry, the company utilizes proficient technical expertise and familiarity with the industry ecosystem to establish long-term competitive advantages.

(2)Expand production capacity, continuously expand domestic and foreign markets.

With the popularization of wireless communication application fields, especially the increase in the number of satellite launches, the demand for microwave/millimeter wave components will become increasingly urgent. The company continues to expand its production scale, aiming to meet customer needs with ample capacity. In the long term, in addition to deepening existing customer relationships and expanding cooperation projects, we also actively engage with various domestic and foreign manufacturers involved in communication system development, to grasp the best dynamics of our customers, obtain more business sources, and further achieve the purpose of smoothly expanding customers, increasing the depth and breadth of the

company's customers.

#### 2. Market and Sales Overview

#### 2.1 Market Analysis

### 2.1.1 Sales regions of main products

Unit: In Thousands of NT\$

Year	20	21	20	22	
Region	Amount	%	Amount	%	
Taiwan	408,591	23.24	357,089	19.43	
China	166,659	9.48	133,953	7.29	
Asia	428,284	24.35	437,674	23.82	
Europe	335,222	19.06	307,232	16.72	
America	411,254	23.39	586,944	31.94	
Other	8,379	0.48	14,773	0.8	

#### 2.1.2 Market Share

Most of the company's products are customized and niche products, and we are also the main supplier for global microwave/millimeter wave communication system manufacturers and satellite operators. Therefore, we already have a stable market share in the wireless communication industry.

#### 2.1.3 The future supply and demand situation and growth of the market

In addition to the demand for the construction of 4G/LTE mobile communications in developing countries still driving continuous market growth, the basic infrastructure of 5G in developed countries has also started, and the demand for microwave/millimeter waves, millimeter wave components will become more apparent. In addition, the breadth of satellite communication applications is also expanding due to the diversified needs of wireless communication. Microwave/millimeter wave components are an indispensable part of satellite ground receiving station modules. Hence, it can be foreseen that in the coming years, with the increase in the construction of 4G/LTE, 5G and satellite communications, the demand for wireless RF components is expected to bring about several years of rapid growth.

#### 2.1.4 Competitive Advantages

#### (1) Proprietary R&D technology, fully autonomous products.

The products we develop and manufacture are all based on our own R&D technology, and can be customized and modified according to customer requirements. Because we fully develop and produce ourselves, our after-sales service can meet customers' requirements for quick responses more effectively.

#### (2) Product stability, high technical entry barrier.

The company combines the R&D and manufacturing technology of telecommunications equipment components with wireless signal technology. The microwave/millimeter wave communication components produced have been certified and continue to cooperate with internationally renowned system manufacturers. We design and manufacture components, and have achieved impressive results in the layout of the LEO satellite market and the

- development of related products, demonstrating product stability and receiving high praise.
- (3) The customer base is broad and has established a brand reputation, which makes it easier to expand new application opportunities.

The importance of communication quality in wireless communication is extremely high, especially with the wide range of applications in the industry. Existing businesses or startups prioritize partners that can keep pace with their product development in order to effectively seize opportunities. The company has cooperated with well-known system companies around the world for many years, and the accumulated reputation has an excellent brand reputation. The demand for satellite communication is also beginning to flourish because low-orbit satellite communication has the advantages of low latency, unaffected by terrain and significantly reduced construction costs. The company has already entered major low-orbit satellite operators, passed certification and has entered mass production. Therefore, in the business opportunity of LEO satellites, there will be concrete growth, which will be one of the important factors for steady growth in performance.

2.1.5 Positive and negative factors for future development and response measures

## 2.2 Main products' important functions and production process

## 2.2.1 Main products's important functions

The group's products include high-frequency passive communication components such as microwaves/millimeter waves and antennas. Market applications include wireless backhaul networks, satellite communications, broadband wireless transmission, and mobile communication base stations. We can quickly provide customized products that meet customer specifications and rapidly move into mass production, offering a variety of customized services.

## 2.2.2 Production process

(1) Microwave passive components

# 2.3 Supply situation of major raw materials

In the local production area, the group has established long-term supply chains with local suppliers. We also promote important supplier audit guidance mechanisms, maintaining close and stable cooperation with suppliers. Under the policy of ensuring easy access to major material sources and maintaining at least two suppliers, we encourage suppliers to cooperate, continually improve quality, and maintain stable and reasonable prices.

## 2.4 List of major customers for procurement / sales

2.4.1 Details of suppliers accounted for more than 10% of total procurement amount in either of the 2 most recent fiscal years

	Unit: In Thousands of NT\$
--	----------------------------

_			
	2021	2022	First quarter of 2023

Item	Name		Percentage of annual net procurement (%)	ationship the issuer	Name		Percentage of annual net procurement (%)	Relationship with the issuer	Name		Percentage of annual net procurement (%)	Relationship with the issuer
1	Supplier A	98,388	10%	None	None			None	Supplier B	19,508	13%	None
2	Other	840,451	90%	None	Other(Note1)	760,878	100%	None	Other	127,815	87%	None
	Net Procurement	938,839	100%	None	Net Procurement	760,878	100%	None	Net Procurement	147,323	100%	None

Supplier A: Agents for the top three Suppliers in 2021. In 2022, due to the delay in Supplier project, the amount of goods purchased decreased.

Supplier B: In 2023, due to the project execution progress, the demand for materials for projects of the subsidiary companies under the group has increased.

Note 1: In 2022, there were no suppliers accounting for more than 10% of the total procurement amount.

# 2.4.2 Details of customers accounted for more than 10% of total sales amount in either of the 2 most recent fiscal years

Unit: In Thousands of NT\$

	2021			2022			First quarter of 2023					
Item	Name	Amount	Percentage of annual net sales (%)	Relationship with the issuer	Item	Amount	Percentage of annual net sales (%)	Relationship with the issuer	Item	Amount	Percentage of annual net sales (%)	Relationship with the issuer
	None				None				Customer A	43,590	10.25	NA
									Other	381,497	89.75	
	Net Sales	1,758,389	100.00		Net Sales	1,837,665	100.00		Net Sales	425,087	100.00	

Reasons for the changes: Customer A increase in the first quarter of 2023. Is that there were project orders in the first quarter, which caused the sales of customer A to increase compared with the same period.

# 2.5 Production in the last two years

Unit: pc; NT\$ thousand

Year		2021		2022

# 4. Information on environmental protection expenditures

In the recent fiscal year and up until the date of printing this annual report, no losses due to environmental pollution were encountered. There is no estimated amount or contingency plan for potential future pollution-related losses, as there are no foreseeable circumstances where it would be possible to make reasonable estimates.

## 5. Employee Relations

- 5.1 Work environment and employee safety
  - 5.1.1 Recognizing the importance of "work environment and employee safety measures", we implement occupational safety and health regulations, regularly identify and analyze safety and risk aspects, establish management plans and improvement targets for significant environmental safety and health matters (lower-risk items are controlled through operational management). Furthermore, thanks to our effective 5S management and implementation within the workplace, significant improvements in environmental safety and health have been achieved.
  - 5.1.2 A safe and healthy working environment is the result of joint efforts between the company and employees. We regularly arrange occupational safety and health courses (for new employees, existing employees, and safety professionals), ensuring all staff receive necessary safety training to enhance safety awareness. This includes part-time students, contractors, and temporary workers. For contractors and suppliers entering the plant area, we provide hazard communication and response strategies. Also, we standardize the safety management of hardware equipment and materials in the plant.
  - 5.1.3 Contracted occupational safety and health medical personnel visit the factory to provide health services and health promotion activities for workers, strengthening the physical and mental health of workplace employees and creating a friendly workplace environment.

## 5.2 Employee welfare initiatives

- 5.2.1 Depending on the operational status and individual performance, the company issues incentive bonuses.
- 5.2.2 The company offers employee bonuses and stock options based on operational status and individual performance.
- 5.2.3 The company has established an employee welfare committee to plan for employee benefits.
- 5.2.4 Annual health checks are carried out, emphasizing employee physical and mental health.
- 5.2.5 The company has set up medical rooms, nursing rooms, table tennis rooms, basketball courts, gyms, etc., to provide a good working environment for employees.
- 5.2.6 The company conducts annual senior and excellent employee commendations, labor-management talks, education and training, and lectures on caring for employees' life and work, etc.
- 5.2.7 The company provides travel subsidies for employees.
- 5.2.8 The company encourages employees to participate in clubs and provides financial assistance, such as yoga clubs, board game clubs, table tennis clubs, basketball clubs, sports health clubs, badminton clubs, etc. Employees regularly participate in club activities, establish good interactions, and form regular exercise habits.

5.3 Education and trainings of employees as below

Course Type	No. of Employees	Total Sessions	Total Training Hours	Total Expense
Department professional training	2066	152	3013	659,020
Management training	2298	208	2451	418,706
New employee training	159	108	1747	342,099
General Education	208	32	341	73,200
Employee Safety and Health	454	59	1205	256,779
Total	5185	559	8757	1,749,804

#### 5.4 Retirement system and its implementation status

- 5.4.1 Pension provision: According to the Labor Standards Act, the company has set up an employee retirement scheme, formed a labor retirement reserve supervision committee, and allocates 2% of the total salary paid each month as a retirement reserve, which is deposited into a special account at Bank of Taiwan in the name of the committee.
- 5.4.2 For 2023, the labor retirement reserve special account has been fully allocated according to the actuarial report by the actuary, and a one-year suspension of allocation was approved from March of 2023.
- 5.5 Labor agreements and maintenance status of various employees' rights and interests
  The company has established relevant measures and regulations for all
  employees in order to let them understand and follow ethical concepts, rights,
  obligations and the codes of conduct. The measures are as follows:
  - 5.5.1 Authority limits: To improve work efficiency and tiered management.
  - 5.5.2 Organizational structure and work content of each department: Clearly define the organizational functions of each department.
  - 5.5.3 Work rules and regulations: Assist all employees in understanding the relevant internal regulations of the company.
  - 5.5.4 Labor-management meetings: Regularly hold labor-management meetings, communicate opinions through meetings, enhance mutual understanding, strengthen labor relations, protect workers' rights, and promote the smooth implementation of various tasks.
  - 5.5.5 Established a problem feedback mailbox, a physical suggestion box, and a company Line@ life circle, providing employees with multi-channel communication and complaint channels, and timely handling.
- 5.6 Explanation for any loss sustained by the Company as a result of labor disputes in recent years and up to the publication of the annual report, and disclose an estimate of losses incurred to date or likely to be incurred in the future, and indicate contingency measures being or to be taken. : None.

## 6. Cyber Security Management

- 6.1 Provides the cyber security risk management framework, Cyber Security Policy, specific management plans and cyber security management resources invested.
  - 6.1.1 Cyber security risk management framework:

The information security team consists of the heads of various departments and

the main network administrators of the IT Division, with the Company's executive vice president as the convener. The members of the team will report and assess improvements on security-related issues and cases during regular meetings, and the convener will hold a special meeting for further discussion whenever it deems necessary.

## 6.1.2 Cyber Security Policy:

The company has set up the "The Regulations and Enforcement Rules of Cyber Security Management Act" to ensure the confidentiality, integrity, and availability of various information assets and is announced to all employees and placed on the company website in order for their strict compliance.

## 6.1.3 Specific Management Strategy:

- (1) Apart from requiring all employees of the company to strictly abide by the "The Regulations and Enforcement Rules of Cyber Security Management Act", the Company has also established a firewall and backup system with the highest standard in the IT industry, with latest antivirus daily updates at the terminal computer, and hence provide full security for the Company's systems and confidential information.
- (2) The correct concept of security is regularly announced to all members of the company, such as not to download or click on unknown files and network links. In addition, relevant cases are occasionally announced at the peak of cyber-attack.
- (3) The network administrator will occasionally participate in external information security seminars to update the latest knowledge on information security.

## 6.1.4 Resources invested for cyber security management:

The Company continues to strengthen its information security system, improving data backup mechanisms, conducting continuous disaster recovery drills, regularly checking whether account permissions are correct, strengthening information security publicity and training of information security personnel, etc. This expects to reduce the probability of information security incidents in the Company, and also enhances the information security awareness and resilience of all staff.

6.2 Losses, possible impacts and countermeasures as a result of major cyber security incidents in the last year up to the publication date of this annual report, state the reasons if losses cannot be reasonably estimated:

No major information security incidents occurred that resulted in business losses in the last year up to the publication date of this annual report.

## 7. Important Contracts

The important contracts of supply/distribution contracts, technical cooperation contracts, engineering/construction contracts, long-term loan contracts, and other contracts that would affect shareholders' equity, where said contracts were either still effective as of the date of publication of the annual report, or expired in the most recent fiscal year: None.

# VI. Financial Information

Analysis of financial ratio differences for the last two years. (Not required if the difference does not exceed 20%)

- 1. Interest protection multiple decreases: This is mainly due to an increase in short-term borrowings and an increase in borrowing rates in 2022, which has increased interest expenses.
- 2. The turnover rate of property, plant, and equipment and the pre-tax net profit to paid-in capital ratio have increased: This is mainly due to an increase in revenue in 2022.
- 3. The cash flow adequacy ratio has decreased: This is mainly due to the decline in the average cash inflow from operating activities over the past five years, which is due to the decrease in the change in accounts receivable.

- 4. The cash reinvestment ratio has decreased: This is due to an increase in cash dividend distribution in 2022.
- 5. Operating leverage decreases: The main reason is due to the increase in sales revenue in 2022 and the relatively small increase in variable costs and expenses, resulting in a larger increase in operating profit.
- Note 1: Financial information for each year is reviewed or audited by CPA.
- Note 2: 2023 Q1 there is no need to prepare Parent Company Only Financial Statements.
- Note 3: The calculation formula for each financial ratio is shown in the following table:

#### 1. Financial structure

- (1) Liability to asset ratio = total liabilities/ total assets.
- (2) Long-term capital accounted for real estate, plant and equipment ratio = (Total equity + Non-current liabilities) / Net of real estate, plant and equipment.

#### 2. Debt-paying ability

- (1) Current ratio = Current asset / Current liabilities.
- (2) Quick ratio = (Current asset Inventory Advance payments) / Current liabilities.
- (3) Times interest earned = Pre-net income of income tax and interest expense / Current interest expenditures.

#### 3. Operational ability

- (1) Turnover of amounts receivable (including the accounts receivable and notes receivable incurred in operation) = net sales/ average balance of the amounts receivables of each period (including the accounts receivable and notes receivable incurred in operation).
- (2) Average cash collection days =365 / Accounts receivable turnover rate.
- (3) Inventory turnover rate = Cost of goods sold / Average inventory amount.
- (4) Turnover of amounts payable (including the accounts payable and notes payable incurred in operation) = sales costs/ average balance of the amounts payable of each period (including the accounts payable and notes payable incurred in operation).
- (5) Average days on goods sold = 365 / Inventory turnover rate.
- (6)Real estate, plant and equipment turnover rate = Net income of goods sold / Average net income of real estate, plant and equipment.
- (7) Total assets turnover rate = Net income of goods sold / Average total assets.

#### 4. Profitability

- (1)Return on assets = [After -tax income (loss) + Interest expense × (1 Tax rate)] / Average total assets.
- (2) Return on equity = After-tax income (loss) / Average total equity.
- (3) Net profit margin = After-tax income (loss) / Net income of goods sold.
- (4)EPS = (After-tax income (loss) attributable to the owner of the parent company Preferred stock dividends) /Weighted average number of outstanding shares. (Note 5)

## 5. Cash Flow

- (1) Cash flow rate = Net cash flow from operating activities / Current liabilities.
- (2) Cash flow adequacy ratio = Net cash flow from operating activities during the most recent 5 years / (Capital spending + Inventory increase amount + Cash dividends) during the most recent 5 years.
- (3) Cash reinvestment ratio = (Net cash flow from operating activities Cash dividends) / (Gross amount of real estate, plant and equipment + Long-term investment + Other non-current liabilities + Operating fund). (Note 6)

#### 6. Leverage:

- (1) Operating leverage = (Net income of operating Change of operating costs and expense) / Operating benefits. (Note 7)
- (2) Financial leverage = Operating benefits / (Operating benefits Interest expense).

Note 4: In measuring the calculation formula for earnings per share, special attention should be

paid to the following matters:

- 1. Use the weighted average number of common shares, not the number of shares issued at the end of the year.
- 2. In case of cash capital increase or treasury stock transactions, consider their circulation period and calculate the weighted average number of shares.
- 3. If there are profit capital increases or capital reserve capital increases, when calculating the earnings per share for previous years and semi-annual periods, adjust retrospectively according to the capital increase ratio, without considering the issuance period of the capital increase.
- 4. If the preferred shares are non-convertible cumulative preferred shares, their annual dividends (whether issued or not) should be deducted from the net profit after tax or added to the net loss after tax. If preferred shares are non-cumulative, dividends should be deducted from net profit after tax if there is net profit after tax; if there is a loss, no adjustment is necessary.

Note 5: In measuring cash flow analysis, special attention should be paid to the following matters:

- 1. Net cash flow from operating activities refers to the net cash inflow from operating activities in the cash flow statement.
- 2. Capital expenditure refers to the cash outflow from capital investment each year.
- 3. An increase in inventory is only accounted for when the balance at the end of the period is greater than the balance at the beginning of the period. If the inventory decreases at the end of the year, it is calculated as zero.
- 4. Cash dividends include cash dividends for common shares and preferred shares.
- 5. The gross amount of property, plant, and equipment refers to the total amount of property, plant, and equipment before deducting accumulated depreciation.
- Note 6: The issuer should distinguish between fixed and variable for various operating costs and operating expenses. If estimation or subjective judgment is involved, its rationality should be noted and consistency maintained.

Note 7: If the company's shares are without a par value or the par value per share is not NT\$ 10, the calculation related to the ratio of the paid-in capital should be changed to the ratio of the equity attributable to the parent company in the balance sheet.

# 2.2 Consolidated Financial Statements- Based on IFRS

	Year	Financial Analysis for the Last Five Years					As of 31st
Item		2018	2019	2020	2021	2022	March 2023
Financial structure (%))	Debt Ratio	19.11	19.31	27.60	32.59	30.84	34.44
	Ratio of long-term capital to property, plant and equipment	275.51	242.75	251.04	270.01	271.90	248.77
	Current ratio	297.87	301.24	223.43	202.20	222.54	192.24

(%)	Interest earned ratio (times)	13,690.91	15,298.64	8,668.26	15,282.58	8985.27	3,796.20
	Accounts receivable turnover (times)	3.94	3.39	3.04	3.24	3.12	3.22
	Average collection period	92.63	107.66	120.06	112.65	116.98	113.27
	Inventory turnover (times)	5.25	4.57	3.65	3.68	3.52	3.94
Operating performance	Accounts payable turnover (times)	6.77	7.03	5.38	4.62	5.3298	7.65
	Average days in sales	69.52	79.86	100.00	99.18	103.69	92.60
	Property, plant and equipment turnover (times)	2.17	1.95	1.54	1.91	2.04	1.87
	Total assets turnover (times)	0.66	0.62	0.48	0.52	0.53	0.50
	Return on total assets (%)	9.93	11.42	5.17	8.46	9.41	7.19
	Return on stockholders' equity (%)	12.86	14.04	6.69	12.05	13.62	10.38
Profitability	Pre-tax income to paid-in capital (%)	58.88	66.42	32.61	55.25	66.94	48.97
	Net profit margin (%)	14.84	18.32	10.54	16.07	17.66	14.05
	Earnings per share (NT\$)	3.76	4.15	2.03	3.81	4.36	0.89
Cash flow	Cash flow ratio (%)	2.71	35.56	34.26	16.81	42.15	14.13
	Cash flow adequacy ratio (%)	96.88	87.50	82.96	72.66	76.14	111.29
	Cash reinvestment ratio (%)	(8.72)	(0.26)	0.05	(1.01)	4.45	6.19
T	Operating leverage	2.27	1.56	2.17	1.88	2.30	2.19
Leverage	Financial leverage	1.01	1.01	1.01	1.01	1.02	1.03

Analysis of financial ratio differences for the last two years:

- 1. Interest protection multiple decreases: This is mainly due to an increase in short-term borrowings and an increase in borrowing rates in 2022, which has increased interest expenses.
- 2. Increase in pre-tax net profit to paid-in capital ratio: Mainly because of an increase in revenue in 2022.
- 3. Increase in cash flow ratio, Increase in cash reinvestment ratio: Primarily due to an decrease in accounts receivable and inventory at the end of 2022, resulting in an increase in cash from operating activities.
- 4. Increase in operating leverage: The primary reason is due to a larger decrease in variable costs and expenses of the subsidiary in 2022.
- Note 1: Financial information for each year is reviewed or audited by CPA.
- Note 2: 2023 Q1 Financial information has been reviewed by a CPA.
- Note 3: The calculation formula of the analysis items is as follows:
  - 1. Financial structure
    - (1) Liability to asset ratio = total liabilities/ total assets.
    - (2) Long-term capital accounted for real estate, plant and equipment ratio = (Total equity + Non-current liabilities) / Net of real estate, plant and equipment.
  - 2. Debt-paying ability
    - (1) Current ratio = Current asset / Current liabilities.
    - (2) Quick ratio = (Current asset Inventory Advance payments) / Current liabilities.
    - (3) Times interest earned = Pre-net income of income tax and interest expense / Current interest expenditures.
    - 2.3 Operational ability
    - (1) Turnover of amounts receivable (including the accounts receivable and notes receivable incurred in operation) = net sales/ average balance of the amounts receivables of each period (including the accounts receivable and notes receivable incurred in operation).
    - (2) Average cash collection days =365 / Accounts receivable turnover rate.
    - (3) Inventory turnover rate = Cost of goods sold / Average inventory amount.
    - (4) Turnover of amounts payable (including the accounts payable and notes payable incurred in operation) = sales costs/ average balance of the amounts payable of each period (including the accounts payable and notes payable incurred in operation).
    - (5) Average days on goods sold = 365 / Inventory turnover rate.
    - (6)Real estate, plant and equipment turnover rate = Net income of goods sold / Average net income of real estate, plant and equipment.
    - (7) Total assets turnover rate = Net income of goods sold / Average total assets.
  - 2.4 Profitability
    - (1) Return on assets = [After -tax income (loss) + Interest expense × (1 Tax rate)] / Average total assets.
    - (2) Return on equity = After-tax income (loss) / Average total equity.
    - (3) Net profit margin = After-tax income (loss) / Net income of goods sold.
    - (4) EPS = (After-tax income (loss) attributable to the owner of the parent company -
    - Preferred stock dividends) / Weighted average number of outstanding shares. (Note 5)
    - 2.5 Cash Flow
    - (1) Cash flow rate = Net cash flow from operating activities / Current liabilities.
    - (2) Cash flow adequacy ratio = Net cash flow from operating activities during the most recent 5 years / (Capital spending + Inventory increase amount + Cash dividends) during the most recent 5 years.
    - (3) Cash reinvestment ratio = (Net cash flow from operating activities Cash dividends) / (Gross amount of real estate, plant and equipment + Long-term investment + Other non-current liabilities + Operating fund). (Note 6)
  - 6. Leverage:
  - (3)Operating leverage = (Net income of operating Change of operating costs and expense) / Operating benefits. (Note 7)
    - (2) Financial leverage = Operating benefits / (Operating benefits Interest expense).
  - Note 4: In measuring the calculation formula for earnings per share, special attention should be

paid to the following matters:

- 1. Use the weighted average number of common shares, not the number of shares issued at the end of the year.
- 2. In case of cash capital increase or treasury stock transactions, consider their circulation period and calculate the weighted average number of shares.
- 3. If there are profit capital increases or capital reserve capital increases, when calculating the earnings per share for previous years and semi-annual periods, adjust retrospectively according to the capital increase ratio, without considering the issuance period of the capital increase.
- 4. If the preferred shares are non-convertible cumulative preferred shares, their annual dividends (whether issued or not) should be deducted from the net profit after tax or added to the net loss after tax. If preferred shares are non-cumulative, dividends should be deducted from net profit after tax if there is net profit after tax; if there is a loss, no adjustment is necessary.

Note 5: In measuring cash flow analysis, special attention should be paid to the following matters:

- 1. Net cash flow from operating activities refers to the net cash inflow from operating activities in the cash flow statement.
- 2. Capital expenditure refers to the cash outflow from capital investment each year.
- 3. An increase in inventory is only accounted for when the balance at the end of the period is greater than the balance at the beginning of the period. If the inventory decreases at the end of the year, it is calculated as zero.
- 4. Cash dividends include cash dividends for common shares and preferred shares.
- 5. The gross amount of property, plant, and equipment refers to the total amount of property, plant, and equipment before deducting accumulated depreciation.
- Note 6: The issuer should distinguish between fixed and variable for various operating costs and operating expenses. If estimation or subjective judgment is involved, its rationality should be noted and consistency maintained.
- Note 7: If the company's shares are without a par value or the par value per share is not NT\$ 10, the calculation related to the ratio of the paid-in capital should be changed to the ratio of the equity attributable to the parent company in the balance sheet.
- 3. Audit committee' report for the most recent fiscal year's financial statements: Please refer to page 310 of the Annual report.
- 4. Consolidated Financial Statements: Please refer to page 138 to 228 of the Annual report.
- 5. Recent parent company only financial statement audited and certified by CPA: Please refer to page 229 to 308 of the Annual report.
- 6. If the company or its affiliates have experienced financial difficulties during the most recent fiscal year or the current fiscal year and up to the date of publication of annual report, the annual report shall explain how said difficulties will affect the company's financial situation: None.

# VII. A Review and Anaysis of the Company's Financial Position and Financial Performance and Risk Management

## 1. Financial Status

1.1 Analysis of Financial Status

T.1 Analysis of Financial C	ratus		Unit: N'	T\$ Thousand
Year	2022	2021	Differ	ence
Item	2022	2021	Amount	%
Current Assets	2,218,955	2,217,369	1,586	0.07%
Cash and cash equivalents	964,178	600,408	363,770	60.59%
Financial assets at amortized cost	144,542	383,519	(238,977)	(62.31%)
Accounts receivable	456,790	586,190	(129,400)	(22.07%)
Other current assets	653,445	647,252	6,193	0.96%

Investments accounted for using equity method	3,755	0	3,755	100%
Property, Plant and Equipment	902,617	901,321	1,296	0.14%
Other non-current assets	325,984	411,613	(85,629)	(20.80%)
Total Assets	3,451,311	3,530,303	(78,992)	(2.24%)
Current Liabilities	997,103	1,096,605	(99,502)	(9.07%)
Short-term borrowings	550,000	520,000	30,000	5.77%
Other current liabilities	447,103	576,605	(129,502)	(22.46%)
Long-term Liabilities	67,180	53,952	13,228	24.52%
Total Liabilities	1,064,283	1,150,557	(86,274)	(7.50%)
Share capital	621,586	621,586	0	0.00%
Capital surplus	820,898	853,780	(32,882)	(3.85%)
Retained Earnings	555,909	482,812	73,097	15.14%
Other Adjustments	(30,214)	33,939	(64,153)	(189.02%)
Non-controlling interest	418,849	387,629	31,220	8.05%
Total Stockholders' Equity	2,387,028	2,379,746	7,282	0.31%

Note: Analysis below comprises items changes amounted to NT\$10 million and change ratios exceed 20%.

- 1.2 Listing the main reasons for any material change in the company's assets, liabilities, or equities during the past two fiscal years, and describe the effects thereof. Where the effects are significant, describe the measures to be taken in response:
  - 1. Cash and cash equivalents: Mainly due to an increase in USD fixed deposits.
  - 2. Financial assets measured at amortized cost: Mainly due to reclassification of fixed deposit accounts with a duration of more than three months.
  - 3. Accounts receivable: Mainly due to payment for telecommunication engineering by customer in 2022.
  - 4. Other non-current assets: Mainly due to valuation losses on financial assets.
  - 5. Other current liabilities: Mainly due to an increase in revenue in 2022, resulting

- in an increase in deferred income tax liabilities.
- 6. Other equity: Due to exchange differences arising from the translation of financial reports of foreign investment entities and financial assets through other comprehensive income.
- 7. Changes in related assets, liabilities, and shareholders' equity had no significant impact on the financial operations of the company.
- 1.3 The effect of future financial status and operation condition: None.
- 1.4 Future response plans: Not applicable.

#### 2. Financial Performance

2.1 Analysis of Financial Performance

Unit: NT\$ Thousands

Year	2022	2021	Difference			
Item	2022	2021	Amount	%		
Net Sales	1,837,665	1,758,389	79,276	4.51%		
Cost of Sales	1,086,769	1,103,073	(16,304)	(1.48%)		
Gross profit	750,896	655,316	95,580	14.59%		
Operating Expenses	458,427	433,963	24,464	5.64%		
Operating Income	292,469	221,353	71,116	32.13%		
Non-operating income and expenses	123,628	122,077	1,551	1.27%		
Income Before Tax	416,097	343,430	72,667	21.16%		
Tax Benefit (Expense)	(91,527)	60,840	(30,687)	(50.44%)		
Net income(loss)	324,570	282,590	41,980	14.86%		
Other comprehensive income (income after tax)	(55,204)	15,260	(70,464)	(461.76%)		
Total comprehensive income	269,366	297,850	(28,484)	(9.56%)		

Note: Analysis below comprises items changes amounted to NT\$10 million and change ratios exceed 20%.

- 2.2 Listing the main reasons for any material change in the company's operating revenues, operating income, or income before tax during the past two fiscal years, and describe the effects thereof. Where the effects are significant, describe the measures to be taken in response:
  - 1. Operating profit, pre-tax net profit of continuing operating segments, income tax expenses: Mainly because of an increase in operating revenue compared to 2021 and a decrease in operating costs in 2022.
  - 2. Other comprehensive income: Mainly due to valuation losses on financial assets and exchange differences arising from translation of foreign operation financial reports.
- 2.3 The expected sales amount and its basis: The company's expected sales volume is based on market demand and trends, customer operational conditions, and considering company capacity planning and business development strategies.
- 2.4 The Company's future financial performance and the plan for any possible impact: None.
- 2.5 Future response plans : Not applicable

#### 3. Cash Flow

## 3.1 Cash Flow Analysis For The Current Year

Year Item	2022	2021	Change in Increase/Decrease (%)
Cash flow ratio (%)	42.15	16.81	151%
Cash flow adequacy ratio (%)	76.14	72.66	5%
Cash reinvestment ratio (%)	4.45	(1.01)	(541%)

# Analysis of changes:

Increase in cash flow ratio, Increase in cash reinvestment ratio: Primarily due to an decrease in accounts receivable and inventory at the end of 2022, resulting in an increase in cash from operating activities.

# 3.2 Remedy For Cash Deficit And Liquidity Analysis

Note: In order to integrate group resources and improve management efficiency, GENTON TECH decided on the dissolution and liquidation of WIRELESS SI CORPORATION in a board meeting on July 6, 2022, and it was dissolved on July 11, 2022.

## 5.3 Investment plans for the coming year

The company's operational outlook is currently optimistic. The main investment plans for the next year, besides gradually increasing purchases of production and R&D equipment, also include planning for gradual capacity expansion in line with market development trends in satellite communication and 5G communication to meet the continuously increasing demand for customer orders.

- 6. Risk analysis and evaluation
  - 6.1 Effects of changes in interest rates, foreign exchange rate and inflation on corporate finance, and future response measures
    - 6.1.1 The impact of interest rate changes and response measures

The company, in stable operation and growth, only requires short-term operational capital to meet the needs of brief financial adjustments. The impact of interest rate changes on the company is minimal. Furthermore, we maintain close relationships with banks and other financial institutions to obtain favorable loan terms, and effectively use various financial tools through sound financial planning to reduce the risk of interest rate changes. In the future, our response strategy to interest rate changes, besides maintaining close contact with financial institutions, includes keeping abreast of current interest rate changes, referring to domestic and international economic trend research reports, and observing fluctuations in domestic and international benchmark market interest rates, and adjusting the use of funds as appropriate.

6.1.2 The impact of exchange rate changes and response measures

The group mainly exports, with the primary quoting currency being the US dollar. Fluctuations in the value of the US dollar can generate foreign exchange gain or loss risk for the company. Therefore, we adopt a phased approach to selling US dollars to reduce the risk of exchange rate fluctuations, and to reduce the impact of exchange rate fluctuations on profits and losses. We maintain close contact with our banks to understand changes in the foreign exchange market. Our business department will adjust its pricing for exports and imports based on exchange rate fluctuations, control foreign currency assets and liabilities at any time, hedge against overall foreign exchange risk, and thus we do not expect significant market risk. We will continue to conduct related foreign exchange hedging transactions in the future to mitigate the effects of exchange rate fluctuations.

6.1.3 The impact of inflation and response measures

The company pays close attention to market price fluctuations and maintains good relationships with customers and suppliers. Profits and losses in recent years have not been significantly affected by inflation. If inflation leads to an increase in the cost of goods, we will appropriately adjust the selling price of products to reduce the impact on profits and losses. We will keep a close eye on cost control and pricing due to changes in the economic climate leading to inflation, adjusting product prices and inventory levels in a timely manner.

- Policies, Main Causes of Gain or Loss and Future Response Measures with Respect to High-Risk, High-Leverage Investment, Loaning or Endorsement Guarantees and Derivatives Transactions
  - 6.2.1 Engaging in high-risk, high-leverage investments

The group's financial operations are based on the principle of stability and conservatism. In recent years, we have not engaged in high-risk, high-leverage investment transactions. Derivative transactions are all intended for hedging purposes.

6.2.2 Lending funds to others and providing endorsement guarantees

In accordance with the relevant provisions of the competent authority and the group's "Regulations Governing Loaning of Funds and Making of Endorsements/Guarantees", the company conduct regular audits and make legal announcements and declarations.

#### 6.2.3 Derivative transactions

In accordance with the relevant provisions of the competent authority and the group's "Procedure for Acquiring or Disposing of Assets", we conduct regular audits and make legal announcements and declarations. The derivative financial transactions conducted by the group are for financial hedging purposes, to avoid the impact of exchange rate fluctuations on assets and liabilities held. The calculation of the fair value is based on the valuation data provided by the bank, and the expected amount that can be obtained or paid if the company terminates the contract on the reporting termination date, including unrealized gains and losses from contracts not yet settled.

## 6.3 Future Research & Development Projects and Corresponding Budget

Unit: NT\$ Thousands

Plan of the resent year	Schedule	Further expenditures	Estimated time of completion	The main factors affecting the success of future R&D
Novel long-haul microwave communication high power sub-system	Design development and purchase of R&D software and hardware.	30,000	End of 2024	<ol> <li>The product has high performance.</li> <li>Mastery of OEM/ODM.</li> <li>Introduction of advanced processing.</li> </ol>
LEO satellite communication system high performance components	Platform design development.	35,000	End of 2024	<ol> <li>The product has high performance.</li> <li>Mastery of special materials.</li> <li>Introduction of advanced processing.</li> </ol>
Terahertz Subsystem Development Plan	Design development and purchase of R&D software and hardware.	70,000	Mid of 2026	<ol> <li>The product has high performance and a competitive pricing strategy.</li> <li>Mastery of OEM/ODM.</li> <li>Introduction of advanced processing.</li> </ol>

6.4 Effect on the Company's financial operations of important policies adopted and changes in the legal environment at home and abroad in recent year and up to the publication of the annual report, and contingency measures to be taken.

In recent years, the group has not been affected by significant domestic and foreign policy and legal changes that would affect the company's financial operations. We always pay attention to important domestic and foreign policy and legal changes, to conduct impact assessments and develop response plans. When necessary, the company will also commission external legal advisors to provide problem consultation and handle relevant legal issues for the company.

6.5 The effects of technological (including cyber security risk management) and industrial changes on financial status and operation of the Company and countermeasures.

The wireless communication industry is divided into systems, subsystems, OEMs, and component suppliers, based on the upstream and downstream relationship. The setting of communication system specifications has always been controlled by a few large system manufacturers. Subsystem manufacturers usually specialize in the microwave frequency band of the communication system. As for international EMS manufacturers such as Flextronics, Benchmark, Jabil, they purely provide system assembly and manufacturing services. In the entire microwave system supply chain, each has its different technical levels and plays different roles. However, the above three types of companies all need to purchase various components from component suppliers due to the needs of the microwave communication system. The group's position is to produce and manufacture the most important communication component suppliers in microwave and RF communication systems, and there are currently no other products that can replace them.

As for the risks faced by information security, they are indeed becoming more diverse. In particular, once the prevention is not careful enough to cause information leakage or system operation stoppage, it will cause great operational problems. Therefore, the company has always been strengthening the IT equipment that protects information security, and regularly publicizes various cases and conducts exercises for recovery plans after risks occur. The purpose is to enhance the awareness and timeliness of all staff and reduce the impact of these risks.

The Impact of Changes in Corporate Image on Corporate Risk Management, and the Company's Response Measures

Since the establishment of the group, we have actively strengthened the company's internal management and improved the quality management capabilities, established the brand image of the group, and hoped to increase customer trust in the company's brand. After the parent company is listed on the counter, the visibility is further improved, and compliance with government regulations and strengthening corporate governance can help eliminate potential risks that the company may face and maintain a good corporate image.

In the recent year, the corporate image of the company has not changed significantly, and there are no reports related to the adverse corporate image in the market.

- 6.7 Expected Benefits and Risks Relating to and Response to Merger and Acquisition Plans: None
- 6.8 Expected Benefits and Risks Relating to and Response to Factory Expansion Plans

The group will continue to expand the production equipment. Since the purchase of this equipment will mainly be planned based on the order situation and customer development progress, it will not cause an increase in operational risks.

6.9 Risks Relating to and Response to Excessive Concentration of Purchasing

Sources and Excessive Customer Concentration

1. Risk associated with purchasing

The main purchases of the group are CNC precision machined metal products. In addition to increasing the self-manufacturing rate, they are distributed among several suppliers, and through the support of suppliers who have developed cooperation tacit understanding for many years, we can reduce the risk of capacity shortage and avoid centralized purchasing.

2. Risk associated with sales

The company continues to dedicate to the development of domestic and foreign customers such as satellites and 5G, the breadth of products continues to expand, the concentration of sales is expected to decrease correspondingly, and the risk of sales concentration is controllable.

6.10 Effects of Risks Relating to and Response to Large Share Transfer or Changes in Shareholdings by Directors, Supervisors, or Shareholders with Shareholding of over 10%.

In the most recent fiscal year and until the date of the annual report printing, the directors, supervisors, or shareholders holding more than 10% of the shares did not have a large amount of stock transfer.

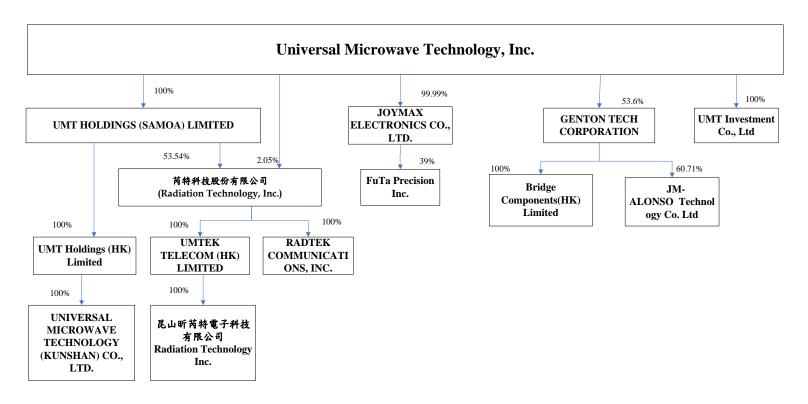

- 6.11 Effects Risks Relating to and Response to Changes in Control over the Company
  - The group has established a professional manager system, and major operational planning is proposed by the company's professional managers after evaluating the industry and the company's overall resources and obtaining approval from the board of directors. The division of responsibilities in each department of the group is clear, and through the implementation of the company's internal control system, coordination and communication between departments, the business strategy is fully implemented, operation efficiency is mastered, and business results are ensured, effectively reducing the impact and risk of changes in managerial rights on group operations.
- 6.12 Litigation or Non-litigation Matters: None
- 6.13 Other important risks and countermeasures being or to be taken: None
- 7. Other important risks and countermeasures being or to be taken: None

#### INDEPENDENT AUDITORS' Audit REPORT

To Universal Microwave Technology, Inc.:

## **Audit opinion**

We have audited the financial statements of Universal Microwave Technology, Inc. and its subsidiaries, which comprise the Consolidated Statement of Financial Position as of December 31, 2022 and December 31, 2021, the Consolidated Statement of Comprehensive Income from January 1 to December 31, 2022 and from January 1 to December 31, 2021, Consolidated Statement of Change in Equity, Consolidated Statement of Cash Flows, and Notes to Consolidated Financial Statement (including a summary of significant accounting policies).

In our opinion, the accompanying consolidated financial statements are properly drawn up in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), International Financial Reporting Interpretations Committee (IFRIC), and Standing Interpretations Committee (SIC) (hereinafter referred to as IFRSs) recognized and announced effectiveness by Financial Supervisory Commission (hereinafter referred to as FSC) so as to give a true and fair view of the consolidated financial position of Universal Microwave Technology, Inc. and its subsidiaries as of December 2022 and 2021 and of the financial performance, changes in equity and cash flows of Universal Microwave Technology, Inc. and its subsidiaries from January 1 to December 31, 2022 and 2021.

## Basis for audit opinion

We conducted our audit in accordance with Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and Generally Accepted Auditing Standards. Our responsibilities under those standards are further described in the 'Accountant's responsibilities for the audit of the financial statements' section of our report. We are independent of Universal Microwave Technology, Inc. and its subsidiaries in accordance with the Accounting and Corporate Regulatory Authority Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Key audit matter

The key audit matter is which that, in our professional judgment, is most significant to our review of the Consolidated Financial Statements of Universal Microwave Technology, Inc. and

its subsidiaries for 2022. Such matter has been considered in the process of examining the consolidated financial statements taken as a whole and forming an opinion thereon, and we do not express an opinion on the matter individually.

The following is the description of the key audit matter in the Consolidated Financial Statements of Universal Microwave Technology, Inc. and its subsidiaries for 2022:

#### Authenticity of sales revenue from specific customers

In the 2022 sales revenue of Universal Microwave Technology and its subsidiaries, the growth rate of sales revenue from specific customers was significantly higher than the overall growth rate compared to the same period last year. The transaction amount of these customers is significant to the overall sales revenue. Therefore, the authenticity of sales revenue from specific customers is considered a key audit matter for 2022.

For accounting policies related to sales revenue recognition and relevant disclosure information, please refer to Note 4 of the consolidated financial statements.

The auditors have carried out the following main audit procedures on the authenticity of sales revenue from the specific customers mentioned above:

- 1. Understand and sample test the design and effectiveness of the main internal control systems related to the authenticity of sales transaction revenue recognition.
- 2. For specific customers, review original orders, shipping documents, and invoices, verify whether the relevant transaction forms are complete, and check whether the company's entries and receipts are consistent with the forms in terms of counterparties and amounts.
- 3. Review the occurrence of sales returns and allowances for specific customers in the subsequent period and confirm whether there are any abnormal situations in the year-end accounts receivable by sending a confirmation letter.

#### Other matters

Universal Microwave Technology, Inc. has prepared its Parent Company Only Financial Statements for the years ended December 31, 2022 and 2021, and we have provided our unqualified opinion on those statements for reference.

### Responsibilities of management and governing body for the consolidated financial statements

Management's responsibility is to prepare the consolidated financial statements present fairly, in all material respects, according to Regulations Governing the Preparation of Financial Reports by Securities Issuers as well as the International Financial Reporting Standards, International Accounting Standards, Interpretation, and Interpretation Announcement recognized and announced the effectiveness by Financial Supervisory Commission as well as maintain necessary internal control related to the preparation of the consolidated financial statements in order to ensure there is no major untrue expression on the financial statements due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the ability of Universal Microwave Technology, Inc. and its subsidiaries to continue as going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Universal Microwave Technology, Inc. and its subsidiaries or to cease operations, or has no realistic alternative, but to do so.

The responsibilities of the governing body (including the audit committee) include overseeing the financial reporting process of Universal Microwave Technology, Inc. and its subsidiaries.

#### Auditors' responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken in the basis of these consolidated financial statements.

As part of an audit in accordance with GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for audit opinions. Because fraud may be related to conspiracy, forgery, deliberate omission, false statement or breach of internal control, the risk of a material misstatement caused by fraud which is not identified is higher than the risk of a material misstatement caused by any error.
- 2. Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the internal control effectiveness of Universal Microwave Technology, Inc. and its subsidiaries.
- 3. Assess the appropriateness of management's use of accounting policies and the reasonability of the accounting estimate and relevant disclosure.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of Universal Microwave Technology, Inc. and its subsidiaries to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or

conditions may cause Universal Microwave Technology, Inc. and its subsidiaries to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the consolidated financial statements (including the relevant notes), and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

6. We have obtained sufficient and appropriate evidence to audit the consolidated financial information of Universal Microwave Technology, Inc. and its subsidiaries to express an opinion on the Consolidated Financial Statements. We are responsible for the guidance, supervision and execution of the audit and for forming an audit opinion on Universal Microwave Technology, Inc. and its subsidiaries.

We communicate with the governing body regarding, among other matters, the planned scope and timing of the audit and significant audit findings (including any significant deficiency in internal controls that we identify during our audit).

We have also provided the governing body with a statement that the independence-regulated personnel of the firm to which we are affiliated have complied with the Code of Ethics for Professional Accountants with respect to independence, and communicate with the governing body about all relationships and other matters (including related protective measures) that may be considered to affect the accountant's independence.

We have determined the key audit matter for the audit of the Consolidated Financial Statements of Universal Microwave Technology, Inc. and its subsidiaries for the year ended December 31, 2022 from the communications we have had with the governing body. We identified such matter in our auditor's report, except for those matters that are not permitted by law to be disclosed publicly or, in the rarest of circumstances, we decided not to communicate those matters in our auditor's report because we reasonably could expect the negative effect of such communication to outweigh the public interest.

### UNIVERSAL MICROWAVE TECHNOLOGY, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### FOR THE TWELVE MONTHS ENDED DECEMBER 31, 2022 AND 2021

(In thousands of New Taiwan dollars, unless stated otherwise)

#### 1. GENERAL INFORMATION

Universal Microwave Technology, Inc. (hereinafter referred to as the "Company") prepared its establishment on August 23, 1999 and the establishment was approved on September 7, 1999. The business scope of the company are the manufacturing of electronic components and the wholesale of electronic materials.

The company's shares have been traded on the Taiwan Stock Exchange's over-the-counter market since January 3, 2008.

The consolidated financial statements are presented in the Company's functional currency, the New Taiwan dollar.

#### 2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were approved by the board of directors on March 29, 2023.

### 3. <u>APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS</u>

i. The initial application of the Financial Supervisory Commission (hereinafter referred to as the "FSC") approved and effective International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations (IFRIC) and Interpretation Bulletins (SIC) (hereinafter referred to as "IFRSs").

Applying the amended FSC-approved and effective IFRSs will not result in significant changes to the consolidated company's accounting policies.

#### ii. The IFRSs endorsed by the FSC for application starting from 2023

New IFRSs	Effective Date Announced by IASB
Amendments to IAS 1 - "Disclosure of Material	January 1, 2023 (Note 1)
Accounting Policy Information"	
Amendments to IAS 8 - "Definition of Accounting	January 1, 2023 (Note 2)
Estimates"	
Amendments to IAS 12 - "Deferred Tax related to	January 1, 2023 (Note 3)
Assets and Liabilities arising from a Single	
Transaction"	

- Note 1: This revision applies to reporting periods beginning on or after January 1, 2023.
- Note 2: This revision applies to accounting estimate changes and accounting policy changes occurring during reporting periods beginning on or after January 1, 2023.
- Note 3: Except for the temporary differences related to deferred income taxes recognized for lease and decommissioning obligations as of January 1, 2022, this revision applies to transactions occurring on or after January 1, 2022.

As of the date of issuance of this consolidated financial report, the Company has evaluated other revised criteria and interpretations and concluded that they will not have a significant impact on its financial condition and financial performance.

#### iii. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

New IFRSs	Effective Date Announced by IASB (Note 1)
Amendments to IFRS 10 and IAS 28 - "Sale or	To be determined
Contribution of Assets between an Investor and its	
Associate or Joint Venture"	
Amendments to IFRS 16 - "Lease Liability in a Sale	January 1, 2024 (Note 2)
and Leaseback"	
IFRS 17 "Insurance Contracts"	January 1, 2023
Amendments to IFRS 17	January 1, 2023
Amendments to IFRS 17 - "Initial Application of	January 1, 2023
IFRS 17 and IFRS 9 — Comparative Information"	
Amendments to IAS 1 - "Classification of Liabilities	January 1, 2024
as Current or Non-current"	
Amendments to IAS 1 - "Non-current Liabilities with	January 1, 2024
Covenants"	

- Note 1: Unless otherwise stated, the above new/amended/revised standards or interpretations are effective for annual reporting periods beginning after the respective dates.
- Note 2: The seller and lessee should retrospectively apply the amendments to IFRS 16 to sale and leaseback transactions entered into after the initial application of IFRS 16.

As of the date of adoption of this consolidated financial statements, the Consolidated Company is still evaluating the impact of the amendments to other standards and interpretations on the financial position and financial performance, which will be disclosed when the evaluation is completed.

#### 4. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u>

i. Statement of Compliance

The consolidated financial statements have been prepared in accordance with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and the IFRSs approved and issued by the FSC.

#### ii. Basis of Preparation

Except for financial instruments measured at fair value and net defined benefit assets recognized by deducting the fair value of plan assets from the present value of defined benefit obligations, this consolidated financial report is prepared on a historical cost basis.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 2. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3. Level 3 inputs are unobservable inputs for the asset or liability.
- iii. Standard in determining whether the asset or liability are current or non-current Current assets include:
  - 1. Assets held mainly for transaction purposes;
  - 2. Assets expected to be realized within 12 months of after the balance sheet date; and
  - 3. Cash and cash equivalents (but not including cash used to exchange or clear liability within 12 months of the asset balance sheet).

#### Current liabilities include:

- 1. liabilities held mainly for transaction purposes;
- 2. liabilities due for payment within 12 months after the balance sheet date; and
- 3. the business entity does not have an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

Assets or liabilities not classified within the above definitions will be classified as non-current assets and liabilities.

#### iv. Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and the entities controlled by the Company (i.e. its subsidiaries), and the consolidated statement of comprehensive income includes the operating income or loss of the acquired or disposed subsidiaries for the period from the date of acquisition or up to the date of disposal. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Company. All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation. The total comprehensive income of the subsidiaries is attributed to the owners of the Company and non-controlling interests, even if non-controlling interests become a loss balance as a result.

When the change in the ownership interest of the Consolidated Company in a subsidiary does not result in a loss of control, it is treated as an equity transaction. The difference between the adjusted amount of the non-controlling interests and the fair value of the consideration paid or received is recognized directly in equity. The difference between the adjusted amount of non-controlling interests and the fair value of the consideration paid or received is recognized directly in equity and vested in the owners of the Company.

See Note 12 and Tables 6 and 7 for the detailed information of subsidiaries (including the percentages of ownership and main businesses).

#### v. Foreign currency

When preparing financial statements, each entity translates transactions in currencies other than the functional currency of the entity (foreign currencies) into the functional currency at the exchange rates prevailing on the transaction dates.

Monetary items denominated in foreign currencies are translated at the closing rate at each balance sheet date. Exchange differences arising from the settlement of monetary items or the translation of monetary items are recognized in profit or loss in the period in which they occur.

Non-monetary items measured at fair value in foreign currencies are translated at the exchange rates prevailing on the date when the fair value was determined, and the resulting exchange differences are recognized in profit or loss in the current period. However, if the change in fair value is recognized in other comprehensive income, the resulting exchange differences are recorded as other comprehensive income.

Non-monetary items denominated in foreign currencies that are measured at historical cost are translated at the exchange rates ruling at the dates of transactions and are not retranslated.

For the purpose of preparing consolidated financial statements, assets and liabilities of foreign operations (including subsidiaries that operate in countries or currencies different from those of the Company) are translated into New Taiwan Dollars at the exchange rates prevailing on each balance sheet date. Income and expense items are translated at the average exchange rate for the period and the resulting exchange differences are included in other comprehensive income (and are separately attributed to the Company's owners and non-controlling interests).

If the consolidated company disposes of its entire ownership interest in a foreign operation or disposes of a partial interest in a subsidiary of a foreign operation but loses control, or disposes of its interest in an associate of a foreign operation and the retained interest is a financial asset accounted for under the accounting policy for financial instruments, all cumulative exchange differences related to the foreign operation are reclassified to profit or loss.

If the partial disposal of a subsidiary of a foreign operation does not result in a loss of control, the cumulative exchange differences are proportionately reallocated to the non-controlling interests of the subsidiary and are not recognized in profit or loss. In any other case of partial disposal of a foreign operation, the cumulative exchange differences are reclassified to profit or loss according to the disposal ratio.

#### vi. Inventory

Inventories include raw materials, work in process and finished goods. Inventories are measured at the lower of cost or net realizable value. Comparisons between cost and net realizable value are made on an item-by-item basis, except for inventories of the same type. Net realizable value is the estimated selling price under normal circumstances, less estimated costs to complete and estimated costs to sell. The cost of inventories is calculated using the weighted-average method.

#### vii. Investment in Associates

Associates are entities over which the consolidated company has significant influence but not control, and which are neither subsidiaries nor joint ventures.

The consolidated company accounts for investments in associates using the equity method.

Under the equity method, the investment in an associate is initially recognized at cost, and the carrying amount is subsequently increased or decreased to recognize the consolidated company's share of the associate's profit or loss, other comprehensive income, and distributions. In addition, changes in the consolidated company's share of the associate's equity are recognized proportionally based on the ownership interest.

The excess of acquisition cost over the consolidated company's share of the fair value of the associate's identifiable assets and liabilities at the acquisition date is recognized as goodwill, which is included in the carrying amount of the investment and is not subject to amortization. If the consolidated company's share of the fair value of the associate's identifiable assets and liabilities at the acquisition date exceeds the acquisition cost, the excess is recognized in profit or loss for the period. When an associate issues new shares and the consolidated company does not subscribe according to its shareholding ratio, causing a change in the shareholding ratio and a subsequent increase or decrease in the net equity value of the investment, the increase or decrease is adjusted in the capital surplus - changes in the net equity value of associates recognized under the equity method and the investment accounted for using the equity method. However, if the consolidated company does not subscribe or acquire shares in proportion, resulting in a decrease in the ownership interest in the associate, the amounts recognized in other comprehensive income relating to the associate are reclassified according to the reduction ratio, and the accounting treatment is based on the same basis as if the associate had directly disposed of the related assets or liabilities. If the adjustment should be debited to capital surplus and the capital surplus balance generated by the investment accounted for using the equity method is insufficient, the difference is debited to retained earnings.

When the consolidated company assesses impairment, it considers the entire carrying amount of the investment (including goodwill) as a single asset and compares the recoverable amount with the carrying amount to perform an impairment test. The recognized impairment loss is not allocated to any assets that constitute the carrying amount of the investment, including goodwill. Any reversal of an impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

The consolidated company ceases to apply the equity method from the date its investment is no longer considered an associate. The retained interest in the former associate is measured at fair value, and the difference between the fair value and the disposal proceeds and the carrying amount of the investment at the date of ceasing to apply the equity method is recognized in profit or loss for the period. In addition, the amounts recognized in other comprehensive income relating to the associate are accounted for on the same basis as if the associate had directly disposed of the related assets or liabilities.

Gains and losses arising from upstream, downstream, and lateral transactions between the consolidated company and its associates are recognized in the consolidated financial statements only to the extent that they are unrelated to the consolidated company's interest in the associates.

#### viii. Property, plant and equipment

Property, plant, and equipment are recognized by cost, and then measured by cost less accumulated depreciation and accumulated impairment loss.

Self-owned land is not depreciated. Property, plant and equipment are depreciated separately over their useful lives on a straight-line basis for each significant component. The Consolidated Company reviews the estimated useful lives, residual values and depreciation methods at least at the end of each year and defers the effect of changes in applicable accounting estimates.

The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss for the current period when property, plant, and equipment are derecognized.

#### ix. Goodwill

Goodwill acquired in a business combination is initially recognized at its amount on the acquisition date as cost, and subsequently measured at cost less accumulated impairment losses.

For impairment testing purposes, goodwill is allocated to the cash-generating units or groups of cash-generating units (referred to as "cash-generating units") of the consolidated company that are expected to benefit from the synergies of the combination.

The cash-generating units to which goodwill is allocated are tested for impairment annually (and when there is an indication that the unit may be impaired) by comparing the carrying amount of the unit, including goodwill, with its recoverable

amount. If the goodwill allocated to a cash-generating unit is acquired in the current year's business combination, the unit should be tested for impairment before the end of the current year. If the recoverable amount of a cash-generating unit to which goodwill is allocated is less than its carrying amount, the impairment loss is first reduced by the carrying amount of the allocated goodwill of the cash-generating unit and then proportionately reduced by the carrying amounts of the other assets within the unit. Any impairment loss is recognized directly as a current loss. Goodwill impairment losses may not be reversed in subsequent periods.

When disposing of an operation within a cash-generating unit to which goodwill is allocated, the amount of goodwill associated with the disposed operation is included in the carrying amount of the operation to determine the gain or loss on disposal.

#### x. Intangible assets

#### 1. Separately acquired

Intangible assets with limited duration acquired separately were initially measured at cost and subsequently at cost less accumulated amortization and accumulated impairment losses. Intangible assets are amortized over their useful lives on a straight-line basis and the estimated useful lives, residual values and amortization method are reviewed at least at each year-end and the effect of changes in applicable accounting estimates is deferred. Intangible assets with indefinite useful lives are stated at cost less accumulated impairment losses.

#### 2. Derecognition

The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss of the year when intangible assets are derecognized.

xi. Impairment of property, plant and equipment, right-of-use assets and intangible assets (excluding goodwill)

At each balance sheet date, the Consolidated Company assesses whether there is any indication that property, plant and equipment, right-of-use assets and intangible assets (excluding goodwill) may be impaired. If there is any indication of impairment, the recoverable amount of the asset is estimated, and if the recoverable amount of an individual asset cannot be estimated, the Consolidated Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

The recoverable amount is the higher fair value less selling cost and use value. If the recoverable amount of an individual asset or cash generating unit is less than its carrying amount, the carrying amount of the asset or cash generating unit shall be reduced to its recoverable amount, with the impairment loss recognized in profit or loss.

When the following recoverable amount increases, the carrying amount of the asset or cash generating unit increases to the amount that can be recovered after the revision. However, the increased carrying amount shall not exceed that (minus amortization or depreciation) determined by the asset or cash generating unit where the impairment loss was not recognized in the previous year. The reversal of impairment loss is recognized in profit or loss.

#### xii. Financial instruments

Financial assets and financial liabilities are recognized in the Consolidated Statement of Financial Position when the Consolidated Company becomes a party to the contractual provisions of the instrument.

On initial recognition, financial assets and financial liabilities that are not measured at fair value through profit or loss are measured at fair value plus transaction costs that are directly attributable to the acquisition or issuance of the financial assets or financial liabilities. Transaction costs directly attributable to the acquisition or issue of financial assets or financial liabilities measured at fair value through profit or loss are recognized immediately in profit or loss.

#### 1. Financial assets

The transaction practice of the financial assets adopts accounting recognition and de-recognition on the transaction day.

#### (1) Measurement types

The types of financial assets held by the Consolidated Company are financial assets at fair value through profit or loss, financial assets at amortized cost, and investments in equity instruments at fair value through other comprehensive income.

#### A. Financial assets measured at FVTPL

Financial assets measured at FVTPL includes financial assets mandatorily measured at FVTPL. Financial assets mandatorily measured at FVTPL include investments in equity instruments not designated as measured at FVTOCI, and investments in debt

instruments that do not qualify for classification as measured at amortized cost or measured at FVTOCI.

Financial assets at FVTPL are measured at fair value, with dividends recognized in other income, and gains or losses from re-measurement recognized in other gains and losses. For the determination of fair value, please refer to Note 31.

#### B. Financial assets at amortized cost

The Consolidated Company's investments in financial assets are classified as financial assets measured at amortized cost if both of the following conditions are met:

- a. they are held within an operating model whose objective is to hold the financial assets to collect the contractual cash flows; and
- b. the contractual terms give rise to cash flows at a specific date, which are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at amortized cost (including cash and cash equivalents, accounts receivable measured at amortized cost and refundable deposits) are measured at amortized cost using the effective interest method to determine the total carrying amount less any impairment loss after initial recognition, with any foreign currency exchange gain or loss recognized in profit or loss.

Interest income is calculated by multiplying the effective interest rate by the total carrying amount of the financial assets, except in the following two cases:

- a. Interest income on credit-impaired financial assets acquired or created is calculated by multiplying the credit-adjusted effective interest rate by the amortized cost of the financial assets.
- b. Interest income on credit-impaired financial assets that are not acquired or originated but subsequently become credit-impaired is computed using the effective interest rate multiplied by the amortized cost of the financial assets from the next reporting period after the impairment.

Cash equivalents include time deposits that are highly liquid, readily convertible into known amounts of cash and subject to a low risk of changes in value within 3 months from the date of acquisition and are used to meet short-term cash commitments.

#### C. Investment in equity instruments measured at FVTOCI

At initial recognition, the Consolidated Company has an irrevocable option to designate investments in equity instruments that are not held for trading and for which there is contingent consideration recognized by the acquirer of the business combination to be measured at FVTOCI.

Investments in equity instruments measured at FVTOCI are measured at fair value, with subsequent changes in fair value reported in other comprehensive income and accumulated in other equity. On disposal of investments, the cumulative gain or loss is transferred directly to retained earnings and is not reclassified to profit or loss.

Dividends on investments in equity instruments measured at FVTOCI are recognized in profit or loss when the right to receive payments from the Consolidated Company is established, unless it is clear that the dividend represents a partial recovery of the cost of the investment.

#### (2) Impairment of financial assets

The Consolidated Company assesses impairment losses on financial assets measured at amortized cost (including accounts receivable) at each balance sheet date based on expected credit losses.

Accounts receivable are recognized as an allowance for loss based on expected credit losses during the period of duration. Other financial assets are first evaluated to determine whether there is a significant increase in credit risk since initial recognition. If not, they are recognized as an allowance for loss based on expected credit losses over 12 months, and if so, based on expected credit losses over the duration period.

Expected credit losses represent the weighted-average credit losses based on the risk of default. 12-month expected credit losses represent the expected credit losses arising from possible defaults of financial instruments within 12 months after the reporting date. The 12-month expected credit losses represent the expected credit losses arising from all

possible defaults of the financial instruments during the 12-month period after the reporting date.

For internal credit risk management purposes, the Consolidated Company determines that a financial asset is in default if there is internal or external information indicating that it is no longer probable that the debtor will settle the obligation without considering the collateral held.

The carrying amount of all financial assets is reduced through an allowance account, except for the allowance for losses on investments in debt instruments measured at fair value through other comprehensive income, which is recognized in other comprehensive income and the carrying amount is not reduced.

#### (3) Derecognition of financial assets

The Consolidated Company derecognizes financial assets only when the contractual rights to the cash flows from the financial assets have lapsed or when the financial assets have been transferred and substantially all the risks and rewards of ownership of the assets have been transferred to other enterprises.

When financial assets are derecognized in their entirety at amortized cost, the difference between the carrying amount and the consideration received is recognized in profit or loss. When investments in equity instruments measured at fair value through other comprehensive income are derecognized as a whole, the cumulative gain or loss is transferred directly to retained earnings and is not reclassified to profit or loss.

#### 2. Equity instruments

Debts and equity instruments issued by the Consolidated Company are classified as financial liabilities or equity based on the substance of the contractual agreements and the definitions of financial liabilities and equity instruments.

Equity instruments issued by the Consolidated Company are recognized at the amount of the acquisition price less direct issuance costs.

#### 3. Financial liability

#### (1) Subsequent measurement

The financial liabilities of the Consolidated Company are measured at amortized cost using the effective interest method.

#### (2) Derecognition of financial liability

Any difference between the carrying amount of a financial liability at the time of derecognition and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

#### xiii. Provision for liabilities

The amount recognized as provision for liabilities is the best estimate of the expenditure required to settle the obligation at the balance sheet date, taking into account the risk and uncertainty of the obligation. Provision for liabilities is measured at the discounted value of the estimated cash flows from the settlement of the obligation.

#### Warranty

The warranty obligation to conform to the specifications of the agreement is based on management's best estimate of the expenses required to settle the Consolidated Company's obligations and is recognized as revenue from the related merchandise.

#### xiv. Income recognition

The Consolidated Company allocates the transaction price to each performance obligation after the performance obligation is identified in the customer contract and recognizes revenue when each performance obligation is satisfied.

#### 1. Merchandise sales revenue

Revenue from sales of goods comes from the sales of communication components and materials. As the communication components and materials products are delivered to the designated location and satisfy the performance obligations, customers have the right to use the goods at a fixed price and bear the primary responsibility for reselling them, as well as taking on the risk of obsolescence. The consolidated company recognizes revenue and accounts receivable at this point. Advance payments for product sales are recognized as contract liabilities.

Upon processing with materials supplied, control of the processed products is not transferred, therefore, no revenue is recognized upon materials supplied.

#### 2. Service revenue

Service revenue comes from product tuning, processing, and maintenance services.

As the consolidated company provides product tuning, processing, and maintenance services, customers simultaneously obtain and consume the performance benefits, and the related revenue is recognized when the services are provided.

#### xv. Lease

The Consolidated Company assesses whether a contract is (or contains) a lease at the contract inception date.

#### 1. The Consolidated Company as lessor

If the lease clauses transfer nearly all risks and compensation associated with the assets to the lessee, the lease shall be classified as finance lease. All other leases shall be classified as business lease.

Under operating leases, lease payments, net of lease incentives, are recognized as income on a straight-line basis over the term of the relevant lease. The original direct cost incurred in acquiring an operating lease is added to the carrying amount of the subject asset and recognized as an expense on a straight-line basis over the lease term.

#### 2. The Consolidated Company as lessee

Right-of-use assets and lease liabilities are recognized at the inception date of the lease, except for leases of low-value subject assets to which a recognition exemption applies and short-term leases where lease payments are recognized as an expense on a straight-line basis over the lease term.

Right-of-use assets are measured initially at cost (comprising the original measurement of the lease liability, lease payments made prior to the commencement date of the lease less lease incentives received, original direct cost and estimated cost to reinstate the subject asset) and subsequently at cost less accumulated depreciation and accumulated impairment losses, with adjustments for remeasurement of the lease liability. Right-of-use assets are presented separately on Consolidated Statement of Financial Position.

Right-of-use assets are depreciated on a straight-line basis from the commencement date of the lease to the earlier of the end of the useful life or the end of the lease term.

Lease obligations are measured initially at the present value of the lease payments (including fixed benefits received). If the implied interest rate of the lease is readily determinable, the lease payments are discounted using that rate. If the rate is not readily determinable, the lessee's incremental borrowing rate is used.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, and interest expense is amortized over the lease term. Revenue from sales of goods comes from the sales of communication components and materials. As the communication components and materials products are delivered to the designated location and satisfy the performance obligations, customers have the right to use the goods at a fixed price and bear the primary responsibility for reselling them, as well as taking on the risk of obsolescence. The consolidated company recognizes revenue and accounts receivable at this point. Advance payments for product sales are recognized as contract liabilities.

#### xvi. Borrowing costs

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

#### xvii. Government grants

Government grants are recognized only when there is reasonable assurance that the consolidated company will comply with the conditions attached to the grants and that the grants will be received.

Government grants related to income are recognized in profit or loss on a systematic basis over the periods in which the consolidated company recognizes the related costs as expenses.

If government grants are used to compensate for expenses or losses already incurred or are intended to provide immediate financial support to the consolidated company with no future related costs, they are recognized in profit or loss during the period when they become receivable.

#### xviii. Employee benefits

#### 1. Short-term employee benefits

The liability related to short-term employee benefits is measured as the non-discounted amount expected to be paid in exchange for employee services.

#### 2. Post-employment benefits

Defined benefit pension plans are recognized as expenses over the period of service of the employees.

The defined benefit cost (including service cost, net interest, and remeasurement) of defined benefit pension plans is calculated using the projected unit credit method. Service cost (including current service cost) and

net interest on the net defined benefit liability (asset) are recognized as employee benefit expenses when incurred. Remeasurement (including actuarial gains and losses and the return on plan assets, net of interest) is recognized in other comprehensive income and retained earnings when incurred, and is not reclassified to profit or loss in subsequent periods.

The net defined benefit liability (asset) is the underfunding (surplus) of the defined benefit pension plan. A net defined benefit asset shall not exceed the present value of any refunds from the plan or reductions in future contributions to the plan.

#### xix. Share-based payment arrangements

1. Employee stock options granted to employees

Employee stock options are recognized as expenses on a straight-line basis over the vesting period based on the fair value of the equity instruments at the grant date and the best estimate of the number of equity instruments expected to vest. The corresponding adjustment is made to capital surplus - employee stock options. If the options vest immediately at the grant date, the full amount is recognized as an expense. The grant date for the company's cash capital increase reserved for employee subscription is the date when the number of shares subscribed by employees is confirmed.

At each balance sheet date, the consolidated company revises its estimate of the number of employee stock options expected to vest. If there are any revisions to the original estimate, the impact is recognized in profit or loss, so that the cumulative expense reflects the revised estimate, and a corresponding adjustment is made to the capital surplus - employee stock options.

Equity-settled share-based payment arrangements granted to subsidiaries' employees

When the company grants employee stock options to subsidiaries' employees with the company's equity instruments as the settlement, it is considered a capital contribution to the subsidiary, and is measured at the fair value of the equity instruments on the grant date. The increase in the carrying amount of the investment in the subsidiary is recognized over the vesting period, with a corresponding adjustment to the capital surplus - employee stock options.

#### xx. Income tax

Income tax expense is the sum of current income taxes and deferred income taxes.

#### 1. Current income tax

The Consolidated Company determines the current income (loss) in accordance with the regulations of each jurisdiction in which it files income tax returns and calculates the income tax payable (recoverable) accordingly.

The income tax on undistributed earnings under the Income Tax Act of the ROC is recognized in the year of the resolution of the shareholders' meeting.

The adjustment of income tax payable in the previous year shall be included in the current income tax.

#### 2. Deferred income tax

Deferred income tax is calculated based on the temporary differences between the carrying amount of assets and liabilities on the books and the basis for the calculation of taxable income.

Deferred tax liabilities are generally recognized for all taxable temporary differences, while deferred tax assets are recognized when it is probable that there will be taxable income available to offset the deductible temporary differences and carryforward losses generated by income tax credits.

Deferred income tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, except where the Consolidated Company can control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax assets are recognized for deductible temporary differences associated with such investments only to the extent that it is probable that sufficient taxable income will be available to allow the temporary differences to be realized and the temporary differences are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced for those where it is no longer probable that there will be sufficient taxable income to allow all or part of the assets to be recovered. Deferred tax assets not previously recognized as such are also reviewed at each balance sheet date and the carrying amount is increased for those where it is probable that taxable income will be available to recover all or part of the assets.

Deferred tax assets and liabilities are measured by the tax rate of the expected liabilities settlement or assets realization in the current period, according to the tax rate and the tax law which have been legalized or substantively legalized on the balance sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences of the way in which the Consolidated Company is expected to recover or pay off the carrying amount of its assets and liabilities on the balance sheet date.

#### 3. Current and deferred tax

The current and deferred tax are recognized in profit or loss, provided that the current and deferred tax in relation to the items recognized in other comprehensive income or directly included in equity are recognized in other comprehensive income or directly included in equity, respectively.

If the current income tax or deferred income tax arises from a business combination, the tax effects are included in the accounting treatment of the business combination.

### 5. <u>CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION</u> UNCERTAINTY

When the Consolidated Company adopts an accounting policy, management must make relevant judgments, estimates, and assumptions of relevant information that is difficult to obtain from other sources based on historical experience and other relevant factors.

The consolidated company takes into account the recent developments of the COVID-19 pandemic and its potential impact on the economic environment when considering significant accounting estimates related to cash flow projections, growth rates, discount rates, and profitability. The management will review the estimates and underlying assumptions on an ongoing basis. If an amendment to an estimate affects only the current period, the amendment is recognized in the period in which it is made. If an amendment to an accounting estimate affects both the current and future periods, the amendment is recognized in both the current and future periods.

#### Key sources of estimation and assumption uncertainty

#### i. Estimated impairment of accounts receivable

The estimated impairment of accounts receivable is based on the consolidated company's assumptions about the probability of default and loss rates upon default. The consolidated company considers historical experience, current market conditions,

and forward-looking information when making assumptions and selecting input values for impairment assessments.

#### ii. Estimation of goodwill impairment

When determining whether goodwill is impaired, goodwill acquired on the acquisition date is allocated to the cash-generating units of the company expected to benefit from the synergies of the combination, and the recoverable amount of the allocated goodwill cash-generating units is estimated. To calculate the recoverable amount, management should estimate the future cash flows expected to be generated from the allocated goodwill cash-generating units and determine the appropriate discount rate used to calculate the present value. If actual cash flows are less than expected or if facts and circumstances change, leading to downward revisions of future cash flows or upward revisions of discount rates, significant impairment losses may arise.

#### 6. <u>CASH AND CASH EQUIVALENTS</u>

	December 31, 2022	December 31, 2021

	<u>\$ 125,479</u>	<u>\$ 230,034</u>

The consolidated company invests in the common shares of the aforementioned companies for medium to long-term strategic purposes and expects to profit from long-term investments. The management of the consolidated company believes that recognizing short-term fair value fluctuations of these investments in profit or loss would be inconsistent with the aforementioned long-term investment plan; therefore, it has chosen to designate these investments as measured at fair value through other comprehensive income (FVTOCI).

TOP TAIWAN VIII VENTURE CAPITAL CO., LTD. returned capital of 2,288 thousand and 1,300 thousand in year 2022 and 2021, respectively.

The consolidated company sold 152 thousand shares of PCL Technologies Inc. in 2022 and 60 thousand shares of ELITE MATERIAL CO., LTD. in 2021, and the related other equity - Financial assets at FVTOCI unrealized losses of 1,302 thousand and gains of 115 thousand were transferred to retained earnings, respectively.

The consolidated company recognized dividend income of 13,369 thousand and 8,464 thousand in 2022 and 2021, respectively.

#### 9. FINANCIAL ASSETS AT AMORTIZED COST

	December 31, 2022	December 31, 2021

#### Notes receivable and accounts receivable

The consolidated company's average credit period for product sales is 30 to 180 days, and due to the short credit period, interest is not calculated.

In order to control credit risk, the consolidated company assesses the credit quality of individual customers to determine credit limits through an internal credit rating system and conducts regular review and monitoring procedures every year based on the historical transaction records and financial conditions of individual customers. This ensures that the consolidated company's receivables mainly come from long-term customers with good credit and no default records. In addition, the consolidated company reviews the recoverable amounts of receivables one by one at each balance sheet date to ensure that appropriate impairment losses have been provided for receivables that may be subject to credit risk.

The consolidated company recognizes allowances for losses on receivables based on the expected credit losses over the life of the receivables. The expected credit losses over the life are calculated using a provision matrix, which considers the customer's past default records, current financial conditions, regional industry economic conditions, and

outlook. Since the historical experience of credit losses of the consolidated company shows that there is no significant difference in the loss patterns of different customer groups, the provision matrix does not further differentiate customer groups, but sets the expected credit loss rate based on the number of days overdue for receivables.

If there is evidence that the counterparty is facing severe financial difficulties and the consolidated company cannot reasonably expect the recoverable amount, such as the counterparty undergoing liquidation, the consolidated company directly writes off the related receivables. However, the collection activities will continue, and the amount recovered from the collection will be recognized in profit or loss.

The following table details the loss allowance of notes and accounts receivable based on the Consolidated Company's allowance matrix:

#### December 31, 2022

Not most due	Overdue			Overdue	mo	ore than	Total

Add: Impairment loss for the year	1,742	562
Foreign currency translation		
differences	8	(3)
Closing balance	<u>\$ 3,088</u>	<u>\$ 1,338</u>

#### 11. INVENTORIES

	December 31, 2022	December 31, 2021
Finished goods	\$ 84,251	\$ 101,776
Work-in-process	43,740	65,173
Semi-finished goods	45,678	52,416

Raw materials	61,677	71,336
	\$ 235,34 <u>6</u>	\$ 290,701

The cost of goods sold related to inventory in 2022 and 2021 was 1,086,769 thousand and 1,103,073 thousand, respectively. The cost of goods sold includes inventory price decline reversal gains of 759 thousand and 6,144 thousand, respectively. The reversal gains on inventory price decline were mainly due to the active disposal of stagnant inventory.

#### 12. <u>SUBSIDIARIES</u>

i. Subsidiaries included in the consolidated financial statements

The subsidiaries included in the consolidated financial statements are as follows:

			Proportion o	f Ownership

- 1. Subsidiary UMT Holdings (Samoa) Limited (hereinafter referred to as UMT Samoa) was established in June, 2009.
- 2. UMT Holdings (HK) Limited (hereinafter referred to as UMT Hong Kong) was established in July, 2009.
- 3. RADIATION TECHNOLOGY, INC. (Radiation Technology, Inc.) was established by the parent company through its 100% owned subsidiary UMT Samoa in the Cayman Islands and was established in August, 2014.
- 4. (1) UMT Samoa acquired 95% of the shares of UMTEK TELECOM (HK) LIMITED held by EXCELTEK ELECTRONICS (H.K.) LIMITED for US\$11,447 thousand in 2011, and indirectly invested 100% of EXCELTEK ELECTRONICS (H.K.) (Kunshan) through the acquisition.
  - (2) In order to restructure the organization, the shareholders of UMTEK TELECOM (HK) LIMITED exchanged their shares of UMTEK TELECOM (HK) LIMITED and Radiation Technology, Inc. in 2014. The post-conversion shareholding structure was adjusted according to the original shareholding ratio. After the adjustment, UMT Samoa held 93.27% of Radiation Technology, Inc. and indirectly invested 100% in UMTEK TELECOM (HK) LIMITED and EXCELTEK ELECTRONICS through Radiation Technology, Inc. In 2015. **EXCELTEK** ELECTRONICS changed its name to "Radiation Technology Inc." (hereinafter referred to as Radiation Technology Inc.).
  - (3) In order to meet the stock listing requirements and long-term operational development plans of Radiation Technology, Inc., the company resolved to approve the equity dispersion plan of Radiation Technology, Inc. After the completion of the share release process, UMT Samoa's shareholding ratio in Radiation Technology, Inc. decreased from 62.37% to 53.54%. The shares of Radiation Technology, Inc. were listed for trading at the TPEX on December 2, 2015.
  - (4) For long-term investment considerations, the company also purchased a 2.05% stake in Radiation Technology, Inc. in the public market from non-controlling interests.

- 5. UNIVERSAL MICROWAVE TECHNOLOGY (KUNSHAN) CO., LTD. was established in Novembe, 2009.
- 6. In response to the company's practical operational needs, RADTEK COMMUNICATIONS, INC. (hereinafter referred to as RADTEK COMMUNICATIONS, INC.) was registered and established by the Ministry of Economic Affairs in December, 2016.
- 7. (1) GENTON TECH CORPORATION resolved at a board of directors meeting in April 2021 to issue 1,050 thousand common shares through a cash capital increase, raising 16,800 thousand dollars. The company did not subscribe according to the shareholding ratio, and the shareholding ratio decreased from 64.49% to 56.97%, resulting in a reduction of 4,041 thousand dollars in capital surplus recognition of changes in equity interest in the subsidiary.
  - (2) GENTON TECH CORPORATION resolved at a board of directors meeting in May 2022 to issue 2,000 thousand common shares through a cash capital increase, raising 32,000 thousand dollars. The company did not subscribe according to the shareholding ratio, and the shareholding ratio decreased from 56.97% to 53.60%, resulting in a reduction of 1,323 thousand dollars in capital surplus recognition of changes in equity interest in the subsidiary.
- 8. The subsidiary, UMT Investment Co., Ltd (hereinafter referred to as UMT Investment Co., Ltd), was established and registered with the Ministry of Economic Affairs in May 2018 with a paid-in capital of 60,000 thousand.
- 9. Bridge Components (HK) Limited (hereinafter referred to as Bridge Components (HK) Limited) was established in March 2019 with a paid-in capital of HKD 700 thousand.
- 10. In order to integrate group resources and improve overall operational efficiency, the company and its subsidiary Radiation Technology, Inc. passed a resolution at the board meeting on March 10, 2021, for the company to acquire all shares of JOYMAX ELECTRONICS CO., LTD. held by Radiation Technology, Inc. The acquisition price was 280,730 thousand and the share delivery process was completed in May 2021.

JOYMAX ELECTRONICS CO., LTD. passed a resolution at the board meeting in September, 2021, to carry out a cash capital reduction, with a reduction amount of 45,984 thousand.

- 11. JM-ALONSO Technology Co. Ltd (hereinafter referred to as JM-ALONSO Technology Co. Ltd) was established in January, 2020, with a paid-in capital of NTD 3,550 thousand. As of December 31, 2022, the company held 60.71% of its shares through its subsidiary GENTON TECH CORPORATION.
- 12. WIRELESS SI CORPORATION (hereinafter referred to as WIRELESS SI CORPORATION) was established in May, 2021, with a paid-in capital of NTD 500 thousand. The company held 100% of its shares through its subsidiary GENTON TECH CORPORATION and invested an additional NTD 2,000 thousand in September, 2021.

In order to integrate group resources and improve management efficiency, the company applied for deregistration in July, 2022. WIRELESS SI CORPORATION returned the share capital of NTD 1,717 thousand in November, 2022 and was deregistered on November 4, 2022.

- 13. Witeck Limited (hereinafter referred to as Witeck Limited) was established in June, 2020, with a capital of HKD 650 thousand. The company held 51% of its shares through its subsidiary GENTON TECH CORPORATION.
  In order to integrate group resources and improve management efficiency, the company applied for deregistration in April, 2021. Witeck Limited returned the share capital of HKD 306 thousand in August, 2021, and was deregistered on

The consolidated company leases its own land, buildings, and leasehold improvement interests through operating leases, mainly to employees for dormitory purposes, with lease terms of 1 to 2 years. At the end of the lease term, the lessee does not have preferential purchase rights to the assets.

The consolidated company had no interest capitalization in both 2022 and 2021.

Property, plant and equipment of the Consolidated Company are depreciated on a straight-line basis over their useful lives as follows:

Land improvements	3 years
Buildings	
Main building	8-50 years
Improvement	3-20 years
Machinery and	
equipment	3-20 years
Mold equipment	1-10 years
Test equipment	3-10 years
Transportation	
equipment	4-7 years
Leasehold	
improvements	4-10 years
Office equipment and	
others	1-10 years

The recorded property, plant, and equipment include an increase in the fair value of US\$811 thousand due to the premium acquisition of UMTEK TELECOM (HK) LIMITED and an increase in the fair value of TWD 119,399 thousand due to the acquisition of JOYMAX ELECTRONICS CO., LTD., which is depreciated over the remaining useful life.

The consolidated company assessed that there were no indications of impairment in property, plant, and equipment as of 2022 and December 31, 2021.

The consolidated company has provided part of the land and buildings as collateral for loan applications from banks. Please refer to Note 33.

## 15. <u>LEASE ARRANGEMENTS</u>

## i. Right-of-use assets

	December 31, 2022	December 31, 2021
Carrying amounts		
Land	\$ 20,418	\$ 19,532
Buildings	5,187	7,971
Transportation equipment	1,837	2,503
	\$ 27,442	\$ 30,006
	2022	2021
Additions to the right-of-use		
assets	<u>\$ 700</u>	<u>\$ 3,160</u>
Depreciation expenses for		
right-of-use assets		
Land	\$ 710	\$ 675
Buildings	2,783	2,782
Transportation equipment	1,367	1,175
• •	\$ 4,860	\$ 4,632

#### ii. Lease liabilities

	December 31, 2022	December 31, 2021
Carrying amounts		
Current	<u>\$ 3,850</u>	<u>\$ 4,068</u>
Non-current	<u>\$ 3,316</u>	<u>\$ 6,580</u>

Range of discount rate for lease liabilities was as follows:

	December 31, 2022	December 31, 2021
Buildings	1.12%	1.12%
Transportation equipment	0.70%~1.12%	0.70%~1.12%

# iii. Important leasing activities and terms

The consolidated company leases several transportation equipment for business use, with lease terms of 3 years. These lease agreements do not contain any provisions for extension or purchase options.

The consolidated company also leases several land and buildings for use as factories and offices, with lease terms of 3 to 6 years. At the end of the lease term, the consolidated company does not have preferential purchase rights for the leased land and buildings.

Right-of-use assets - land was acquired by a subsidiary at an original cost of RMB 2,221 thousand for land use rights in the People's Republic of China, amortized on a straight-line basis over a 50-year useful life, and an additional fair value of USD 685 thousand due to premium acquisition, amortized over its remaining useful life.

The consolidated company assessed that there were no indications of impairment in Right-of-use assets as of 2022 and December 31, 2021.

#### iv. Other lease information

	2022	2021
Expense relating to short-term		
leases	<u>\$ 2,976</u>	<u>\$ 2,986</u>
Lease expense for low-value		
assets	<u>\$ 85</u>	<u>\$ 84</u>
Total cash (outflow) for leases	(\$ 7,632)	(\$ 7,428)

The Consolidated Company chooses to exempt certain assets that meet the criteria for short-term leases of office equipment, transportation equipment, and low-value asset leases from recognition of right-of-use assets and lease liabilities.

The Consolidated Company also leases its own property, plant and equipment through operating leases, which are described in Note 14.

## 16. Goodwill

	2022	2021
Cost		
Opening balance	\$ 77,227	\$ 78,893
Net exchange differences	6,309	( <u>1,666</u> )
Closing balance	<u>\$ 83,536</u>	<u>\$ 77,227</u>

The Company acquired 95% of the shares of UMTEK TELECOM (HK) LIMITED in 100 through its subsidiary UMT Samoa, which in turn invested in Radiation Technology Inc. As of the end of 2022, the excess of its investment cost over the net equity acquired was USD 2,670 thousand, including the acquisition premium of TWD 18,072 thousand under the purchase method for property, plant, and equipment, land use rights, and other

intangible assets, and goodwill of TWD 63,934 thousand that could not be clearly attributed to individual assets, please refer to Note 12.

The Company acquired 51% of the shares of GENTON TECH CORPORATION in 2017. As of the end of 2022, the excess of its investment cost over the net equity acquired was TWD 24,749 thousand, including the acquisition premium of TWD 5,147 thousand under the purchase method for other intangible assets, and goodwill of TWD 19,602 thousand that could not be clearly attributed to individual assets, please refer to Note 12.

The Company evaluated the net assets used in the operations of the above-mentioned companies for any impairment of value as of December 31, 2022, in accordance with International Financial Reporting Standards. Impairment was assessed based on the following cash-generating units:

i. RF Division—Radiation Technology Inc.

As of December 31, 2022, the total net book value of the assets used for the operation of the cash-generating unit is 762,031 thousand, including goodwill of 63,934 thousand and premium attributable to individual assets of 18,072 thousand. The company's management assesses the recoverable amount based on the value in use of the net assets, with a related discount rate of 20.81%.

The main assumptions affecting the recoverable amount assessment and the methods for determining the values of each key assumption are as follows:

- 1. Expected revenue growth rate: The revenue is estimated based on the expected future global growth rate of antennas, RF cables, RF connectors, and cable harness products.
- 2. The ratio of cost of goods sold (excluding depreciation and amortization) to revenue is estimated based on the actual ratio in 2022.
- 3. Expected operating expenses: Each year's expected operating expenses are estimated based on the actual ratio of operating expenses to revenue in 2022.

The recoverable amount calculated based on the above key assumptions is higher than the net book value of the assets as of December 31, 2022. After evaluation, there is no risk of asset impairment.

ii. Communication Network Engineering Services Division — GENTON TECH CORPORATION

As of December 31, 2022, the total net book value of the assets used for the operation of the cash-generating unit is 184,647 thousand, including goodwill of 19,602 thousand and premium attributable to individual assets of 5,147 thousand. The company's management assesses the recoverable amount based on the value in use of the net assets, with a related discount rate of 10.06%.

The main assumptions affecting the recoverable amount assessment and the methods for determining the values of each key assumption are as follows:

- 1. Expected revenue growth rate: The revenue is estimated based on the expected future global growth rate of antennas, connectors, cable harnesses, and new products in the global 4G/5G communication equipment market, as well as increasing market share in the Taiwan communication market.
- 2. The ratio of cost of goods sold (excluding depreciation and amortization) to revenue is estimated based on the actual ratio in 2022.
- 3. Expected operating expenses: Each year's expected operating expenses are estimated based on the actual ratio of operating expenses to revenue in 2022.

The recoverable amount calculated based on the above key assumptions is higher than the net book value of the assets as of December 31, 2022. After evaluation, there is no risk of asset impairment.

## 23. RETIREMENT BENEFIT PLANS

#### i. Defined contribution plan

The retirement pension system applicable to the parent company, Radiation Technology, Inc., RADTEK COMMUNICATIONS, INC., GENTON TECH CORPORATION, JOYMAX ELECTRONICS CO., LTD., JM-ALONSO Technology Co. Ltd, and WIRELESS SI CORPORATION under the Labor Pension Act is a government-managed defined contribution plan, contributing 6% of the employees' monthly salary to the personal account of the Labor Insurance Bureau. The expenses recognized in 2022 and 2021 were 11,490 thousand and 10,690 thousand, respectively.

UNIVERSAL MICROWAVE TECHNOLOGY (KUNSHAN) CO., LTD. and Radiation Technology Inc. are subject to a defined contribution system in accordance with the local social security regulations, contributing to the pension insurance. The expenses recognized in 2022 and 2021 were 7,796 thousand and 7,080 thousand, respectively.

## ii. Defined benefit plan

The retirement pension system for the parent company and JOYMAX ELECTRONICS CO., LTD. under Taiwan's "Labor Standards Act" is a government-managed defined benefit plan. The payment of employee pensions is calculated based on years of service and the average wage during the six months prior to the approved retirement date. These companies allocate a 2% pension

contribution based on the total monthly salaries of employees, which is deposited into a dedicated account at the Bank of Taiwan under the supervision of the Labor Retirement Reserve Supervisory Committee. The authorities approved the suspension of pension contributions for these companies in 2022 and 2021, respectively. The dedicated account is managed by the Ministry of Labor's Bureau of Labor Funds, and the consolidated company has no right to influence investment management strategies.

The amounts of defined benefit plans included in the consolidated balance sheet are as follows:

# The Company — Universal Microwave Technology, Inc.

	December 31, 2022	December 31, 2021
Present value of defined benefit		
obligation	\$ 6,191	\$ 6,931

December 31, 2021	\$ 4,108	( <u>\$</u>	7,403)	( <u>\$</u>	3,295)

The consolidated company is exposed to the following risks due to the pension system under the "Labor Standards Act":

- 1. Investment risk: The Labor Fund Operation Bureau of the Ministry of Labor invests labor retirement funds in domestic (foreign) equity securities, debt securities, and bank deposits through self-management and entrusted management. However, the plan's asset allocation income is calculated based on a return not lower than the local bank's 2-year fixed deposit interest rate.
- Interest rate risk: A decline in government bond and corporate bond interest
  rates will increase the present value of defined benefit obligations, but the
  return on debt investments of plan assets will also increase, partly offsetting the
  impact on net defined benefit liabilities.
- 3. Salary risk: The calculation of the present value of defined benefit obligations is based on the future salaries of plan members. Therefore, an increase in plan members' salaries will increase the present value of defined benefit obligations.

The present value of the consolidated company's defined benefit obligations is actuarially determined by a qualified actuary, with significant assumptions as of the measurement date as follows:

	December	31, 2022	December 31, 2021		
	Universal		Universal		
	Microwave	Joymax	Microwave	Joymax	
	Technology,	Electronics	Technology,	Electronics	
	Inc.	Co., Ltd.	Inc.	Co., Ltd.	
Discount rate	1.50%	1.50%	0.50%	0.50%	
Expected salary					
increase rate	2.75%	3.00%	2.75%	4.00%	

If significant actuarial assumptions change reasonably, while all other assumptions remain unchanged, the amount by which the present value of the defined benefit obligation would increase (decrease) is as follows:

	December 31, 2022			December 31, 2021			21	
	Universal			Uni	versal			
	Microwave Joymax		Microwave		Joymax			
	Tech	nology,	ology, Electronics		Technology,		Elect	tronics
	Inc.		Co., Ltd.		Inc.		Co., Ltd.	
Discount rate Increase by 0.25%	( <u>\$</u>	<u>186</u> )	( <u>\$</u>	<u>73</u> )	( <u>\$</u>	<u>231</u> )	( <u>\$</u>	<u>115</u> )

Decrease by 0.25%	<u>\$</u>	194	<u>\$</u>	<u>76</u>	<u>\$</u>	241	\$	119
Expected salary increase rate								
Increase by 0.25%	\$	188	\$	73	\$	231	\$	113
Decrease by 0.25%	(\$	182)	(\$	71)	(\$	223)	(\$	110)

As actuarial assumptions may be interrelated, the possibility of a single assumption change is not significant, so the sensitivity analysis above may not reflect the actual change in the present value of the defined benefit obligation.

Shares authorized	<u>\$ 1,000,000</u>	<u>\$1,000,000</u>
Number of shares issued and		
fully paid (in thousands)	62,159	62,159
Shares issued	<u>\$ 621,586</u>	\$ 621,586

The issued common stock has a par value of NT\$10 per share and each share has one voting right and the right to receive dividends.

# ii. Capital surplus

	December 31, 2022	December 31, 2021
May be used to offset a deficit,		
distributed as cash		
dividends, or transferred to		
share capital (1)		
Issuance of ordinary shares	\$ 697,401	\$ 747,128
The difference between the		
actual price and the book		
value of acquiring or		
disposing of subsidiary	31,095	32,418

shares		
The premium on the issuance		
of shares due to the exercise		
of employee stock options	59,568	59,568
Employee share options -		
expired	85	85
May be used only to offset a		
deficit (2)		
Recognition of changes in		
ownership interests of		
subsidiaries (3)	2,469	2,469
May not be used for any		
<u>purpose</u>		
Employee share options	30,280	12,112
	<u>\$ 820,898</u>	<u>\$ 853,780</u>

- Such capital surplus may be used to offset a deficit; in addition, when the Company has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Company's capital surplus and to once a year).
- 2. Capital reserves generated by investments using the equity method, except for offsetting losses, may not be used for any purpose.
- 3. This type of capital surplus represents the equity transaction effects recognized due to changes in the ownership interests of subsidiaries that the Company has not actually acquired or disposed of, or adjustments to the capital surplus of subsidiaries recognized by the Company using the equity method.

#### iii. Retained earnings and dividend policy

In accordance with the Company's Articles of Incorporation, 10% of the Company's annual earnings, if any, shall be set aside as legal reserve after paying taxes and making up for accumulated deficits, and the remainder may be set aside or reversed to a special reserve in accordance with the law. If there is any unappropriated earnings, the board of directors shall prepare a proposal for the appropriation of earnings and submit it to the shareholders' meeting for resolution on the distribution of dividends to shareholders. The Company's policy on the distribution of compensation of employees and remuneration of directors is described in Note 25 (vii), "Compensation of employees and remuneration of directors".

The company's dividend distribution methods can be either stock dividends or cash dividends, with the cash dividend ratio not less than 10%. The distribution plan is

proposed by the board of directors each year and approved by the shareholders' meeting.

Appropriation of earnings to the legal reserve shall be made until the legal reserve equals the Company's paid-in capital. The legal reserve may be used to offset deficit. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

The company held its annual shareholders' meetings on June 15, 2022, and July 9, 2021, respectively, and resolved to approve the 2021 and 2020 profit distribution plans as follows:

	Earnings appropriation		Dividend per share (NT\$)	
	2021	2020	2021	2020
Legal reserve	\$ 23,706	\$ 12,516		•
Cash dividends	198,908	113,129	\$ 3.20	\$ 1.82

Additionally, the company's annual shareholders' meetings on June 15, 2022 and July 9, 2021 resolved to distribute cash of 49,727 thousand dollars and 42,268 thousand dollars from the capital reserve - stock issuance premium, with each share receiving 0.8 dollars and 0.68 dollars, respectively.

The board of directors of the company proposed the 2022 profit distribution plan on March 29, 2023 as follows:

	Earnings	Dividends per share
	distribution	(NT\$)
Legal reserve	\$ 27,200	
Special reserve	30,214	
Cash dividends	223,771	\$ 3.6

Furthermore, the board of directors of the company proposed on March 29, 2023, to distribute cash of 24,863 thousand dollars from the capital reserve - stock issuance premium, with each share receiving 0.4 dollars.

The 2022 profit distribution plan is subject to the resolution of the annual shareholders' meeting scheduled for June 21, 2023.

## 25. <u>NET INCOME FROM CONTINUING OPERATIONS</u>

The net profit of the continuing operating units includes the following items:

#### i. Other income

	2022	2021
Rental income (Note 14)

	Operating expenses	<u>318,201</u>	285,179
		<u>\$ 488,946</u>	<u>\$ 452,086</u>

#### vii. Compensation of employees and remuneration of directors

According to the Company's Articles of Incorporation, the Company accrues employees' compensation and board directors' remuneration at the rates of no less than 8% and no higher than 3%, respectively, of net profit before income tax, compensation of employees and remuneration of directors. The estimated compensation of employees and the remuneration of directors for the years 2022 and 2021 were resolved by the board of directors on March 29, 2023 and March 24, 2022, respectively, as follows:

#### Accrual rate

	2022	2021
Compensation of employees	8.00%	8.00%
Remuneration of directors	1.91%	1.94%

#### **Amount**

	20	2022		21
	Cash	Stock	Cash	Stock
Compensation of employees	\$ 29,343	\$ -	\$ 23,506	\$ -
Remuneration of directors	6,999	-	5,696	-

If there is a change in the amounts after the annual consolidated financial statements are authorized for issue, the differences are recorded as a change in the accounting estimate.

There is no difference between the actual amounts of compensation of employees and remuneration of directors paid and the amounts recognized in the consolidated financial statements for the year ended December 31, 2021 and 2020.

Information on the compensation of employees and remuneration of directors resolved by the Company's board of directors is available at the Market Observation Post System website of the Taiwan Stock Exchange.

#### 26. INCOME TAX FROM CONTINUING OPERATIONS

# i. Income tax recognized in profit or loss

Major components of income tax expense are as follows:

	2022	2021
Current tax		
In respect of the current		
period	\$ 83,442	\$ 44,850
In respect of prior years	(1,262)	( 1,912)

Deferred tax		
In respect of the current		
period	9,347	17,902
Income tax expense recognized		
in profit or loss	<u>\$ 91,527</u>	<u>\$ 60,840</u>

The reconciliation of accounting income and income tax expense is as follows:

	2022	2021
Profit before tax from		
continuing operations	<u>\$ 416,097</u>	<u>\$ 343,430</u>
Income tax expense at statutory		
rate on net income before tax	\$ 103,372	\$ 81,696
Non-deductible expenses for		
tax purposes	140	186
Tax-exempt income	( 5,433)	( 23,430)
Deferred tax impact on		
subsidiaries' earnings	( 5,445)	3,804
Unrecognized loss		
carryforward	321	484
Adjustments to prior years'		
income tax expense	( 1,262)	(1,912)
Others	( <u>166</u> )	<u> 12</u>
Income tax expense recognized		
in profit or loss	<u>\$ 91,527</u>	\$ 60,840

The allocation of income tax expenses for each subsidiary is included in the consolidated company as follows:

	2022	2021
GENTON TECH		
CORPORATION	<u>\$ 855</u>	<u>\$ 5,070</u>
UMT Investment Co., Ltd	<u>\$ 290</u>	<u>\$ 509</u>

Expires in 2027	\$ 830	\$ 2,317
Expires in 2028	2,902	2,902
Expires in 2029	2,765	2,765
Expires in 2030	37	37
Expires in 2031	<u>377</u>	<u>367</u>
	<u>\$ 6,911</u>	<u>\$ 8,388</u>

# vi. Information on unused loss carryforwards

As of December 31, 2022, information on the loss carryforwards of the subsidiary RADTEK COMMUNICATIONS, INC. is as follows:

Unutilized balance	Deduction Overdue Year
\$ 3,189	2027
2,902	2028
2,765	2029
37	2030
<u>377</u>	2031
\$ 9,270	

#### vii. Income tax assessments

The Company, its subsidiary UMT Investment Co., Ltd, subsidiary RADTEK COMMUNICATIONS, INC., subsidiary JOYMAX ELECTRONICS CO., LTD., subsidiary GENTON TECH CORPORATION, and subsidiary JM-ALONSO Technology Co. Ltd have settled their corporate income tax filings up to 2020, which have been approved by the tax authorities.

# 27. EARNINGS PER SHARE

Unit: \$ per share

	2022	2021
Basic earnings per share	<u>\$ 4.36</u>	<u>\$ 3.81</u>
Diluted earnings per share	<u>\$ 4.34</u>	<u>\$ 3.80</u>

The earnings and weighted-average number of ordinary shares outstanding used in the computation of earnings per share were as follows:

#### Net Profit for the Year

	2022	2021
Net income attributable to the Company's owners		
Net income used to calculate basic earnings per share	<u>\$ 271,000</u>	<u>\$ 236,644</u>
Net income used to calculate diluted earnings per share	<u>\$ 271,000</u>	<u>\$ 236,644</u>
<u>Shares</u>		(In Thousands of Shares)
	2022	2021
Weighted-average number of ordinary shares used in the computation of basic earnings		
per share Effects of potentially dilutive	62,159	62,159
ordinary shares:  Compensation of employees Weighted-average number of ordinary shares used in the	248	143
computation of diluted earnings per share	62,407	<u>62,302</u>

If the Consolidated Company offered to settle compensation paid to employees in cash or shares, the Consolidated Company assumed the entire amount of the compensation will be settled in shares and the resulting potential shares were included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

#### 28. Share-based payment agreements

#### Employee stock option plan of the Company

On March 10, 2021, the Company resolved through the board of directors to issue 3,000 unit of employee stock options, each of which can be used to subscribe for 1,000 common shares, with new shares issued for delivery. The beneficiaries are the

Company's employees and those of the Company's subsidiaries with a controlling interest who have reached a certain standard of seniority and performance. The stock options have a term of 4 years and 2 months, and the option holders can exercise a certain proportion of the granted stock options after 2 years from the date of grant. When changes occur in the Company's common shares, the exercise price of the stock options will be adjusted according to the specified formula.

The relevant information of the employee stock options is as follows:

	202	22	202	1
		Weighted		Weighted
		average		average
		Exercise		Exercise
		price		price
Employee stock options	Unit	(dollarn)	Unit	(dollarn)
Outstanding at the beginning				
of the year	3,000	\$ 70.0	-	\$ -
Granted during the year		-	3,000	72.6
Outstanding at the end of the				
year	3,000	68.3	<u>3,000</u>	70.0
Exercisable options at the end				
of the year			<u>-</u>	
Weighted average fair value of				
options granted during the				
year (dollar)	<u>\$ -</u>		<u>\$ 17.51</u>	

Up to the balance sheet date, the relevant information of the outstanding employee stock options is as follows:

December 31, 2022			De	cember 31, 20	)21
		Weighted			Weighted
		average			average
	Range of	remaining		Range of	remaining
	exercise	contractual		exercise	contractual
Release Date	price	term (years)	Release Date	price	term (years)
110.4.23	\$68.3	2.50	110.4.23	\$70.0	3.50

On April 23, 2021, the Company used the Black-Scholes valuation model for the employee stock options granted, with the input values as follows:

	Apr.23, 2021
Stock price on the grant date	72.60 dollars
Exercise price	72.60 dollars
Expected volatility	31.39%~32.84%
Duration	4 years and 2
	months
Expected dividend rate	0%
Risk-free interest rate	0.20%~0.25%

The expected volatility is based on the historical stock price volatility taken into account.

The employee stock options issued above have a calculated compensation cost of NTD 52,518 thousand using the fair value method, and salary expenses and capital surplus - employee stock options of NTD 18,168 thousand and NTD 12,112 thousand were recognized for 2022 and 2021, respectively, on a straight-line basis.

## 29. EQUITY TRANSACTION WITH NON-CONTROLLING INTEREST

- The consolidated company did not subscribe to the cash capital increase of GENTON TECH CORPORATION on July 14, 2022, in proportion to its shareholding, resulting in a decrease in the shareholding ratio from 56.97% to 53.60%. Please refer to Note 12.
- ii. The consolidated company subscribed to 1.31% and 0.27% of its shares in Radiation Technology, Inc. on June 30 and July 31, 2021, respectively, raising its shareholding ratio from 0.47% to 2.05%.
- iii. The consolidated company did not subscribe to the cash capital increase of GENTON TECH CORPORATION on May 5, 2021, in proportion to its shareholding, resulting in a decrease in the shareholding ratio from 64.49% to 56.97%. Please refer to Note 12.

Since the above transaction did not change the Consolidated Company's control over the subsidiary, the Consolidated Company treated it as an equity transaction.

# 30. <u>CAPITAL RISK MANAGEMENT</u>

The purpose of the consolidated company's capital management policy is to ensure the continuous operating capacity of the consolidated company, to maximize returns for shareholders, and to provide benefits for other stakeholders. To ensure the achievement of the above objectives, the consolidated company must maintain appropriate capital to support the expansion and upgrading of plants and equipment. Therefore, the capital management of the consolidated company is to ensure the necessary financial resources and operating plans to support the operating capital, capital expenditures, research and development expenses, debt repayment, and dividend payments required for the next 12 months. The consolidated company does not need to comply with other external capital requirements.

The management of the consolidated company regularly reviews the capital structure and considers the costs and risks that different capital structures may involve. In general, the consolidated company adopts a prudent risk management strategy.

#### 31. FINANCIAL INSTRUMENTS

- i. Fair value of financial instruments that are not measured at fair value. The carrying amounts of financial assets and financial liabilities that are not measured at fair value are considered by the management of the Consolidated Company to approximate their fair values.
- ii. Fair value of financial instruments that are measured at fair value on a recurring basis

# 1. Fair value hierarchy

3. Valuation techniques and inputs applied for the purpose of Level 3 fair value measurement

Domestic emerging stock and unlisted equity investments are estimated at fair value using the asset-based approach and market approach.

The asset-based approach estimates the fair value based on its net asset value. Significant unobservable inputs are as follows: when the liquidity discount or minority interest discount decreases, the fair value of such investment companies will increase. The unobservable inputs used by the consolidated company in 2022 and December 31, 2021 are liquidity reductions of 5% to 35%. When other inputs remain unchanged, an increase in the liquidity reduction of 1% will reduce the fair value by 1,864 thousand and 1,843 thousand, respectively.

The market approach involves selecting a sample of listed companies engaged in the same or similar business activities, referencing the stock prices traded on active markets, and evaluating the implied value multiples and relevant transaction information of these prices to determine the asset value of the valuation target, or referencing the stock prices of companies engaged in the same or similar business activities traded in inactive markets and making appropriate adjustments, or referencing the indicative transaction prices of the valuation target in the most recent year.

#### iii. Categories of financial instruments

Note 1: The balance includes cash and cash equivalents, financial assets at amortized cost - current, notes receivable, accounts receivable, other receivables (including related parties), and deposits measured at amortized cost.

Note 2: The balance includes short-term loans, short-term notes payable, notes payable, accounts payable, other payables, and deposits measured at amortized cost.

#### iv. Financial risk management objectives and policies

The financial risk management objectives of the consolidated company are to manage the exchange rate risk, interest rate risk, credit risk, and liquidity risk associated with operating activities. To mitigate these financial risks, the consolidated company is committed to identifying, assessing, and avoiding market uncertainties to reduce the potential adverse impact of market fluctuations on the company's financial performance.

The consolidated company hedges its exposure through the use of derivative financial instruments to mitigate the impact of such risks. The use of derivative financial instruments is subject to policies approved by the board of directors of the consolidated company, which set out written principles for exchange rate risk, interest rate risk, credit risk, the use of derivative and non-derivative financial instruments, and the investment of residual liquid funds. Significant financial activities of the consolidated company are reviewed by the board of directors according to relevant regulations and internal control systems. During the implementation of financial plans, the consolidated company must adhere to relevant financial operating procedures concerning overall financial risk management and the division of responsibilities. Internal auditors continuously review compliance with policies and exposure limits. The consolidated company does not engage in financial instrument (including derivative financial instrument) transactions for speculative purposes.

#### 1. Market risk

The Consolidated Company's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (see (1) below) and interest rates (see (2) below).

There have been no changes in the exposure to market risks related to financial instruments of the consolidated company and the ways in which these exposures are managed and measured.

#### (1) Foreign currency risk

The company and several of its subsidiaries engage in foreign currency denominated sales and purchase transactions, exposing the consolidated company to exchange rate risks. The management of exchange rate exposure within the consolidated company is done within the limits allowed by policy, using forward foreign exchange contracts to manage risks.

For the carrying amounts of monetary assets and monetary liabilities denominated in non-functional currencies as of the balance sheet date (including non-functional currency denominated monetary items that have been offset in the consolidated financial statements), please refer to Note 34.

#### Sensitivity analysis

The Consolidated Company was mainly exposed to USD.

The following table details the sensitivity analysis of the Consolidated Company when the exchange rate of the functional currency increases and decreases by 3% against each relevant foreign currency. 3% is the sensitivity ratio used for internal reporting of exchange rate risk to key management and represents management's assessment of the reasonably possible range of changes in foreign currency exchange rates. The sensitivity analysis includes only foreign currency monetary items in circulation and adjusts their year-end translation by a 3% change in exchange rates. The amounts in the table below represent the increase in income before income taxes that would result from a 3% weakening of the functional currency against the respective currencies, and the negative impact on income before income taxes that would result from a 3% strengthening of the functional currency against the respective currencies.

	2022	2021
Profit or loss	·	
USD	<u>\$ 31,523</u>	<u>\$ 26,261</u>

#### (2) Interest rate risk

Interest rate risk refers to the risk of changes in the value of financial instruments due to fluctuations in market interest rates. The consolidated company monitors market interest rate fluctuations to manage interest rate risk.

The carrying amounts of the Consolidated Company's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

<u>December 31, 2022</u> <u>December 31, 2021</u>

Fair value interest rate

risk		
Financial assets	\$ 786,271	\$ 500,363
Financial liabilities	407,166	480,591
Cash flow interest rate		
risk		
Financial assets	321,377	482,359
Financial liabilities	150,000	80,000

#### Sensitivity analysis

Regarding the sensitivity analysis of interest rate risk, the consolidated company calculates based on financial assets and liabilities with cash flow interest rate risk as of the balance sheet date. The consolidated company uses a 0.5% increase/decrease in market interest rates as a reasonable risk assessment for reporting interest rate changes to management. With all other variables held constant, a 0.5% increase/decrease in market interest rates would increase/decrease the pre-tax net profit of the consolidated company for 2022 and 2021 by 857 thousand and 2,012 thousand, respectively.

# (3) Other price risk

The consolidated company is exposed to equity price risk due to its investments in beneficiary certificates and listed equity securities.

Sensitivity analysis

#### Sensitivity analysis

The sensitivity analysis is based on the equity investment exposure as of the balance sheet date. If the domestic and foreign equity investment positions' price drops by 5%, the pre-tax income for 2022 and 2021 will decrease by 13,503 thousand and 15,844 thousand, respectively, due to the decline in the fair value of financial assets measured at fair value through profit or loss. In 2022 and 2021, other comprehensive income will decrease by 6,274 thousand and 11,502 thousand, respectively, due to the decline in the fair value of financial assets measured at fair value through other comprehensive income.

#### 2. Credit risk

Credit risk refers to the risk of financial loss arising from the counterparty's default on contractual obligations. As of the balance sheet date, the maximum credit risk exposure of the consolidated company primarily arises from the

carrying amount of financial assets recognized in the consolidated balance sheet.

The consolidated company's policy is to transact only with creditworthy counterparties and obtain sufficient collateral when necessary to mitigate the risk of financial loss arising from default. The risk assessment of individual customers considers factors that may affect the customer's payment ability, including the customer's financial condition, credit rating agency ratings, the consolidated company's internal credit rating, historical transaction records, and current economic conditions. The consolidated company also uses certain credit enhancement tools, such as prepayments and credit insurance, to reduce the credit risk of specific customers when appropriate.

The consolidated company's credit risk is mainly concentrated in its top five group customers. As of 2022 and December 31, 2021, the ratio of total accounts receivable from these customers was 31.54% and 20.61%, respectively, and the credit concentration risk of the remaining accounts receivable was relatively insignificant. After considering specific factors and conducting risk assessments, the credit risk of the top five group customers should not have a significant impact on the consolidated company.

#### 3. Liquidity risk

The Consolidated Company manages and maintains sufficient cash and cash equivalents to support its operations and mitigate the impact of cash flow fluctuations. The Consolidated Company's management monitors the use of bank financing lines and ensures compliance with the terms of borrowing contracts.

The remaining contractual maturity analysis of non-derivative financial liabilities is prepared based on the earliest possible repayment date required by the consolidated company and the undiscounted cash flows of financial liabilities (including principal and estimated interest). Therefore, the maturity analysis of the consolidated company's non-derivative financial liabilities is prepared according to the agreed repayment dates.

The consolidated company's net gains on foreign currency exchange (realized and unrealized) for 2022 and 2021 were 80,542,000 and net losses of 13,444 thousand, respectively. Due to the variety of foreign currency transactions and the functional currency types of the group entities, it is not possible to disclose exchange gains and losses according to each significant foreign currency.

#### 35. <u>SEPARATELY DISCLOSED ITEMS</u>

#### i. INFORMATION ABOUT SIGNIFICANT TRANSACTIONS:

- 1. Financing provided to others: Table 1.
- 2. Endorsements/guarantees provided: Table 2.
- 3. Marketable securities held (Excluding investments in subsidiaries, related companies, and joint control): Table 3.
- 4. Marketable securities acquired or disposed of at costs or prices of at least NT\$300 million or 20% of the paid-in capital: None.
- 5. Acquisition of individual real estate at costs of at least NT\$300 million or 20% of the paid-in capital: None.
- 6. Disposal of individual real estate at prices of at least NT\$300 million or 20% of the paid-in capital: None.
- 7. Total purchases from or sales to related parties amounting to at least NT\$100 million or 20% of the paid-in capital: Table 4.
- 8. Receivables from related parties amounting to at least NT\$100 million or 20% of the paid-in capital: None.
- 9. Trading in derivative instruments: None.
- 10. Other: Intercompany relationships and significant intercompany transactions: Table 5.

#### ii. INFORMATION ON INVESTEES: Table 6.

#### iii. INFORMATION ON INVESTMENTS IN MAINLAND CHINA:

- 1. Information on any investee company in mainland China, showing the name, principal business activities, paid-in capital, method of investment, inward and outward remittance of funds, ownership percentage, investment profit or loss, carrying amount of the investment at the end of the period, repatriations of investment income, and limit on the amount of investment in the mainland China area: Table 7.
- 2. Any of the following significant transactions with investee companies in mainland China, either directly or indirectly through a third party, and their prices, payment terms, and unrealized gains or losses: The company commissions its mainland subsidiaries UNIVERSAL MICROWAVE TECHNOLOGY (KUNSHAN) CO., LTD. and Radiation Technology Inc. to process raw materials, and the finished products are returned to the company after processing, without sales treatment for processing materials. The total

unrealized sales loss in 2022 is 284,000. For major transactions between the company and the mainland invested companies, please refer to Appendix 8.

- (1) The amount and percentage of purchases and the balance and percentage of the related payables at the end of the period.
- (2) The amount and percentage of sales and the balance and percentage of the related receivables at the end of the period.
- (3) The amount of property transactions and the amount of the resultant gains or losses.
- (4) The balance of negotiable instrument endorsements or guarantees or pledges of collateral at the end of the period and the purposes.
- (5) The highest balance, the ending balance, the interest rate range, and total current period interest with respect to the financing of funds.
- (6) Other transactions that have a material effect on the profit or loss for the year or on the financial position, such as the rendering or receipt of services.
- iv. INFORMATION OF MAJOR SHAREHOLDERS: The name of the shareholder, the number of shares owned, and percentage of ownership of each shareholder of shareholders with ownership of 5% or greater. (Table 9)

#### 36. <u>SEGMENT INFORMATION</u>

The consolidated company mainly focuses on the manufacturing and wholesale of communication components and materials (production of communication equipment components), and is divided into microwave/millimeter-wave product division, radio frequency product division, and communication network engineering service division according to the main products of the operation center. The main operating decision-makers will regularly evaluate the operating results of each department, which has complied with the provisions of International Financial Reporting Standard No. 8 "Operating Segments", and thus discloses in accordance with the regulations.

Information provided to the main operating decision-makers for resource allocation and performance evaluation focuses on the types of products or services delivered or provided. The reportable segments of the consolidated company are as follows:

Microwave / Millimeter Wave Products

— Universal Microwave Technology, Inc.

-UNIVERSAL MICROWAVE TECHNOLOGY (KUNSHAN) CO., LTD.

#### Radio Frequency Products

- -UMTEK TELECOM (HK) LIMITED
- -Radiation Technology Inc.
- -RADTEK COMMUNICATIONS, INC.
- -JOYMAX ELECTRONICS CO., LTD.

#### Communication Network Engineering Services

- -GENTON TECH CORPORATION
- -Bridge Components (HK) Limited
- -JM-ALONSO Technology Co. Ltd
- -Witeck Limited
- -WIRELESS SI CORPORATION

#### i. Segment revenue and operating results

The revenue and operating results of the Consolidated Company's continuing business units are analyzed by reportable segment as follows:

					Com	munication		
	Mi	crowave /		Radio	N	Network		
	Μ	Iillimeter	Fı	requency	En	gineering		
		ve Products		Products		Services		Total
2022	- ** a	ve i roducts		Toducts		oci vices		10141
Revenue from external								
customers	\$	917,414	\$	725,536	\$	194,715	\$	1,837,665
Interdepartmental revenue	_	54,252		379,829		2,226		436,307
Departmental revenue	\$	971,666	\$	1,105,365	\$	196,941		2,273,972
Internal offset		<u> </u>			-	·	(	436,307)
Consolidated revenue							\$	1,837,665
Departmental profit and							-	<u> </u>
loss	<u>\$</u>	226,837	\$	187,493	\$	4,101	\$	418,431
Adjustments and eliminations							(	2,334)
Income tax expense							(	91,527)
Consolidated net profit							\$	324,570
							-	
2021								
Revenue from external								
customers	\$	760,324	\$	723,746	\$	274,319	\$	1,758,389
Interdepartmental	Ψ	700,324	Ψ	723,740	Ψ	274,317	Ψ	1,730,307
revenue		17,830		394,134		374		412,338

Internal offset	Ψ	770,131	Ψ	1,117,000	Ψ	27 1,023	(	412,338)
Consolidated revenue							<u>~</u>	1,758,389
							Φ	1,730,309
Departmental profit and	¢	100 510	Φ	120 526	¢	25 500	¢	245 624
loss	\$	199,518	<u>\$</u>	120,526	<u>\$</u>	25,580	\$	345,624

Adjustments and		
eliminations	(	2,194)
Income tax expense	(	60,840)
Consolidated net profit	<u>\$</u>	282,590

The revenue reported above includes the income generated from transactions between departments and transactions with external customers.

Departmental profit and loss refers to the operating results of each operating department, which have been allocated to the headquarters management costs but do not include income tax expenses. This measurement amount is provided to the main operating decision-makers for allocating resources to departments and evaluating their performance.

The consolidated company does not include the assets of individual operating departments in the departmental information provided to the main operating decision-makers; therefore, the departmental financial information does not include the measurement amount of operating assets.

#### ii. Revenue from major products

Revenue from major products and services of the Consolidated Company's continuing business units is analyzed as follows:

	2022	2021
Microwave / Millimeter Wave		
Products	\$ 917,414	\$ 760,324
Radio Frequency Products	725,536	723,746
Communication Network		
<b>Engineering Services</b>	194,715	274,319
	\$ 1,837,665	\$ 1,758,389

#### iii. Regional Information:

The consolidated company mainly operates in two regions - Taiwan and Mainland China; the income from external customers is classified based on the country where the customer is located.

The income from continuing operations of the consolidated company from external customers is classified by the operating location and the non-current assets are classified by the asset location as follows:

	Reve	enue from ex	kterna	l customers		Non-current assets				
				Dec	cember 31,	Dec	ember 31,			
		2022		2021		2022		2021		
Taiwan	\$	357,089	\$	408,591	\$	880,680	\$	764,883		
China		133,953		166,659		183,553		283,316		

Asia	437,674	428,284	-	-
Europe	307,232	335,222	-	-
America	586,944	411,254	_	-
Oceania	14,773	8,379	<u>-</u> _	<u>-</u>
	\$ 1,837,665	\$ 1,758,389	\$ 1,064,233	\$ 1,048,199

Non-current assets do not include assets arising from classification as financial instruments, investments under the equity method, deferred tax assets, and post-retirement benefit assets.

#### iv. Major customers

In 2022 and 2021, no single customer's revenue accounted for more than 10% of the total revenue of the consolidated company.

### UNIVERSAL MICROWAVE TECHNOLOGY, INC. AND SUBSIDIARIES FINANCING PROVIDED TO OTHERS

#### FOR THE TWELVE MONTHS ENDED DECEMBER 31, 2022

251.007	251.007
261,907	261,907
_	787,272

Note 1: The description of the number field is as follows:

- (1) No. 0 represents the issuer.
- (2) Other numbers represent investees.
- Note 2: The total amount of funds lent by the company to companies or firms with short-term financing needs shall not exceed 40% of the company's net worth; the individual lending amount shall not exceed 40% of the company's net worth.
- Note 3: GENTON TECH CORPORATION's net worth; the individual lending amount shall not exceed 40% of GENTON TECH CORPORATION's net worth; the individual lending amount shall not exceed 40% of GENTON TECH CORPORATION's net worth.
- Note 4: UMT Holdings (Samoa) Limited's net worth; the individual lending amount shall not exceed 40% of UMT Holdings (Samoa) Limited's net worth; the individual lending amount shall not exceed 40% of UMT Holdings (Samoa) Limited's net worth.
- Note 5: On November 9, 2022, Universal Microwave Technology, Inc. resolved at a board of directors meeting to lend 80,000,000 to its subsidiary GENTON TECH CORPORATION, for its operational scale and improvement of funds utilization, from November 13, 2022, to November 12, 2023.
  - Universal Microwave Technology, Inc. resolved at a board of directors meeting on May 12, 2022, to lend USD 5,000,000 to its subsidiary RADIATION TECHNOLOGY, INC. for its operational scale and improvement of funds utilization, from May 12, 2022, to May 11, 2023.
  - Universal Microwave Technology, Inc. resolved at a board of directors meeting on August 12, 2022, to lend 40,000,000 to its subsidiary JOYMAX ELECTRONICS CO., LTD. for its operational scale and improvement of funds utilization, from August 12, 2022, to August 11, 2023.
  - GENTON TECH CORPORATION resolved at a board of directors meeting on May 19, 2022, to lend USD 180,000 to Bridge Components (HK) Limited for its operational scale and improvement of funds utilization, from May 19, 2022, to May 18, 2023.
- On behalf of UMT Holdings (Samoa) Limited, Universal Microwave Technology, Inc. resolved at a board of directors meeting on November 9, 2022, to lend USD 6,000,000 to Universal Microwave Technology, Inc. for its operational scale and improvement of funds utilization, from November 9, 2022, to November 8, 2023.
- Note 6: The amount of funds lent is approved by the board of directors.
- Note 7: Calculated based on the central exchange rate of the US dollar as of December 31, 2022.
- Note 8: All amounts have been fully offset when preparing the consolidated financial statements.

### UNIVERSAL MICROWAVE TECHNOLOGY, INC. AND SUBSIDIARIES ENDORSEMENTS/GUARANTEES PROVIDED

#### FOR THE TWELVE MONTHS ENDED DECEMBER 31, 2022

Table 2

(Unit: Unless otherwise stated, in thousands of New Taiwan Dollars)

		Endorsee							Ratio of cumulative		БТ	Endorsement		
Number	Endorser	Company name	Relationship (Note 1)	Endorsement and guarantee limit for a single company (Note 2 & 3)	Maximum balance for the period (Note 3)	Ending balance	Actual expenditure	Endorsement and guarantee amount by assets	endorsement/ guarantee amount to net worth as stated in the latest financial statements (%)	Maximum limit of endorsement and guarantee (Note 2 & 3)	and	and guarantee from	Endorsement and guarantee for Mainland	Damark
0	Universal Microwave	GENTON TECH	2	\$ 984,090	\$ 220,000	\$ 30,000	\$ 20,000	\$	1.52%	\$ 984,090	) Y	N	N	_
	Technology, Inc.	CORPORATION												
1	UMT Holdings (Samoa)	Universal Microwave	3	327,399	153,550	-	-		-	327,399	N	Y	N	_
	Limited	Technology, Inc.		(USD10,661 thousand)	(USD5,000 thousand)					(USD 10,663				
										thousand	)			
2	RADIATION	Universal Microwave	3	342,968	92,130	-	-		-	342,968	B N	Y	N	_
	TECHNOLOGY,INC.	Technology, Inc.			(USD3,000 thousand)									

Note 1: There are seven types of relationships between the endorser and the endorsee, which can be indicated as follows:

- (1) A company with which it does business.
- (2) A company in which the Company directly and indirectly holds more than 50 percent of the voting shares.
- (3) A company that directly and indirectly holds more than 50 percent of the voting shares in the Company.
- (4) Companies in which the Company holds, directly or indirectly, 90% or more of the voting shares.
- (5) Where a public company fulfills its contractual obligations by providing mutual endorsements/guarantees for another company in the same industry or for joint builders for purposes of undertaking a construction project.
- (6) Where all capital contributing shareholders make endorsements/ guarantees for their jointly invested company in proportion to their shareholding percentages.
- (7) Where companies in the same industry provide among themselves joint and several security for a performance guarantee of a sales contract for pre-construction homes pursuant to the Consumer Protection Act for each other.

Note 2: The endorsement and guarantee procedures for the company, UMT Holdings (Samoa) Limited, and RADIATION TECHNOLOGY, INC. are as follows:

- (1) The total amount of endorsements and guarantees provided by our company shall not exceed 50% of the current net value; the total amount of endorsements and guarantees provided by our company and its subsidiaries shall not exceed 60% of the current net value.
- (2) The endorsement and guarantee limit for a single enterprise by our company shall not exceed 50% of the current net value; the endorsement and guarantee limit for a single enterprise by our company and its subsidiaries shall not exceed 60% of the current net value. If endorsements and guarantees are provided due to business relationships, they shall not exceed the total transaction amount between the company and the counterpart in the most recent fiscal year (whichever is higher for purchases or sales). Net value shall be based on the most recent audited or reviewed financial statements.
- (3) The company's direct and indirect holdings of voting shares of more than 90% in other companies should not exceed 10% of the company's net value for endorsement guarantees. However, endorsement guarantees between companies with 100% direct and indirect holdings of voting shares are not subject to this limit.

Note 3: The conversion is based on the USD Central Exchange Rate as of December 31, 2022.

# UNIVERSAL MICROWAVE TECHNOLOGY, INC. AND SUBSIDIARIES INFORMATION OF MAJOR SHAREHOLDERS DECEMBER 31, 2022

Table 10

	Sha	ires
Name of Major Shareholder	Number of Shares	Percentage of
	Held	Ownership (%)
Cen Xin Investment Co.	4,083,856	6.57%

- Note 1: The information of major shareholders presented in this table is provided by the Taiwan Depository & Clearing Corporation based on the number of ordinary shares and preference shares held by shareholders with ownership of 5% or greater, that have been issued without physical registration (including treasury shares) by the Company as of the last business day for the current quarter. The share capital in the consolidated financial statements may differ from the actual number of shares that have been issued without physical registration because of differences in the basis of preparation.
- Note 2: If a shareholder delivers the shareholdings to the trust, the above information will be disclosed by the individual trustor who opened the trust account. For shareholders who declare insider shareholdings with ownership greater than 10% in accordance with the Security and Exchange Act, the shareholdings include shares held by shareholders and those delivered to the trust over which shareholders have rights to determine the use of trust property. For information relating to insider shareholding declaration, please refer to the Market Observation Post System website of the TWSE.

#### Latest Yearly Parent Company Only Financial Report

#### INDEPENDENT AUDITORS' AUDIT REPORT

To Universal Microwave Technology, Inc.:

#### **Audit opinion**

We have audited the financial statements of Universal Microwave Technology, Inc., which comprise the Parent Company Only Statement of Financial Position as of December 31, 2022 and December 31, 2021, the Parent Company Only Statement of Comprehensive Income from January 1 to December 31, 2022 and from January 1 to December 31, 2021, Parent Company Only Statement of Cash Flows, and Notes to Parent Company Only Financial Statement (including a summary of significant accounting policies).

In our opinion, the accompanying parent company only financial statements are properly drawn up in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), International Financial Reporting Interpretations Committee (IFRIC), and Standing Interpretations Committee (SIC) (hereinafter referred to as IFRSs) recognized and announced effectiveness by Financial Supervisory Commission (hereinafter referred to as FSC) so as to give a true and fair view of the parent company only financial position of Universal Microwave Technology, Inc. as of December 2022 and 2021 and of the financial performance, changes in equity and cash flows of Universal Microwave Technology, Inc. from January 1 to December 31, 2022 and 2021.

#### **Basis for audit opinion**

We conducted our audit in accordance with Regulations Governing Auditing and Attestation of Financial Statements by Certified Public Accountants and Generally Accepted Auditing Standards. Our responsibilities under those standards are further described in the 'Accountant's responsibilities for the audit of the financial statements' section of our report. We are independent of Universal Microwave Technology, Inc. in accordance with the Accounting and Corporate Regulatory Authority Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities, and we have fulfilled our other ethical responsibilities in accordance

with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **Key audit matter**

The key audit matter is which that, in our professional judgment, is most significant to our review of the parent company only financial statements of Universal Microwave Technology, Inc. for 2022. Such matter has been considered in the process of examining the parent company only financial statements taken as a whole and forming an opinion thereon, and we do not express an opinion on the matter individually.

The following is the description of the key audit matter in the parent company only financial statements of Universal Microwave Technology, Inc. for 2022:

#### Authenticity of Sales Revenue from Specific Customers

In Universal Microwave Technology, Inc.'s operating revenue for 2022, the growth rate of operating revenue from specific customers is significantly higher than the overall growth rate compared to the same period last year. The transaction amount of such customers is also significant to the overall operating revenue. Therefore, the authenticity of sales revenue from specific customers is considered a key audit matter for 2022.

For accounting policies and relevant disclosure information related to sales revenue recognition, please refer to Note 4 of the parent company only financial statements.

The auditors have performed the following main audit procedures for the authenticity of the sales revenue recognition from the specific customers mentioned above:

- 1. Understand and sample test the design and execution effectiveness of the main internal control system related to the authenticity of sales transaction revenue recognition.
- Review the original documents, such as original orders, shipping documents, and invoices, for specific customers, check whether the relevant transaction forms are complete, and review whether the Company's entry and payment targets and amounts match the various forms.
- 3. Review the occurrence of sales returns and allowances from specific customers after the reporting period, and send a letter to confirm whether there are any abnormal circumstances in the year-end accounts receivable.

#### Responsibilities of management and Governing body for the financial statements

Management's responsibility is to prepare the parent company only financial statements present fairly, in all material respects, according to Regulations Governing the Preparation of Financial Reports by Securities Issuers as well as maintain necessary internal control related to the preparation of the parent company only financial statements in order to ensure there is no major untrue expression on the financial statements due to fraud or error.

In preparing the parent company only financial statements, management is responsible for assessing the ability of Universal Microwave Technology, Inc. to continue as going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Universal Microwave Technology, Inc. or to cease operations, or has no realistic alternative, but to do so.

The responsibilities of the governing body (including the audit committee) include overseeing the financial reporting process of Universal Microwave Technology, Inc.

#### Auditors' responsibilities for the audit of the parent company only financial statements

Our objectives are to obtain reasonable assurance about whether the parent company only financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken in the basis of these parent company only financial statements.

As part of an audit in accordance with GAAS, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- 1. Identify and assess the risks of material misstatement of the parent company only financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for audit opinions. Because fraud may be related to conspiracy, forgery, deliberate omission, false statement or breach of internal control, the risk of a material misstatement caused by fraud which is not identified is higher than the risk of a material misstatement caused by any error.
- 2. Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the internal control effectiveness of Universal Microwave Technology, Inc.
- 3. Assess the appropriateness of management's use of accounting policies and the reasonability of the accounting estimate and relevant disclosure.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of Universal Microwave Technology, Inc. to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the parent company only financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence

obtained up to the date of our auditors' report. However, future events or conditions may cause Universal Microwave Technology, Inc. to cease to continue as a going concern.

5. Evaluate the overall presentation, structure and content of the parent company only financial statements (including the relevant notes), and whether the parent company only financial statements represent the underlying transactions and events in a manner that

achieves fair presentation.

6. We have obtained sufficient and appropriate evidence to audit the parent company only financial information of Universal Microwave Technology, Inc. to express an opinion on the parent company only financial statements. We are responsible for the guidance, supervision and execution of the audit and for forming an audit opinion on Universal

Microwave Technology, Inc.

We communicate with the governing body regarding, among other matters, the planned scope and timing of the audit and significant audit findings (including any significant deficiency in

internal controls that we identify during our audit).

We have also provided the governing body with a statement that the independence-regulated personnel of the firm to which we are affiliated have complied with the Code of Ethics for Professional Accountants with respect to independence, and communicate with the governing body about all relationships and other matters (including related protective measures) that may

be considered to affect the accountant's independence.

We have determined the key audit matter for the audit of the Parent Company Only Financial Statements of Universal Microwave Technology, Inc. for the year ended December 31, 2021 from the communications we have had with the governing body. We identified such matter in our auditor's report, except for those matters that are not permitted by law to be disclosed publicly or, in the rarest of circumstances, we decided not to communicate those matters in our auditor's report because we reasonably could expect the negative effect of such communication to

outweigh the public interest.

#### UNIVERSAL MICROWAVE TECHNOLOGY, INC.

#### NOTES TO PARENT COMPANY ONLY FINANCIAL STATEMENTS

#### FOR THE TWELVE MONTHS ENDED DECEMBER 31, 2022 AND 2021

(In thousands of New Taiwan Dollars, unless stated otherwise)

#### 1. GENERAL INFORMATION

Universal Microwave Technology, Inc. (hereinafter referred to as "the Company") began preparations on August 23, 1999, and was approved for establishment on September 7, 1999. The main business activities include the manufacturing of electronic components and the wholesale of electronic materials.

The Company's shares have been traded over the counter since January 3, 2008, at the Taipei Exchange.

The parent company only financial statements are presented in the Company's functional currency, the New Taiwan dollar.

#### 2. <u>APPROVAL OF FINANCIAL STATEMENTS</u>

The parent company only financial statements were approved by the board of directors on March 29, 2023.

## 3. <u>APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS</u>

i. Initial application of the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), Interpretations (IFRIC), and Standing Interpretations Committee (SIC) (collectively referred to as "IFRSs") approved and issued by the Financial Supervisory Commission (hereinafter referred to as the "FSC")

The application of the amended IFRSs approved and issued by the FSC will not result in significant changes to the Company's accounting policies.

ii. The IFRSs endorsed by the FSC for application starting from 2023

	Effective Date Announced
New IFRSs	by IASB
Amendments to IAS 1 - "Disclosure of Material	January 1, 2023 (Note 1)
Accounting Policy Information"	
Amendments to IAS 8 - "Definition of Accounting	January 1, 2023 (Note 2)
Estimates"	
Amendments to IAS 12 - "Deferred Tax related to	January 1, 2023 (Note 3)
Assets and Liabilities arising from a Single	
Transaction"	

- Note 1: This revision applies to reporting periods beginning on or after January 1, 2023.
- Note 2: This revision applies to accounting estimate changes and accounting policy changes occurring during reporting periods beginning on or after January 1, 2023.
- Note 3: Except for the temporary differences related to deferred income taxes recognized for lease and decommissioning obligations as of January 1, 2022, this revision applies to transactions occurring on or after January 1, 2022.

As of the date of issuance of this parent company only financial report, the Company has evaluated other revised criteria and interpretations and concluded that they will not have a significant impact on its financial condition and financial performance.

iii. New IFRSs in issue but not yet endorsed and issued into effect by the FSC

New IFRSs	Effective Date Announced by IASB (Note 1)		
Amendments to IFRS 10 and IAS 28 - "Sale or	To be determined		
Contribution of Assets between an Investor and its			
Associate or Joint Venture"			
Amendments to IFRS 16 - "Lease Liability in a Sale	January 1, 2024 (Note 2)		
and Leaseback"			
IFRS 17 "Insurance Contracts"	January 1, 2023		
Amendments to IFRS 17	January 1, 2023		
Amendments to IFRS 17 - "Initial Application of	January 1, 2023		
IFRS 17 and IFRS 9 — Comparative Information"			
Amendments to IAS 1 - "Classification of Liabilities	January 1, 2024		
as Current or Non-current"			
Amendments to IAS 1 - "Non-current Liabilities with	January 1, 2024		
Covenants"			

- Note 1: Unless otherwise stated, the above new/amended/revised standards or interpretations are effective for annual reporting periods beginning after the respective dates.
- Note 2: The seller and lessee should retrospectively apply the amendments to IFRS 16 to sale and leaseback transactions entered into after the initial application of IFRS 16.

As of the date of adoption of this parent company only financial statements, the Company is still evaluating the impact of the amendments to other standards and interpretations on the financial position and financial performance, which will be disclosed when the evaluation is completed.

#### 4. <u>SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES</u>

i. Statement of Compliance

The parent company only financial statements have been prepared in accordance with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers.

#### ii. Basis of Preparation

The parent company only financial statements have been prepared on the historical cost basis, except for financial instruments carried at fair value and net defined benefit assets recognized at the present value of the defined benefit obligation less the fair value of plan assets.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities:
- 2. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3. Level 3 inputs are unobservable inputs for the asset or liability.

In preparing the parent company only financial statements, the Company applies the equity method to its investments in subsidiaries or associates. In order to make the profit or loss for the year, other comprehensive income and equity in the parent company only financial statements the same as the profit or loss for the year, other comprehensive income and equity attributable to the owners of the Company in the consolidated financial statements, certain accounting differences between the parent company only basis and the consolidated basis are adjusted for "investments accounted for under the equity method", "share of profit or loss of subsidiaries and associates accounted for under the equity method", "share of other comprehensive income of subsidiaries and associates accounted for under the equity method" and related equity items.

- iii. Standard in determining whether the asset or liability are current or non-current Current assets include:
  - 1. Assets held mainly for transaction purposes;

- 2. Aassets expected to be realized within 12 months of the asset after the balance sheet date; and
- 3. Cash and cash equivalents (but not including cash used to exchange or clear liability within 12 months of the asset balance sheet).

#### Current liabilities include:

- 1. liabilities held mainly for transaction purposes;
- 2. liabilities due for payment within 12 months after the balance sheet date; and
- 3. the business entity does not have an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

Assets or liabilities not classified within the above definitions will be classified as non-current assets and liabilities.

#### iv. Foreign currency

When preparing financial statements, the Company translates transactions in currencies other than the functional currency of the Company (foreign currencies) into the functional currency at the exchange rates prevailing on the transaction dates.

Monetary items denominated in foreign currencies are translated at the closing rate at each balance sheet date. Exchange differences arising from the settlement of monetary items or the translation of monetary items are recognized in profit or loss in the period in which they occur.

Non-monetary items measured at fair value in foreign currencies are translated at the exchange rates prevailing on the date when the fair value was determined, and the resulting exchange differences are recognized in profit or loss in the current period. However, if the change in fair value is recognized in other comprehensive income, the resulting exchange differences are recorded as other comprehensive income.

Non-monetary items denominated in foreign currencies that are measured at historical cost are translated at the exchange rates ruling at the dates of transactions and are not retranslated.

For the purpose of preparing parent company only financial statements, assets and liabilities of foreign operations (including subsidiaries that operate in countries or currencies different from those of the Company) are translated into New Taiwan Dollars at the exchange rates prevailing on each balance sheet date. Income and expense items are translated at the average exchange rate for the period and the resulting exchange differences are included in other comprehensive income.

If the Company disposes of its entire ownership interest in a foreign operation, disposes of a partial interest in a subsidiary of a foreign operation but loses control, or disposes of an associate of a foreign operation and the retained interest is a financial asset treated according to the accounting policies of financial instruments, all cumulative exchange differences related to the foreign operation will be reclassified to profit or loss.

If a partial disposal of a subsidiary of a foreign operation does not result in a loss of control, the cumulative exchange differences are proportionally incorporated into the equity transaction calculation, but not recognized as profit or loss. In any other partial disposal of a foreign operation, the cumulative exchange differences are reclassified to profit or loss based on the proportion of the disposal.

#### v. Inventory

Inventories include raw materials, work in process and finished goods. Inventories are measured at the lower of cost or net realizable value. Comparisons between cost and net realizable value are made on an item-by-item basis, except for inventories of the same type. Net realizable value is the estimated selling price under normal circumstances, less estimated costs to complete and estimated costs to sell. The cost of inventories is calculated using the weighted-average method.

#### vi. Investment in subsidiaries

The Company uses the equity method to account for investments in subsidiaries.

A subsidiary is an entity controlled by the Company.

Under the equity method, investments are initially recognized at cost, and the carrying amount is subsequently increased or decreased by the Company's share of the subsidiary's profit or loss and other comprehensive income, and distributions. In addition, the Company recognizes changes in its share of the subsidiary's other equity interests according to its ownership percentage.

When a change in the Company's ownership interest in a subsidiary does not result in a loss of control, it is treated as an equity transaction. The difference between the carrying amount of the investment and the fair value of the consideration paid or received is recognized directly in equity.

The excess of the acquisition cost over the Company's share of the fair value of the identifiable assets and liabilities of the subsidiary acquired at the acquisition date is recognized as goodwill, which is included in the carrying amount of the investment and not subject to amortization. The excess of the Company's share of the fair value

of the identifiable assets and liabilities of the subsidiary acquired at the acquisition date over the acquisition cost is recognized as current income.

When assessing impairment, the Company considers the financial reporting of the cash-generating unit as a whole and compares its recoverable amount to the carrying amount. If the recoverable amount of the asset subsequently increases, the impairment loss is reversed and recognized as income, but the carrying amount of the asset after the reversal of the impairment loss may not exceed the carrying amount that would have been recognized, net of depreciation, if no impairment loss had been recognized. Impairment losses related to goodwill may not be reversed in subsequent periods.

When the Company loses control of a subsidiary, it measures its remaining investment in the former subsidiary at its fair value on the date control is lost, and the difference between the fair value of the remaining investment, any disposal proceeds, and the carrying amount of the investment on the date control is lost is recognized in the current period's profit or loss. In addition, the accounting treatment for all amounts recognized in other comprehensive income related to the subsidiary is the same as if the Company had directly disposed of the related assets or liabilities.

Unrealized gains on downstream transactions between the Company and its subsidiaries are eliminated in the parent company only financial statements. The profit or loss generated by upstream, downstream, and lateral transactions between the Company and its subsidiaries is recognized in the parent company only financial statements only to the extent that it is unrelated to the Company's interest in the subsidiary.

#### vii. Investment in associates

An associate is an entity in which the Company has significant influence but is not a subsidiary.

The Company uses the equity method to account for investments in associates.

Under the equity method, investments in associates are initially recognized at cost, and the carrying amount is subsequently increased or decreased by the Company's share of the associate's profit or loss and other comprehensive income and distributions. In addition, the Company recognizes changes in its share of the associate's equity interests according to its ownership percentage.

The excess of the acquisition cost over the Company's share of the fair value of the identifiable assets and liabilities of the associate at the acquisition date is recognized

as goodwill, which is included in the carrying amount of the investment and not subject to amortization. The excess of the Company's share of the fair value of the identifiable assets and liabilities of the associate at the acquisition date over the acquisition cost is recognized as current profit or loss.

When an associate issues new shares and the Company does not subscribe proportionally, resulting in a change in the ownership percentage and a corresponding increase or decrease in the carrying amount of the investment, the adjustment is made to the capital reserve - changes in the carrying amount of the associate's net equity under the equity method and the investment under the equity method. However, if the non-proportional subscription or acquisition results in a decrease in the Company's ownership interest in the associate, the amounts recognized in other comprehensive income related to the associate are reclassified according to the decrease percentage, and the accounting treatment is the same as if the associate had directly disposed of the related assets or liabilities. If the adjustment should be debited to the capital reserve, and the capital reserve balance generated by the investment under the equity method is insufficient, the difference is debited to retained earnings.

When assessing impairment, the Company compares the recoverable amount to the carrying amount of the entire investment (including goodwill), treating it as a single asset for impairment testing. The impairment loss recognized is not allocated to any component of the carrying amount of the investment, including goodwill. Any reversal of the impairment loss is recognized within the scope of the subsequent increase in the recoverable amount of the investment.

The Company ceases to use the equity method from the date its investment is no longer an associate, and its remaining interest in the former associate is measured at fair value. The difference between the fair value, disposal proceeds, and the carrying amount of the investment on the date the equity method is ceased is recognized in the current period's profit or loss. In addition, the accounting treatment for all amounts recognized in other comprehensive income related to the associate is the same as if the associate had directly disposed of the related assets or liabilities.

Profits or losses generated by upstream, downstream, and lateral transactions between the Company and its associates are recognized in the parent company only financial statements only to the extent that they are unrelated to the Company's interest in the associate.

#### viii. Property, plant and equipment

Property, plant, and equipment are recognized by cost, and then measured by cost less accumulated depreciation and accumulated impairment loss.

Self-owned land is not depreciated. Property, plant and equipment are depreciated separately over their useful lives on a straight-line basis for each significant component. The Company reviews the estimated useful lives, residual values and depreciation methods at least at the end of each year and defers the effect of changes in applicable accounting estimates.

The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss when property, plant, and equipment are derecognized.

#### ix. Intangible assets

#### 1. Separately acquired

Intangible assets with limited duration acquired separately were initially measured at cost and subsequently at cost less accumulated amortization and accumulated impairment losses. Intangible assets are amortized over their useful lives on a straight-line basis and the estimated useful lives, residual values and amortization method are reviewed at least at each year-end and the effect of changes in applicable accounting estimates is deferred. Intangible assets with indefinite useful lives are stated at cost less accumulated impairment losses.

#### 2. Derecognition

The difference between the net disposal proceeds and the carrying amount of the asset is recognized in profit or loss of the year when intangible assets are derecognized.

x. Impairment of property, plant and equipment, right-of-use assets and intangible assets (excluding goodwill)

At each balance sheet date, the Company assesses whether there is any indication that property, plant and equipment, right-of-use assets and intangible assets (excluding goodwill) may be impaired. If there is any indication of impairment, the recoverable amount of the asset is estimated, and if the recoverable amount of an individual asset cannot be estimated, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

The recoverable amount is the higher fair value less selling cost and use value. If the recoverable amount of an individual asset or cash generating unit is less than its carrying amount, the carrying amount of the asset or cash generating unit shall be reduced to its recoverable amount, with the impairment loss recognized in profit or loss.

When the following recoverable amount increases, the carrying amount of the asset or cash generating unit increases to the amount that can be recovered after the revision. However, the increased carrying amount shall not exceed that (minus amortization or depreciation) determined by the asset or cash generating unit where the impairment loss was not recognized in the previous year. The reversal of impairment loss is recognized in profit or loss.

#### xi. Financial instruments

Financial assets and financial liabilities are recognized in the Parent Company Only Statement of Financial Position when the Parent Company Only Company becomes a party to the contractual provisions of the instrument.

On initial recognition, financial assets and financial liabilities that are not measured at fair value through profit or loss are measured at fair value plus transaction costs that are directly attributable to the acquisition or issuance of the financial assets or financial liabilities. Transaction costs directly attributable to the acquisition or issue of financial assets or financial liabilities measured at fair value through profit or loss are recognized immediately in profit or loss.

#### 1. Financial assets

The transaction practice of the financial assets adopts accounting recognition and de-recognition on the transaction day.

#### (1) Measurement types

The types of financial assets held by the Company are Financial assets at FVTPL, financial assets at amortized cost, and investments in equity instruments at fair value through other comprehensive income.

#### A. Financial assets measured at FVTPL

Financial assets measured at FVTPL includes financial assets mandatorily measured at FVTPL. Financial assets mandatorily measured at FVTPL include investments in equity instruments not designated as measured at FVTOCI, and investments in debt

instruments that do not qualify for classification as measured at amortized cost or measured at FVTOCI.

Financial assets measured at FVTPL are measured at fair value, with dividends generated recognized as other income, and gains or losses from remeasurement recognized as other gains and losses. For the determination of fair value, please refer to Note 29.

#### B. Financial assets at amortized cost

The Company's investments in financial assets are classified as financial assets measured at amortized cost if both of the following conditions are met:

- a. they are held within an operating model whose objective is to hold the financial assets to collect the contractual cash flows; and
- b. the contractual terms give rise to cash flows at a specific date, which are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at amortized cost (including cash and cash equivalents, accounts receivable at amortized cost and refundable deposits) are measured at amortized cost using the effective interest method to determine the total carrying amount less any impairment loss after initial recognition, with any foreign currency exchange gain or loss recognized in profit or loss.

Interest income is calculated by multiplying the effective interest rate by the total carrying amount of the financial assets, except in the following two cases:

- a. Interest income on credit-impaired financial assets acquired or created is calculated by multiplying the credit-adjusted effective interest rate by the amortized cost of the financial assets.
- b. Interest income on credit-impaired financial assets that are not acquired or originated but subsequently become credit-impaired is computed using the effective interest rate multiplied by the amortized cost of the financial assets from the next reporting period after the impairment.

Cash equivalents include time deposits that are highly liquid, readily convertible into known amounts of cash and subject to a low risk of changes in value within 3 months from the date of acquisition and are used to meet short-term cash commitments.

#### C. Investment in equity instruments measured at FVTOCI

At initial recognition, the Company has an irrevocable option to designate investments in equity instruments that are not held for trading and for which there is contingent consideration recognized by the acquirer of the business combination to be measured at FVTOCI.

Investments in equity instruments measured at FVTOCI are measured at fair value, with subsequent changes in fair value reported in other comprehensive income and accumulated in other equity. On disposal of investments, the cumulative gain or loss is transferred directly to retained earnings and is not reclassified to profit or loss.

Dividends on investments in equity instruments measured at FVTOCI are recognized in profit or loss when the right to receive payments from the Company is established, unless it is clear that the dividend represents a partial recovery of the cost of the investment.

# (2) Impairment of financial assets

The Company assesses impairment losses on financial assets measured at amortized cost (including accounts receivable) at each balance sheet date based on expected credit losses.

Accounts receivable are recognized as an allowance for loss based on expected credit losses during the period of duration. Other financial assets are first evaluated to determine whether there is a significant increase in credit risk since initial recognition. If not, they are recognized as an allowance for loss based on expected credit losses over 12 months, and if so, based on expected credit losses over the duration period.

Expected credit losses represent the weighted-average credit losses based on the risk of default. 12-month expected credit losses represent the expected credit losses arising from possible defaults of financial instruments within 12 months after the reporting date. The 12-month expected credit losses represent the expected credit losses arising from all possible defaults of the financial instruments during the 12-month period after the reporting date.

For internal credit risk management purposes, the Company determines that a financial asset is in default if there is internal or external information indicating that it is no longer probable that the debtor will settle the obligation without considering the collateral held.

The carrying amount of all financial assets is reduced through an allowance account, except for the allowance for losses on investments in debt instruments measured at fair value through other comprehensive income, which is recognized in other comprehensive income and the carrying amount is not reduced.

# (3) Derecognition of financial assets

The Company derecognizes financial assets only when the contractual rights to the cash flows from the financial assets have lapsed or when the financial assets have been transferred and substantially all the risks and rewards of ownership of the assets have been transferred to other enterprises.

When financial assets are derecognized in their entirety at amortized cost, the difference between the carrying amount and the consideration received is recognized in profit or loss. When investments in equity instruments measured at fair value through other comprehensive income are derecognized as a whole, the cumulative gain or loss is transferred directly to retained earnings and is not reclassified to profit or loss.

#### 2. Equity instruments

Debt and equity instruments issued by the Company are classified as financial liabilities or equity based on the substance of the contractual agreements and the definitions of financial liabilities and equity instruments.

Equity instruments issued by the Company are recognized at the amount of the acquisition price less direct issuance costs.

#### 3. Financial liability

# (1) Subsequent measurement

The financial liabilities of the Company are measured at amortized cost using the effective interest method.

#### (2) Derecognition of financial liability

Any difference between the carrying amount of a financial liability at the time of derecognition and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

#### xii. Income recognition

The Company allocates the transaction price to each performance obligation after the performance obligation is identified in the customer contract and recognizes revenue when each performance obligation is satisfied.

#### 1. Merchandise sales revenue

Revenue from the sale of goods comes from the sales of communication components and materials. As communication components and materials are delivered to the designated location, fulfilling the performance obligation, customers have the right to use the goods at a specified price and bear the primary responsibility for reselling the goods, as well as the risk of obsolescence. The Company recognizes revenue and accounts receivable at that point in time. Advance payments for product sales are recognized as contract liabilities.

Upon processing with materials supplied, control of the processed products is not transferred, therefore, no revenue is recognized upon materials supplied.

#### 2. Service revenue

Service revenue is derived from product calibration, processing, and maintenance services.

As the Company provides product calibration, processing, and maintenance services, customers simultaneously obtain and consume performance benefits, and the related revenue is recognized when the services are provided.

#### xiii. Lease

The Company assesses whether a contract is (or contains) a lease at the contract inception date.

#### 1. The Company as lessor

If the lease clauses transfer nearly all risks and compensation associated with the assets to the lessee, the lease shall be classified as finance lease. All other leases shall be classified as business lease.

Under operating leases, lease payments, net of lease incentives, are recognized as income on a straight-line basis over the term of the relevant lease. The original direct cost incurred in acquiring an operating lease is added to the

carrying amount of the subject asset and recognized as an expense on a straight-line basis over the lease term.

#### 2. The Company as lessee

Right-of-use assets and lease liabilities are recognized at the inception date of the lease, except for leases of low-value subject assets to which a recognition exemption applies and short-term leases where lease payments are recognized as an expense on a straight-line basis over the lease term.

Right-of-use assets are measured initially at cost (comprising the original measurement of the lease liability, lease payments made prior to the commencement date of the lease less lease incentives received, original direct cost and estimated cost to reinstate the subject asset) and subsequently at cost less accumulated depreciation and accumulated impairment losses, with adjustments for remeasurement of the lease liability. Right-of-use assets are presented separately on Statement of Financial Position.

Right-of-use assets are depreciated on a straight-line basis from the commencement date of the lease to the earlier of the end of the useful life or the end of the lease term.

Lease obligations are measured initially at the present value of the lease payments (including fixed benefits received). If the implied interest rate of the lease is readily determinable, the lease payments are discounted using that rate. If the rate is not readily determinable, the lessee's incremental borrowing rate is used.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, and interest expenses are allocated over the lease term. If changes in lease terms, residual value guarantees, the assessment of purchase options for the underlying asset, or indices or rates used to determine lease payments result in changes in future lease payments, the Company remeasures lease liabilities and adjusts right-of-use assets accordingly. However, if the carrying amount of right-of-use assets has been reduced to zero, any remaining remeasurement amounts are recognized in profit or loss. Lease liabilities are presented separately on the balance sheet.

#### xiv. Borrowing costs

All other borrowing costs are recognized as expenses in the period in which they occur.

#### xv. Government grants

Government grants are recognized only when there is reasonable assurance that the Company will comply with the conditions attached to the grant and that the grant will be received.

Government grants related to income are recognized in profit or loss on a systematic basis over the periods in which the Company recognizes the related costs as expenses.

#### xvi. Employee benefits

# 1. Short-term employee benefits

The liability related to short-term employee benefits is measured as the non-discounted amount expected to be paid in exchange for employee services.

# 2. Post-employment benefits

Defined benefit pension plans are recognized as expenses over the period of service of the employees.

The defined benefit cost (including service cost, net interest, and remeasurement) of a defined benefit pension plan is calculated using the projected unit credit method. Service cost (including current service cost) and net interest on the net defined benefit liability (asset) are recognized as employee benefit expenses when incurred. Remeasurement (including actuarial gains and losses and return on plan assets, excluding interest) is recognized in other comprehensive income and retained earnings when incurred, and is not reclassified to profit or loss in subsequent periods.

The net defined benefit liability (asset) is the funding shortfall (surplus) of the defined benefit pension plan. Net defined benefit assets must not exceed the present value of any refund of contributions from the plan or the reduction in future contributions.

## xvii. Share-based payment arrangements

#### 1. Employee stock options

Employee stock options are recognized as expenses on a straight-line basis over the vesting period, based on the fair value of the equity instruments on the grant date and the best estimate of the number of options expected to vest. Capital reserve—employee stock options are adjusted simultaneously. If the options vest immediately on the grant date, the expense is recognized in full on that date. The grant date for the Company's cash capital increase reserved for

employee subscription is the date when the number of shares subscribed by employees is confirmed.

The Company revises its estimate of the number of employee stock options expected to vest at each balance sheet date. If the original estimate is revised, the effect of the revision is recognized in profit or loss, so that the cumulative expense reflects the revised estimate, and the capital reserve—employee stock options is adjusted accordingly.

2. Equity-settled share-based payment arrangements with subsidiary employees Employee stock options granted by the Company to subsidiary employees, settled in the Company's equity instruments, are considered capital contributions to the subsidiary. They are measured at the fair value of the equity instruments on the grant date and recognized as an increase in the carrying amount of the investment in the subsidiary over the vesting period, with a corresponding adjustment to the capital reserve—employee stock options.

#### xviii. Income tax

Income tax expense is the sum of current income taxes and deferred income taxes.

#### 1. Current income tax

The Company determines the current income (loss) in accordance with the regulations of each jurisdiction in which it files income tax returns and calculates the income tax payable (recoverable) accordingly.

The income tax on undistributed earnings under the Income Tax Act of the ROC is recognized in the year of the resolution of the shareholders' meeting.

Adjustments to prior years' income tax payable are included in the current period's income tax.

#### 2. Deferred income tax

Deferred income tax is calculated based on the temporary differences between the carrying amount of assets and liabilities on the books and the basis for the calculation of taxable income.

Deferred tax liabilities are generally recognized for all taxable temporary differences, while deferred tax assets are recognized when it is probable that there will be taxable income available for the deduction of temporary differences, losses, and resulting income tax offsets.

Deferred income tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries, except where the Company can control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred income tax assets are recognized for deductible temporary differences associated with such investments only to the extent that it is probable that sufficient taxable income will be available to allow the temporary differences to be realized and the temporary differences are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced for those where it is no longer probable that there will be sufficient taxable income to allow all or part of the assets to be recovered. Deferred tax assets not previously recognized as such are also reviewed at each balance sheet date and the carrying amount is increased for those where it is probable that taxable income will be available to recover all or part of the assets.

Deferred tax assets and liabilities are measured by the tax rate of the expected liabilities settlement or assets realization in the current period, according to the tax rate and the tax law which have been legalized or substantively legalized on the balance sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences of the way in which the Company is expected to recover or pay off the carrying amount of its assets and liabilities on the balance sheet date.

#### 3. Current and deferred tax

The current and deferred tax are recognized in profit or loss, provided that the current and deferred tax in relation to the items recognized in other comprehensive income or directly included in equity are recognized in other comprehensive income or directly included in equity, respectively.

# 5. <u>CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION</u> UNCERTAINTY

When the Company adopts an accounting policy, management must make relevant judgments, estimates, and assumptions of relevant information that is difficult to obtain from other sources based on historical experience and other relevant factors.

The Company has taken into consideration the recent development of the COVID-19 pandemic in our country and its potential impact on the economic environment in its estimates of cash flow projections, growth rates, discount rates, and profitability in relation to significant accounting estimates. The management will review the estimates and underlying assumptions on an ongoing basis. If an amendment to an estimate affects only the current period, the amendment is recognized in the period in which it is made. If an amendment to an accounting estimate affects both the current and future periods, the amendment is recognized in both the current and future periods.

# Key sources of estimation and assumption uncertainty

# i. Estimated impairment of accounts receivable

The estimated impairment of accounts receivable is based on the Company's assumptions about default probabilities and loss rates upon default. The Company considers historical experience, current market conditions, and forward-looking information in formulating assumptions and selecting input values for impairment assessment.

#### ii. Impairment of goodwill in investments in subsidiaries

When determining whether goodwill included in investments in subsidiaries is impaired, the goodwill acquired on the acquisition date is allocated to the cash-generating units that are expected to benefit from the synergies of the combination, and the recoverable amount of the allocated goodwill cash-generating units is estimated. To calculate the recoverable amount, management should estimate the future cash flows expected to be generated from the allocated goodwill cash-generating units and determine the appropriate discount rate to be used in calculating the present value. If actual cash flows are less than expected, significant impairment losses may arise.

# 6. <u>CASH AND CASH EQUIVALENTS</u>

	December 31, 2022	December 31, 2021

The Company invests in the aforementioned common stocks for medium-to-long-term strategic purposes and expects to profit from long-term investments. The Company's management believes that recognizing short-term fair value fluctuations of these investments in profit or loss is inconsistent with the aforementioned long-term investment plan, and therefore chooses to designate these investments as measured at FVTOCI.

TOP TAIWAN VIII VENTURE CAPITAL CO., LTD. returned share capital of \$2,288 thousand and \$1,300 thousand in 2022 and 2021, respectively, due to capital reduction. In 2022, the Company sold 152 thousand shares of PCL Technologies Inc., and the related unrealized loss of \$1,302 thousand in other equity - Financial assets at FVTOCI was transferred to retained earnings.

In 2021, the Company sold 60 thousand shares of Elite Material Co., Ltd., and the related unrealized gain of \$115 thousand in other equity - financial assets at FVTOCI was transferred to retained earnings.

The Company recognized dividend income of \$13,369 thousand and \$8,464 thousand in 2022 and 2021, respectively.

#### Accounts receivable

The Company's average credit period for product sales is 30 to 120 days; due to the short credit period, interest is not calculated.

To control credit risk, the Company assesses the credit quality of individual customers and determines credit limits through an internal credit rating system. It also conducts regular reviews based on individual customers' historical transaction records, financial status, and other monitoring procedures to ensure that the Company's accounts receivable are primarily from long-term, creditworthy customers with no default records. In addition, the Company reviews the recoverable amount of receivables on each balance sheet date to ensure that appropriate impairment losses are recognized for receivables exposed to potential credit risk.

The Company recognizes an allowance for impairment of accounts receivable based on expected credit losses over the life of the receivables. Expected credit losses over the life of the receivables are calculated using a provision matrix, which considers customers' past default records, current financial conditions, regional industry economic conditions, and outlook. Since the Company's historical credit loss experience shows no significant differences in loss patterns among different customer groups, the provision matrix does not further distinguish customer groups and only sets expected credit loss rates based on the number of days accounts receivable are overdue.

If there is evidence that the counterparty is facing severe financial difficulties and the Company cannot reasonably expect to recover the amount, such as the counterparty undergoing liquidation, the Company will write off the related accounts receivable directly but will continue to pursue collection activities. Amounts recovered from these pursuits will be recognized in profit or loss.

The following table details the loss allowance of notes and accounts receivable based on the Company's allowance matrix:

#### December 31, 2022

	Not past due	Overdue 1-60 days	Overdue 61-90 days	Overdue 91-120 days	Overdue more than 120 days	Total
Gross carrying amount Allowance for impairment loss	\$ 193,977	\$ 58,992	\$ 465	\$ 10,335	\$ 903	\$ 264,672
(lifetime ECLs) Amortized cost	( <u>321</u> ) <u>\$ 193,656</u>	( <u>102</u> ) <u>\$ 58,890</u>	<u>\$ 465</u>	( <u>18</u> ) <u>\$ 10,317</u>	( <u>1</u> ) <u>\$ 902</u>	( <u>442</u> ) <u>\$ 264,230</u>
December 31, 2021						
	Not past due	Overdue 1-60 days	Overdue 61-90 days	Overdue 91-120 days	Overdue more than 120 days	Total
Gross carrying amount Allowance for impairment loss	\$ 149,092	\$ 25,495	\$ -	\$ 338	\$ 316	\$ 175,241
(lifetime ECLs) Amortized cost	$(\frac{73}{\$ 149,019})$	(	<u>-</u>	\$ 338	\$ 316	(

Information on the changes in the allowance for losses on accounts receivable is as follows:

	20	022	20	)21
Opening balance	\$	85	\$	85
Add: Impairment losses				
recognized this year		357		<u> </u>
Closing balance	<u>\$</u>	442	<u>\$</u>	85

# 11. <u>INVENTORIES</u>

	December 31, 2022	December 31, 2021
Finished goods	\$ 22,309	\$ 21,888
Work-in-process	12,980	12,055
Semi-finished goods	32,096	40,458
Raw materials	13,180	11,295
	<u>\$ 80,565</u>	<u>\$ 85,696</u>

The cost of goods sold related to inventory for 2022 and 2021 were \$405,632 thousand and \$352,142 thousand, respectively.

The cost of goods sold for 2022 and 2021 included inventory price declines and idle inventory recovery gains of \$1,948 thousand and \$2,547 thousand, respectively, mainly due to active disposal of idle inventory.

# 12. <u>INVESTMENTS ACCOUNTED FOR USING THE EQUITY METHOD</u>

	December 31, 2022	December 31, 2021

Please refer to Table 5 for details of the Company's indirectly held investment subsidiaries.

1. The Company has been approved by the Investment Review Committee of the Ministry of Economic Affairs to invest USD 15,160 thousand abroad in Samoa, which is then re-invested in Hong Kong and indirectly invested in Mainland China through Hong Kong. The Company has established UMT Holdings (Samoa) Limited (hereinafter referred to as UMT Samoa) in Samoa, and UMT Holdings (HK) Limited (hereinafter referred to as UMT HK) in Hong Kong. As of December 31, 2022, the Company has remitted a total of USD 12,031 thousand into UMT Samoa, of which USD 1,850 thousand was invested in UMT HK, and then USD 1,800 thousand was re-invested in UNIVERSAL MICROWAVE TECHNOLOGY (KUNSHAN) CO., LTD. (hereinafter referred to as UMT KUNSHAN) with a 100% shareholding. UMT KUNSHAN further re-invested RMB 5,000 thousand in Universal Microwave Technology (Suzhou) Co., Ltd. (hereinafter referred to as UMT Suzhou) with a 100% shareholding. Due to market factors and management strategy considerations, the Company's board of directors resolved in November 2020 to dissolve and liquidate UMT Suzhou, which was completed in February 2021.

In addition, the Company has re-invested in Radiation Technology, Inc. (hereinafter referred to as Radiation Technology) through UMT Samoa.

Radiation Technology's shares have been listed for trading on the Taipei Exchange since December 2, 2015.

As of December 31, 2022, the Company holds a 53.54% stake in Radiation Technology through UMT Samoa. Moreover, for long-term investment considerations, the Company has also purchased a 2.05% stake in Radiation Technology from non-controlling interests in the open market.

- 2. (1) In April 2021, GENTON TECH CORPORATION's board of directors resolved to carry out a cash capital increase by issuing 1,050 thousand common shares, raising \$16,800 thousand. The Company did not subscribe according to its shareholding ratio, which decreased from 64.49% to 56.97%, resulting in a reduction of capital reserve recognition of changes in the ownership interests in subsidiaries by \$4,041 thousand.
  - (2) In May 2022, GENTON TECH CORPORATION's board of directors resolved to carry out a cash capital increase by issuing 2,000 thousand

common shares, raising \$32,000 thousand. The Company did not subscribe according to its shareholding ratio, which decreased from 56.97% to 53.60%, resulting in a reduction of capital reserve - recognition of changes in the ownership interests in subsidiaries by \$1,323 thousand.

- 3. In consideration of integrating group resources and enhancing overall operational efficiency, the Company and its subsidiary Radiation Technology resolved in their March 2021 board meetings to acquire all shares of JOYMAX ELECTRONICS CO., LTD. held by Radiation Technology. The purchase price was \$280,730 thousand, and the share transfer procedure was completed in May 2021. Additionally, JOYMAX ELECTRONICS CO., LTD. resolved in its September 2021 board meeting to carry out a cash capital reduction plan, with a reduction amount of \$45,984 thousand.
- 4. Subsidiary UMT Investment Co., Ltd (hereinafter referred to as UMT Investment) was registered at the Ministry of Economic Affairs in May 2018, with a paid-in capital of \$60,000 thousand.

<u>Impairment assessment of investment premiums arising from mergers and</u> acquisitions

The Company's investments accounted for using the equity method include (1) the excess of the investment cost in acquiring a 95% stake in UMTEK TELECOM LIMITED in June 2011 through its subsidiary UMT Samoa and its reinvestment in Radiation Technology Inc. over the net value of the acquired shares (USD 2,827 thousand) and (2) the excess of the investment cost in acquiring GENTON TECH CORPORATION in October 2017 over the net value of \$60,778 thousand. As of December 31, 2022, the total balance of the aforementioned excess amounts was \$106,754 thousand.

The Company assessed the net assets used in the operations of the aforementioned companies for any impairment in value according to the provisions of International Financial Reporting Standards. Impairment was assessed based on the following cash-generating units:

As of December 31, 2022, the total carrying amount of net assets used in the operations of this cash-generating unit was \$762,031 thousand, including goodwill of \$63,933 thousand and excess attributable to individual assets of \$18,072 thousand. The Company's management assessed the recoverable

amount based on the value in use of these net assets, with a relevant discount rate of 20.81%.

The main key assumptions affecting the recoverable amount assessment and the methods for determining the values of each main key assumption are described below:

- (1) Expected revenue growth rate: Revenue is estimated based on the projected global growth rate for antenna, radio frequency cable, radio frequency connector, and wire harness products.
- (2) The ratio of cost of sales before depreciation and amortization to revenue is estimated based on the actual ratio in 2022.
- (3) Expected operating expenses: Estimated annual operating expenses are based on the actual ratio of operating expenses to revenue in 2022.

The recoverable amounts calculated based on the above key assumptions are higher than the carrying amount of net assets as of December 31, 2022. After assessment, there is no risk of asset impairment.

2. Communication Network Engineering Services - GENTON TECH CORPORATION

As of December 31, 2022, the total carrying amount of net assets used in the operations of this cash-generating unit was \$184,647 thousand, including goodwill of \$19,602 thousand and excess attributable to individual assets of \$5,147 thousand. The Company's management assessed the recoverable amount based on the value in use of these net assets, with a relevant discount rate of 10.06%.

The main key assumptions affecting the recoverable amount assessment and the methods for determining the values of each main key assumption are described below:

- (1) Expected revenue growth rate: Revenue is estimated based on the projected global growth rate of 4G/5G communication equipment for antennas, connectors, wire harnesses, and new products, as well as an increase in the market share in the communication market in Taiwan.
- (2) The ratio of cost of sales before depreciation and amortization to revenue is estimated based on the actual ratio in 2022.
- (3) Expected operating expenses: Estimated annual operating expenses are based on the actual ratio of operating expenses to revenue in 2022.

The recoverable amounts calculated based on the above key assumptions are higher than the carrying amount of net assets as of December 31, 2022. After assessment, there is no risk of asset impairment.

The share of profit or loss and other comprehensive income of subsidiaries accounted for using the equity method in 2022 and 2021 is recognized based on the financial statements audited by accountants for the same period.

ii. Investments in associates (as of December 31, 2022 and 2021: none)Summary information for individually immaterial associates

Terasilic Co.,Ltd.

	For the four months
	ended April 30,
	2021
The Company's share of:	
Net profit for the period	
from continuing operations	(\$ 5,360)

The Company did not participate in the cash capital increase of Terasilic Co.,Ltd. in May 2021, resulting in a reduced shareholding ratio of 14.54%. The Company assessed the loss of significant influence over Terasilic Co.,Ltd. and reclassified it as financial assets at FVTOCI - non-current. The gain or loss on disposal was calculated based on the fair value on that date, with the related calculations as follows:

Disposal proceeds	\$	-
Add: Fair value of the remaining investment (14.54%)		82,512
Less: Carrying amount of investment on the date of losing		
significant influence	(	43,730)
Add: Capital reserve - changes in associates accounted for		
using the equity method		27,456
	\$	66,238

The Company leases its own land and buildings under operating leases, mainly for use as employee dormitories, with lease terms of 1 to 2 years. At the end of the lease term, the lessee does not have preferential purchase rights to the assets.

The Company had no interest capitalization in 2022 and 2021.

Property, plant and equipment are depreciated on a straight-line basis over their useful lives as follows:

Land improvements	3 years
Buildings	·
Main building of	20-50 years
the house	
Ancillary	3-20 years
facilities of the house	
Machinery and	5-10 years
equipment	
Mold equipment	2-5 years
Test equipment	5-10 years
Transportation	5-7 years
equipment	
Office equipment and	3-10 years
others	

As of December 31, 2022 and 2021, the Company assessed that there were no indications of impairment for property, plant, and equipment.

The Company has provided part of its land and buildings as collateral for bank loan facilities. Please refer to Note 31.

# 14. <u>LEASE ARRANGEMENTS</u>

# i. Right-of-use assets

	December 31, 2022	December 31, 2021
Carrying amounts Transportation equipment	<u>\$ 1,811</u>	\$ 2,280
	2022	2021
Additions to the right-of-use assets	<u>\$ 700</u>	<u>\$ 3,156</u>
Depreciation expenses for right-of-use assets		
Transportation equipment	<u>\$ 1,169</u>	<u>\$ 876</u>

# ii. Lease liabilities

	December 31, 2022	December 31, 2021
Carrying amounts	·	
Current	<u>\$ 1,291</u>	<u>\$ 1,051</u>
Non-current	<u>\$ 530</u>	<u>\$ 1,235</u>

Range of discount rate for lease liabilities was as follows:

	December 31, 2022	December 31, 2021
Transportation equipment	0.70%-0.90%	0.70%

# iii. Important leasing activities and terms

The Company leases several transportation equipment for business use, with lease terms of 3 years. There are no provisions for renewal or purchase rights in these leases.

#### iv. Other lease information

	2022	2021
Expense relating to short-term		
leases	<u>\$ 755</u>	<u>\$ 1,311</u>
Total cash (outflow) for leases	(\$ 1,945)	(\$ 2,491)

The Company chooses to exempt certain assets that meet the criteria for short-term leases of office equipment, transportation equipment, and low-value asset leases from recognition of right-of-use assets and lease liabilities.

The Company also leases its own property, plant and equipment through operating leases, which are described in Note 13.

# 15. <u>INTANGIBLE ASSETS</u>

	2022	2021
	Computer software	Computer software

	<u>\$ 6,994</u>	<u>\$ 7,737</u>

#### 21. <u>RETIREMENT BENEFIT PLANS</u>

# i. Defined contribution plans

The Company adopted a pension plan under the Labor Pension Act (LPA), which is a state-managed defined contribution plan. Under the LPA, an entity makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages.

#### ii. Defined benefit plans

The Company's pension system, implemented according to Taiwan's Labor Standards Act, is a government-managed defined benefit retirement plan. Payments for employee pensions are calculated based on years of service and the average salary of the 6 months prior to the approved retirement date. The Company contributes 2% of the total monthly salary for employee pensions, which are deposited into a special account at Bank of Taiwan under the name of the Labor Pension Reserve Fund Supervisory Committee. The competent authorities approved the Company's application to stop contributing to the pension fund in 2022 and 2021. The special account is managed by the Bureau of Labor Funds of the Ministry of Labor, and the Company has no right to influence the investment management strategy.

The amounts of defined benefit plans recognized in the parent company only balance sheet are as follows:

	December 31, 2022	December 31, 2021
Present value of defined benefit		
obligation	\$ 6,191	\$ 6,931
Fair value of plan assets	( <u>8,077</u> )	$(\underline{7,463})$
Net defined benefit assets	(\$ 1,886)	(\$ 532)

Net defined benefit assets changes are as follows:

	Present value		
	of defined		
	benefit	Fair value of	Net defined
	obligation	plan assets	benefit assets
Balance at January 1, 2022	\$ 6,931	(\$ 7,463)	(\$ 532)

December 31, 2021	\$ 6,931	( <u>\$ 7,463</u> )	( <u>\$ 532</u> )

The Company is exposed to the following risks due to the pension system under the "Labor Standards Act":

1. Investment risk: The Bureau of Labor Funds of the Ministry of Labor invests the labor pension funds in domestic and foreign equity securities, debt securities, and bank deposits through self-management and entrusted management. However, the plan assets' distributable income is calculated based on a return not lower than the local bank's 2-year fixed deposit interest rate.

- 2. Interest rate risk: A decline in government bond and corporate bond interest rates will increase the present value of defined benefit obligations, but the return on debt investments in plan assets will also increase. Both have a partially offsetting effect on the net defined benefit liabilities.
- 3. Salary risk: The calculation of the present value of defined benefit obligations takes into account the future salaries of plan members. Therefore, an increase in plan members' salaries will increase the present value of defined benefit obligations.

The present value of the Company's defined benefit obligations is actuarially calculated by a qualified actuary, with the following significant assumptions as of the measurement date:

	December 31, 2022	December 31, 2021
Discount rate	1.50%	0.50%
Expected salary increase rate	2.75%	2.75%

If there are reasonable possible changes in significant actuarial assumptions, assuming all other assumptions remain unchanged, the amounts by which the present value of defined benefit obligations would increase (decrease) are as follows:

	December 31, 2022	December 31, 2021	
Discount rate			
Increase by 0.25%	( <u>\$ 186</u> )	( <u>\$ 231</u> )	
Decrease by 0.25%	<u>\$ 194</u>	<u>\$ 241</u>	
Expected salary increase rate			
Increase by 0.25%	<u>\$ 188</u>	<u>\$ 231</u>	
Decrease by 0.25%	( <u>\$ 182</u> )	( <u>\$ 223</u> )	

Since actuarial assumptions may be interrelated, the likelihood of a single assumption change is small, so the sensitivity analysis above may not reflect the actual changes in the present value of defined benefit obligations.

	December 31, 2022	December 31, 2021

- 1. This type of capital reserve can be used to cover losses or, when the Company has no losses, to distribute cash dividends or increase capital, but the increase in capital is limited to a certain ratio of paid-in capital per year.
- 2. Capital reserves generated from investments accounted for using the equity method cannot be used for any purpose other than covering losses.
- 3. This type of capital surplus represents the equity transaction effects recognized due to changes in the ownership interests of subsidiaries that the Company has

not actually acquired or disposed of, or adjustments to the capital surplus of subsidiaries recognized by the Company using the equity method.

#### iii. Retained earnings and dividend policy

According to the profit distribution policy in the Company's Articles of Incorporation, if the Company has profits for the year, after paying taxes and making up for accumulated losses, 10% will be set aside as a legal surplus reserve, and the remaining amount will be appropriated or reversed as special surplus reserves according to laws and regulations. If there is still a balance, combined with the accumulated undistributed profits, the board of directors will propose a profit distribution proposal to be submitted to the shareholders' meeting for a resolution to distribute dividends to shareholders. For the revised Articles of Incorporation's employee and director remuneration distribution policy, please refer to Note 23 (viii) Compensation of employees and remuneration of directors.

The Company's dividend distribution method can be either stock dividends or cash dividends, with the ratio of cash dividends not less than 10%. Each year, the board of directors proposes a distribution plan to be approved by the shareholders' meeting.

Appropriation of earnings to the legal reserve shall be made until the legal reserve equals the Company's paid-in capital. The legal reserve may be used to offset deficit. If the Company has no deficit and the legal reserve has exceeded 25% of the Company's paid-in capital, the excess may be transferred to capital or distributed in cash.

The Company held its annual shareholders' meeting on June 15, 2022, and July 9, 2021, and resolved to approve the profit distribution plans for the fiscal years 2021 and 2020 as follows:

	Earnings appropriation		Dividend per share (NT\$)	
	2021	2020 2021 2		2020
Legal reserve	\$ 23,706	\$ 12,516		
Cash dividends	198,908	113,129	\$ 3.20	\$ 1.82

Additionally, the Company's annual shareholders' meetings held on June 15, 2022, and July 9, 2021, resolved to distribute cash from the capital reserve - share issuance premium of \$49,727 thousand and \$42,268 thousand, respectively, with a cash distribution of \$0.8 and \$0.68 per share.

On March 29, 2023, the Company's board of directors proposed the following 2022 profit distribution plan:

	Earnings	Dividend per share
	appropriation	(NT\$)
Legal reserve	\$ 27,200	
Special reserve	30,214	
Cash dividends	223,771	\$ 3.6

In addition, on March 29, 2023, the Company's board of directors proposed to distribute cash from the capital reserve - share issuance premium of \$24,863 thousand, with a cash distribution of \$0.4 per share.

The 2022 profit distribution plan is subject to the resolution of the annual shareholders' meeting scheduled to be held on June 21, 2023.

# 23. <u>NET INCOME FROM CONTINUING OPERATIONS</u>

Continuing operations net profit includes the following items:

# viii. Compensation of employees and remuneration of directors

The Company accrues employees' compensation and board directors' remuneration at the rates of no less than 8% and no higher than 3%, respectively, of net profit before income tax, compensation of employees and remuneration of directors. The estimated compensation of employees and the remuneration of directors for the years 2022 and 2021 were resolved by the board of directors on March 29, 2023 and March 24, 2022, respectively, as follows:

#### Accrual rate

	2022	2021
Compensation of employees	8.00%	8.00%
Remuneration of directors	1.91%	1.94%

# Amount

	20	2022			2021		
	Cash	Sto	ock	Cash	Stock		
Compensation of employees	\$ 29,343	\$	-	\$ 23,506	\$ -		
Remuneration of directors	6,999		-	5,696	-	-	

If there is a change in the amounts after the annual parent company only financial statements are authorized for issue, the differences are recorded as a change in the accounting estimate.

There is no difference between the actual amounts of compensation of employees and remuneration of directors paid and the amounts recognized in the parent company only financial statements for the year ended December 31, 2021 and 2020. Information on the compensation of employees and remuneration of directors resolved by the Company's board of directors is available at the Market Observation Post System website of the Taiwan Stock Exchange.

# 24. <u>INCOME TAX FROM CONTINUING OPERATIONS</u>

i. The main components of income tax expenses recognized in profit or loss:

	2022	2021
Current tax		
In respect of the current		
period	\$ 45,063	\$ 19,391

# v. Income tax assessments

The income tax returns of the Company through 2020 have been assessed by the tax authorities.

# 25. <u>EARNINGS PER SHARE</u>

		Unit: NT\$/share
	2022	2021
Basic earnings per share	\$ 4.36	\$ 3.81
Diluted earnings per share	<u>\$ 4.34</u>	<u>\$ 3.80</u>

The earnings and weighted-average number of ordinary shares outstanding used in the computation of earnings per share were as follows:

# Net Profit for the Year

	2022	2021
Net profit used in the computation of basic per share	\$ 271,000	<u>\$ 236,644</u>
Net profit used in the computation of diluted earnings per share	<u>\$ 271,000</u>	<u>\$ 236,644</u>
Shares		(In Thousands of Shares)
	2022	2021
Weighted-average number of ordinary shares used in the computation of basic earnings		

per share

Effects of potentially dilutive
ordinary shares:

Compensation of employees

Weighted-average number of
ordinary shares used in the
computation of diluted earnings
per share

62,407

62,302

If the Company offered to settle compensation paid to employees in cash or shares, the Company assumed the entire amount of the compensation will be settled in shares and the resulting potential shares were included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

# 26. Share-based payment arrangements

#### The Company's employee stock option plan

On March 10, 2021, the Company's board of directors resolved to issue 3,000 units of employee stock options, with each unit entitling the holder to subscribe for 1,000 common shares, which will be delivered through the issuance of new shares. The eligible recipients are employees of the Company and its subsidiaries with a controlling interest who have met certain seniority and performance standards. The stock options have a term of 4 years and 2 months, and after 2 years from the grant date, the option holders may exercise a certain proportion of their granted options. In the event of changes in the Company's common shares, the stock option exercise price will be adjusted according to a specified formula.

The relevant information on employee stock options is as follows:

	2022		2021	
-		Weighted		Weighted
		average		average
		exercise		exercise
		price		price
Employee stock options	Unit	(NT\$)	Unit	(NT\$)
Outstanding at the beginning				
of the year	3,000	\$ 70.0	-	\$ -
Granted during the year		-	3,000	72.6
Outstanding at the end of the				
year	3,000	68.3	<u>3,000</u>	70.0
Exercisable stock options at				
year-end				
Weighted average fair value of				
stock options granted during				
the year (NT\$)	<u>\$ -</u>		<u>\$ 17.51</u>	

As of the balance sheet date, the relevant information on outstanding employee stock options is as follows:

D	ecember 31, 202	22	D	ecember 31, 202	21
		Weighted			Weighted
		average			average
	Range of	remaining		Range of	remaining
Issuance	exercise	contractual	Issuance	exercise	contractual
date	prices (NT\$)	life (years)	date	prices (NT\$)	life (years)
2021.4.23	\$68.3	2.50	2021.4.23	\$70.0	3.50

The Company used the Black-Scholes valuation model for employee stock options granted on April 23, 2021. The input values used in the valuation model are as follows:

	April 23, 2021
Stock price on grant date	\$72.60
Exercise price	\$72.60
Expected volatility	31.39%-32.84%
Contractual life	4 years and 2 months
Expected dividend yield	0%
Risk-free interest rate	0.20%-0.25%

The expected volatility is based on the historical stock price volatility.

The fair value method was used to calculate the employee stock option compensation cost of the aforementioned issued stock options, which amounted to \$52,518 thousand. Salary expenses and capital reserves - employee stock options of \$16,533 thousand and \$11,022 thousand were recognized for 2022 and 2021, respectively, using the straight-line method over the vesting period.

#### 27. ACQUISITION OF SUBSIDIARY (December 31, 2022: none)

	Main operating		Percentage of voting rights acquired / acquisition	Consideration
	activities	Acquisition date	ratio (%)	transferred
JOYMAX ELECTRONIC S CO., LTD.	Sales of computers, electronic products, communicatio n equipment, and their component products	May 31, 2021	99.99	\$ 280,730

The Company's acquisition of JOYMAX ELECTRONICS CO., LTD. was based on the consideration of integrating group resources and enhancing overall operational efficiency. For a description of the acquisition of JOYMAX ELECTRONICS CO., LTD., please refer to Note 12 of the Company's 2022 consolidated financial statements.

#### 28. CAPITAL RISK MANAGEMENT

The purpose of the Company's capital management policy is to ensure the Company's continued operating ability, to maximize returns for shareholders, and to provide benefits for other stakeholders. To ensure the achievement of these goals, the Company needs to maintain adequate capital to support the expansion and upgrading of its plants and equipment. Therefore, the Company's capital management aims to ensure that it has the necessary financial resources and operating plans to support the operating capital, capital expenditures, research and development expenses, debt repayments, and dividend payments required for the next 12 months. The Company is not subject to any external capital requirements.

The Company's management periodically reviews its capital structure, considering the costs and risks involved in different capital structures. Generally, the Company adopts a prudent risk management strategy.

#### 29. FINANCIAL INSTRUMENTS

- i. Fair value of financial instruments that are not measured at fair value
  - The carrying amounts of financial assets and financial liabilities that are not measured at fair value are considered by the management of the Company to approximate their fair values.
- ii. Fair value of financial instruments that are measured at fair value on a recurring basis

# 1. Fair value hierarchy

3. Valuation techniques and inputs applied for the purpose of Level 3 fair value measurement

Domestic emerging and unlisted equity investments are valued at fair value using the asset method and market method.

The asset method estimates the fair value based on the net asset value. When the liquidity discount decreases, the fair value of such investments will increase. The unobservable input values used by the Company as of December 31, 2022, and 2021, are liquidity discounts of 5% to 35%. If the liquidity discount increases by 1% while other input values remain unchanged, the fair value will decrease by \$1,864 thousand and \$1,843 thousand, respectively.

The market method selects samples from listed companies engaged in similar business activities, refers to their stock trading prices in active markets, and evaluates the implied value multiples and related transaction information of such prices to determine the asset value of the valuation target. Alternatively, it refers to the stock trading prices of companies engaged in similar business activities in non-active markets and makes appropriate adjustments, or refers to the indicative transaction prices of the valuation target in the most recent fiscal year.

#### iii. Categories of financial instruments

	December 31, 2022	December 31, 2021
Financial assets		
Financial assets at FVTPL -

- Note 1: The balance includes financial assets measured at amortized cost, such as cash and cash equivalents, current financial assets at amortized cost, accounts receivable, other receivables, and refundable deposits.
- Note 2: The balance includes financial liabilities measured at amortized cost, such as short-term borrowings, notes payable, accounts payable, other payables, and deposits received.
- iv. Financial risk management objectives and policies

The Company's financial risk management objective is to manage foreign exchange risks, interest rate risks, credit risks, and liquidity risks related to operating activities. To reduce related financial risks, the Company is committed to identifying,

evaluating, and mitigating market uncertainties to minimize the potential adverse impact of market fluctuations on the Company's financial performance.

The Company uses derivative financial instruments to hedge its exposure and mitigate the impact of these risks. The use of derivative financial instruments is governed by policies approved by the Company's board of directors, including written principles for foreign exchange risk, interest rate risk, credit risk, the use of derivative and non-derivative financial instruments, and the investment of residual liquid funds. The Company's significant financial activities are reviewed by the board of directors in accordance with relevant regulations and internal control systems. During the execution of the financial plan, the Company must strictly comply with the relevant financial operating procedures concerning overall financial risk management and the division of responsibilities. Internal audit personnel continuously review policy compliance and exposure limits. The Company does not engage in financial instrument transactions (including derivative financial instruments) for speculative purposes.

#### Market risk

The Company's activities exposed it primarily to the financial risks of changes in foreign currency exchange rates (see (1) below) and interest rates (see (2) below).

The Company's exposure to market risk related to financial instruments and its management and measurement of such exposure have not changed.

#### (1) Foreign currency risk

The Company engages in foreign currency-denominated sales and purchase transactions, which expose it to exchange rate fluctuation risks. The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the period are set out in Note 32.

#### Sensitivity analysis

The Company was mainly exposed to USD.

The following table details the sensitivity analysis of the Company when the exchange rate of the functional currency increases and decreases by 3% against each relevant foreign currency. 3% is the sensitivity ratio used for internal reporting of exchange rate risk to key management and represents management's assessment of the reasonably possible range of

changes in foreign currency exchange rates. The sensitivity analysis includes only foreign currency monetary items in circulation and adjusts their year-end translation by a 3% change in exchange rates. The amounts in the table below represent the increase in income before income taxes that would result from a 3% weakening of the functional currency against the respective currencies, and the negative impact on income before income taxes that would result from a 3% strengthening of the functional currency against the respective currencies.

	2022	2021
3% change in profit or loss		
USD	<u>\$ 12,883</u>	<u>\$ 9,339</u>

#### (2) Interest rate risk

Interest rate risk refers to the risk of changes in the value of financial instruments due to fluctuations in market interest rates. The Company continuously monitors market interest rate fluctuations to manage interest rate risk.

The carrying amounts of the Company's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	December 31, 2022	December 31, 2021
Fair value interest rate		
risk		
Financial assets	\$ 168,905	\$ 28,220
Financial liabilities	381,821	382,286
Cash flow interest rate		
risk		
Financial assets	66,161	260,684
Financial liabilities	150,000	80,000

#### Sensitivity analysis

For the sensitivity analysis of interest rate risk, the Company calculates based on financial assets and financial liabilities with cash flow interest rate risk as of the balance sheet date. The Company uses a 0.5% increase/decrease in market interest rates as a reasonable risk assessment for reporting interest rate changes to management. Assuming all other variables remain unchanged, a 0.5% increase/decrease in market interest rates would decrease/increase and increase/decrease the Company's

pre-tax net income for 2022 and 2021 by \$419 thousand and \$903 thousand, respectively.

#### (3) Other price risk

The Company is exposed to equity price risk due to its holdings of beneficiary certificates and investments in listed (OTC) and emerging market equity securities.

#### Sensitivity analysis

The Company measures the risk of financial assets affected by changes in equity prices. The Company uses sensitivity analysis to measure equity security price risk.

Sensitivity analysis is conducted based on the equity investment positions exposed as of the balance sheet date. If the domestic and foreign equity investment positions' prices fall by 5%, the pre-tax income for 2022 and 2021 would decrease by \$11,646 thousand and \$12,234 thousand, respectively, due to the decline in the fair value of financial assets at FVTPL. The other comprehensive income for 2022 and 2021 would decrease by \$6,274 thousand and \$11,502 thousand, respectively, due to the decline in the fair value of financial assets at FVTOCI.

#### 2. Credit risk

Credit risk refers to the risk of financial loss to the Company due to counterparties defaulting on their contractual obligations. As of the balance sheet date, the maximum credit risk exposure that the Company may face due to counterparties not fulfilling their obligations primarily arises from the carrying amount of financial assets recognized on the parent company only balance sheets.

The Company's policy is to deal only with creditworthy parties and, when necessary, to obtain sufficient collateral to mitigate the risk of financial loss due to defaults. The risk assessment for individual clients considers factors that may affect the client's payment ability, including the client's financial condition, credit rating from rating agencies, the Company's internal credit rating, historical transaction records, and the current economic situation. The Company also uses certain credit enhancement tools, such as prepayment of goods and credit insurance, to reduce the credit risk of specific clients at appropriate times.

Accounts receivable include many clients, spread across different industries and geographic regions. The Company continuously assesses the financial condition of its accounts receivable clients.

The Company's credit risk is primarily concentrated in the top five group clients of the Company. As of December 31, 2022, and 2021, the ratio of total accounts receivable from these clients was 71% and 54%, respectively, and the credit concentration risk of the remaining accounts receivable was relatively insignificant. After considering specific factors and conducting risk assessments, the credit risk of the top five group clients should not have a significant impact on the Company.

#### 3. Liquidity risk

The Company manages and maintains sufficient cash to support the Company's operations and mitigate the impact of cash flow fluctuations. The Company's management monitors the use of bank financing lines and ensures compliance with the terms of borrowing contracts.

The remaining contractual maturity analysis of non-derivative financial liabilities is prepared based on the earliest date the Company could be required to repay the financial liabilities, using the undiscounted cash flows (including principal and estimated interest). Therefore, the Company's non-derivative financial liabilities maturity analysis is prepared according to the agreed repayment dates.

The net foreign exchange gains and losses of the Company in 2022 and 2021 were net gains of \$27,195 thousand and net losses of \$7,496 thousand, respectively. Due to the variety of functional currency types in foreign currency transactions, it is not possible to disclose exchange gains and losses by major foreign currency categories.

#### 33. <u>SEPARATELY DISCLOSED ITEMS</u>

#### i. INFORMATION ABOUT SIGNIFICANT TRANSACTIONS:

- 1. Financing provided to others: Table 1.
- 2. Endorsements/guarantees provided: Table 2.
- 3. Marketable securities held (excluding investments in subsidiaries, associates, and joint control portions): Table 3.
- 4. Marketable securities acquired or disposed of at costs or prices of at least NT\$300 million or 20% of the paid-in capital: None.
- 5. Acquisition of individual real estate at costs of at least NT\$300 million or 20% of the paid-in capital: None.
- 6. Disposal of individual real estate at prices of at least NT\$300 million or 20% of the paid-in capital: None.
- 7. Total purchases from or sales to related parties amounting to at least NT\$100 million or 20% of the paid-in capital Table 4.
- 8. Receivables from related parties amounting to at least NT\$100 million or 20% of the paid-in capital: None.
- 9. Trading in derivative instruments: None.

#### ii. INFORMATION ON INVESTEES: Table 5.

#### iii. INFORMATION ON INVESTMENTS IN MAINLAND CHINA:

- 1. Information on any investee company in mainland China, showing the name, principal business activities, paid-in capital, method of investment, inward and outward remittance of funds, ownership percentage, investment profit or loss, carrying amount of the investment at the end of the period, repatriations of investment income, and limit on the amount of investment in the mainland China area: Table 6.
- 2. Any of the following significant transactions with investee companies in mainland China, either directly or indirectly through a third party, and their prices, payment terms, and unrealized gains or losses: The Company entrusts raw materials to its mainland subsidiaries, UMT KUNSHAN and Radiation Technology Inc., for processing. After processing, the finished products are returned to the Company without sales processing. The total unrealized sales loss in 2022 was \$284 thousand. For significant transaction matters between the Company and the invested companies in Mainland China, please refer to Table 7.

- (1) The amount and percentage of purchases and the balance and percentage of the related payables at the end of the period.
- (2) The amount and percentage of sales and the balance and percentage of the related receivables at the end of the period.
- (3) The amount of property transactions and the amount of the resultant gains or losses.
- (4) The balance of negotiable instrument endorsements or guarantees or pledges of collateral at the end of the period and the purposes.
- (5) The highest balance, the ending balance, the interest rate range, and total current period interest with respect to the financing of funds.
- (6) Other transactions that have a material effect on the profit or loss for the year or on the financial position, such as the rendering or receipt of services.
- iv. INFORMATION OF MAJOR SHAREHOLDERS: The name of the shareholder, the number of shares owned, and percentage of ownership of each shareholder of shareholders with ownership of 5% or greater (Table 8)

Note 1: There are seven types of relationships between the endorser and the endorsee, which can be indicated as follows:

- (1) A company with which it does business.
- (2) A company in which the Company directly and indirectly holds more than 50 percent of the voting shares.
- (3) A company that directly and indirectly holds more than 50 percent of the voting shares in the Company.
- (4) Companies in which the Company holds, directly or indirectly, 90% or more of the voting shares.
- (5) Where a public company fulfills its contractual obligations by providing mutual endorsements/guarantees for another company in the same industry or for joint builders for purposes of undertaking a construction project.
- (6) Where all capital contributing shareholders make endorsements/ guarantees for their jointly invested company in proportion to their shareholding percentages.
- (7) Where companies in the same industry provide among themselves joint and several security for a performance guarantee of a sales contract for pre-construction homes pursuant to the Consumer Protection Act for each other
- Note 2: The endorsement guarantee procedures of the Company, UMT Holdings (Samoa) Limited, and RADIATION TECHNOLOGY, INC. for others are as follows:
  - (1) The total amount of external endorsement guarantees by the Company shall not exceed 50% of the current net value; the total amount of external endorsement guarantees by the Company and its subsidiaries shall not exceed 60% of the current net value.
  - (2) The amount of endorsement guarantee for a single enterprise by the Company shall not exceed 50% of the current net value; the amount of endorsement guarantee for a single enterprise by the Company and its subsidiaries shall not exceed 60% of the current net value. If the endorsement guarantee is made due to business relations, it shall not exceed the total transaction amount with the Company in the most recent fiscal year (whichever is higher between the purchase or sales amount between the two parties). The net value shall be based on the most recent financial statements audited or reviewed by an accountant.
  - (3) The endorsement guarantee amount between companies in which the Company directly and indirectly holds 90% or more of voting shares shall not exceed 10% of the Company's net value. However, endorsement guarantees between companies that in which the Company directly and indirectly hold 100% of voting shares are not subject to this limitation.

Note 3: The conversion is based on the central exchange rate of the US dollar as of December 31, 2022.

# UNIVERSAL MICROWAVE TECHNOLOGY, INC. INFORMATION OF MAJOR SHAREHOLDERS DECEMBER 31, 2022

Table 8

	Shares						
Name of Major Shareholder	Number of Shares	Percentage of					
	Held	Ownership (%)					
CenXin Investment Co., Ltd.	4,083,856	6.57%					

- Note 1: The information of major shareholders presented in this table is provided by the Taiwan Depository & Clearing Corporation based on the number of ordinary shares and preference shares held by shareholders with ownership of 5% or greater, that have been issued without physical registration (including treasury shares) by the Company as of the last business day for the current quarter. The share capital in the consolidated financial statements may differ from the actual number of shares that have been issued without physical registration because of differences in the basis of preparation.
- Note 2: If a shareholder delivers the shareholdings to the trust, the above information will be disclosed by the individual trustor who opened the trust account. For shareholders who declare insider shareholdings with ownership greater than 10% in accordance with the Security and Exchange Act, the shareholdings include shares held by shareholders and those delivered to the trust over which shareholders have rights to determine the use of trust property. For information relating to insider shareholding declaration, please refer to the Market Observation Post System website of the TWSE.

# Universal Microwave Technology, Inc. The Declaration of Internal Control System

Date: March 29, 2023

Based on the self-examination results of the internal control system for the year of 2022, Universal Microwave Technology, Inc. (the Company) therefore declares the following:

- 1. Board of Directors and the management of the Company understand that it is their responsibility to establish, implement, and maintain an internal control system, and such a system has been established. The purpose to establish the aforesaid system is to reasonably assure 1) the operating results and operating efficiencies (including profit, performance, and the safeguard of assets); 2) the reliability, instantaneity and transparency of the financial reports, and 3) the compliance of the relevant laws and regulations.
- 2. An internal control system, regardless how perfectly the system is being designed, can have its defects. A system that can reasonably assure the achievements of the three purposes mentioned in the preceding paragraph is considered as effective and useful. In addition, changes in the business environment and situation may, as a result, hinder the effectiveness of an adequate system. However, the internal control system of the Company has included a self-examination mechanism; the Company will make immediate corrections considering the materiality when material errors are detected.
- 3. The evaluation of effectiveness of the internal control system design and implementation is made in accordance with "Guidelines for the Establishment of Internal Control Systems by Public Companies" (the Guidelines). The Guidelines are made to exam the following five items during the internal control process: 1) Control Environment, 2) Risk Evaluation and Management, 3) Control Activities, 4) Information and Communication, and 5) Monitoring processes. Details of each area being examined can be found in the Guidelines.
- 4. Based on the items mentioned in the preceding paragraph, the Company has evaluated the design of the internal control system and the effectiveness of the implementation of the aforesaid system.
- 5. The Company management declares that the internal control system (including Subsidiary Governance) has effectively assured that the following objectives have been reasonably achieved during the assessment period:
- (1) The effectiveness and efficiency of business operations;
- (2) The reliability, timeliness, transparency, and regulatory compliance of the financial reports;
- (3) The compliance of the relevant laws/regulations.
- 6. This Declaration is a significant content in the annual report and prospectus of the Company, and it is available to the general public. If it contains false information or conceals any material contents, the Company is in violation of Article 20, Article 32, Article 171 and Article 174 set forth in the ROC Securities and Exchange Act.
- 7. The Board of Directors has approved the Declaration of Internal Control System in the board meeting held on March 29, 2023. All of seven Directors present consented to the Declaration, and no dissenting opinion was expressed.
